Preface Preface to the English Edition The book you are reading is a translation from Russian into English Within a pretty short term this book saw two editions in Russian The authors received in spiring responses from readers that both stimulated our continuing and improving this work and made sure it would not be in vain of us to try to multiply our readers by covering the English speaking engineering community When we prepared the present edition we took into account interests of the Western readers so we had to make some changes to our text published earlier These changes include the following aspects First we excluded a lot of references and discussions regarding Russian engineering codes It seems to us those are of no real interest for Western engineers oriented at Eurocode or national construction design regulations

Mesh-Free and Finite Element-Based Methods for Structural Mechanics Applications Nicholas Fantuzzi, 2021-01-27 The problem of solving complex engineering problems has always been a major topic in all industrial fields such as aerospace civil and mechanical engineering The use of numerical methods has increased exponentially in the last few years due to modern computers in the field of structural mechanics Moreover a wide range of numerical methods have been presented in the literature for solving such problems Structural mechanics problems are dealt with using partial differential systems of equations that might be solved by following the two main classes of methods Domain decomposition methods or the so called finite element methods and mesh free methods where no decomposition is carried out Both

methodologies discretize a partial differential system into a set of algebraic equations that can be easily solved by computer implementation. The aim of the present Special Issue is to present a collection of recent works on these themes and a comparison of the novel advancements of both worlds in structural mechanics applications.

Advances and Trends in Structural Engineering, Mechanics and Computation Alphose Zingoni, 2010-08-16. *Advances and Trends in Structural Engineering Mechanics and Computation* features over 300 papers classified into 21 sections which were presented at the Fourth International Conference on Structural Engineering Mechanics and Computation SEMC 2010 Cape Town South Africa 6-8 September 2010.
