Nursing And Anthropology:

Anthropology of Nursing Karen Holland, 2019-09-09 This book aims to introduce nurses and other healthcare professionals to how anthropology can help them understand nursing as a profession and as a culture Drawing on key anthropological concepts the book facilitates the understanding and critical consideration of nursing practice as seen across a wide range of health care contexts and which impacts the delivery of appropriate care for service users Considering the fields in which nurses work the book argues that in order for nurses to optimize their roles as deliverers of patient care they must not only engage with the realities of the cultural world of the patient but also that of their own multi professional cultural environment The only book currently in the field on anthropology of nursing this book will be a valuable resource for nursing students at all academic levels especially where they can pursue specific modules in the subject as well as those other students pursuing medical anthropology courses As well as this it will be an essential text for those post graduate students who wish to consider alternative world views from anthropology and their application in nursing and healthcare in addition to their undertaking ethnographic research to explore nursing in all its fields of practice [Anthropology and Nursing](#)

Pat Holden, Jenny Littlewood, 2015-07-03 Nursing has been described as the most natural female occupation of all embodying the so called feminine ideals of tenderness and caring Yet these ideals are juxtaposed with images of nurses as sex objects or as ruthlessly efficient haridans How have these very different images been constructed And how do they relate to the reality of nursing the close contact with blood urine and faeces and the involvement with the rites of birth illness and death This book first published in 1991 explores the alternative ways different societies have developed to reconcile these contradictions Using contemporary historical and cross cultural case material the contributors trace the historical development of the role and investigate the expected qualities of nurses within different cultural settings such as India Uganda and Japan They look closely at the nurse as a social construct and demonstrate how the stereotypes relate to a particular society s notions of gender Designed primarily for anthropologists and sociologists interested in health illness and systems of health care this book challenges some of the myths of traditional nursing studies and provides an original perspective on doctor nurse patient relationships ***Nursing and Anthropology*** Madeleine M. Leininger, 1970

Uneasy Endings Renée Rose Shield, 2018-08-06 If we continue we grow old and this is how it could

be for us writes Ren e Rose Shield in her candid and sympathetic account of life in one American nursing home Drawing on anthropological methods and theory to illuminate institutional life she probes the sources of the profound sense of unease she found at the place she calls The Franklin Nursing Home For fourteen months Shield participated in life at a nursing home in the northeastern United States She got to know many of the people associated with the home doctors nurses custodians kitchen workers administrators social workers visiting relatives and above all the residents who emerge in this book as the individuals they are Sections in which the residents speak poignantly in their own voices are woven throughout her richly detailed observations of everyday routines and events We see them using guile and humor to get by struggling to approach the end of their lives with a measure of autonomy and dignity and we meet an often conscientious and caring staff constrained by conflicting professional perspectives and by the bureaucratic structure in which they work There are no villains here Rather Shield explains how conditions in the nursing home create a difficult and uncomfortable liminality the transition from an accustomed role to a new one for the residents In characterizing nursing home existence she goes beyond Erving Goffman s classic definition of the total institution to show how residents pass from adulthood to death without the comfort of ritual or community support common in rites of passage In addition to the isolation created by this solitary passage she finds restrictions on reciprocity the old people are always recipients whose need and obligation to repay are seen as unnecessary and difficult to satisfy The system encourages their passivity which deepens their dependency and helps to explain why they are often perceived as children Offering concrete suggestions for improving the quality of nursing home life *Uneasy Endings* will find a broad audience among those who work with the aged

Effect of Operational Variables on Nitrogen Transformations in Duckweed Stabilization Ponds Julia Rosa Caicedo Bejarano,2005-03-24 There is an urgent need to develop and improve low cost technologies for wastewater treatment Simultaneously treating wastewater and producing duckweed in a pond system is therefore an attractive solution contributing to both environmental protection and food production Duckweed has excellent qualities a high protein content a high growth rate and is an easy crop to handle The small plant turns nitrogen from wastewater into a food source This thesis reports on the effect of different operational variables like anaerobic pre treatment the combination of algae and duckweed ponds and pond depth Improved nitrogen removal was obtained through the combination of duckweed ponds with algae ponds Duckweed pond systems could be designed with shallow depth without affecting nitrogen removal efficiency This research is the result of the cooperative effort between the EIDENAR Univalle Cali Colombia and the UNESCO IHE Institute for Water Education in Delft the Netherlands
