Nursing As Caring A Model For Transforming Practice:

Nursing as Caring Anne Boykin, 2001 Describes a new theory of nursing as caring and caring as a way of nurses living in the world This theory provides a view that can be lived in all nursing situations and can be practiced alone or in combination with other theories Illustrates the practical meaning of the theory in a range of nursing situations discusses nursing service administration from the perspective of the theory and offers strategies for transforming nursing education based on nursing as caring Boykin is dean and professor at the Christine E Lynn Center for Caring College of Nursing Florida Atlantic University Schoenhofer teaches graduate nursing at Alcorn State University c Book News Inc **Nursing As Caring** Savina Schoenhofer, Anne Boykin, Anne Boykin, PhD, MN, 2015-12-28 *Nursing as Caring A Model for Transforming Practice* By Anne Boykin and Savina O Schoenhofer *Nursing as Caring A Model for Transforming Practice* sets forth a different order of nursing theory This nursing theory is personal not abstract In order to express nursing as caring there is a clear need to know self as caring person The focus of the Nursing as Caring theory then is not toward an end product such as health or wellness It is about a unique way of living caring in the world It is about nurses and nursed living life and nurturing growing humanly through participation in life together The study of human caring as a unique and essential characteristic of nursing practice has gradually expanded from early definitional philosophical and cultural research on the meanings of caring to the explication of theoretical definitions of caring conceptual models proposed taxonomy of caring concepts a great deal of creative experimentation with research methodologies and the development of several theories of caring In general one may say that knowledge of caring has grown in two ways first by extension and more recently by intension Growth by extension consists of a relatively full explanation of a small region which is then carried over into an explanation of adjoining regions Growth by extension can be associated with the metaphors of building a model or putting together a jigsaw puzzle Kaplan 1964 p 305 In growth by intension a partial explanation of a whole region is made more and more adequate and outlines for subsequent theory and observation are clarified Growth by intension is associated with the metaphor of gradually illuminating a darkened room A few persons enter the room with their individual lights and are able to slowly perceive what is in that room As more persons enter the room it becomes more fully illuminated and the observed reality is clarified

nurse but a message that all nurses out there for what we are and why it goes beyond you or me I invite the different readers nurses students patients and those who just have to be curious to walk this pathway with me I hope you walk away with a greater respect for the quiet strength of nurses the emotional labor that they carry and the bravery of caring deeply in a world that often hurries Let this book be a mirror and a map a mirror for reflection on where we have been and a map for where the heart of nursing needs to go
