Marcus, 2012-01-19 On the eve of his 40th birthday Gary Marcus a renowned scientist with no discernible musical talent learns to play the guitar and investigates how anyone of any age can become musical Do you have to be born musical to become musical Do you have to start at the age of six Using the tools of his day job as a cognitive psychologist Gary Marcus becomes his own guinea pig as he takes up the guitar In a powerful and incisive look at how both children and adults become musical *Guitar Zero* traces Marcus's journey what he learned and how anyone else can learn too A groundbreaking peek into the origins of music in the human brain this musical journey is also an empowering tale of the mind's enduring plasticity Marcus investigates the most effective ways to train body and brain to learn to play an instrument in a quest that takes him from Suzuki classes to guitar gods From deliberate and efficient practicing techniques to finding the right music teacher Marcus translates his own experience as well as reflections from world renowned musicians into practical advice for anyone hoping to become musical or to learn a new skill *Guitar Zero* debunks the popular theory of an innate musical instinct while simultaneously challenging the idea that talent is only a myth While standing the science of music on its head Marcus brings new insight into humankind's most basic question what counts as a life well lived Does one have to become the next Jimi Hendrix to make a passionate pursuit worthwhile or can the journey itself bring the brain lasting satisfaction For all those who have ever set out to play an instrument or wish that they could *Guitar Zero* is an inspiring and fascinating look at the pursuit of music the mechanics of the mind and the surprising rewards that come from following one's dreams [Ski-hill](#)

[Graph Pedagogy Meter Fundamentals](#) Andrea M. Calilhanna, 2024-01-03 This book shows teachers and students how meter fundamentals are taught through *Ski-hill Graph Pedagogy* the three step psychoacoustic mathematical music theory approach developed by music educator researcher Andrea M Calilhanna inspired by contemporary meter theory of Battell Professor of the Theory of Music Yale University Richard Cohn The *ski-hill graph* enables students to visually represent meter fundamentals mathematics through a soundbased approach experienced from listening to music in the first lessons Students taught the meter as time signatures and beats grouped in measures understand meter as the notation However the *ski-hill graph* is a solution for understanding meter because music is acoustics sound and listening is central to Cohn's sound based theories To apply accurate meter mathematics from the *ski-hill graph* to music preparation means students save time later in

rehearsals from a solid start to decode their work Visualising meter through the ski hill layout as a summary of all pulses and all meters from listening assists students to understand their meter experiences and its mathematical aspects Students listen clap tap and map with mathematics meter beat class first through the ski hill then they apply the ski hill mathematics to annotate practice and compose music through other representations such as linear and circle graphs In this way students not only become aware of new information but they also understand their new knowledge Knowing and understanding mathematical elements of meter means the theory can apply to performance to improve timing inform expression sight reading and much more Without skills to analyse meter from listening to music many important details are left out because they are hidden by notation based understandings of music analysis Cohn s theories of meter however offer solutions to understand each pulse and meter as cycles to decode music performed and listened to The book works through small cycles to grow listeners awareness of mathematical aspects of meter mathematical music theory The Ski hill Graph Pedagogy approach provides students with several benefits for meter fundamentals pedagogy including development of mathematical knowledge and practical skills to understand musical timing and expression and increased performance confidence through more secure performances from critical thinking and metacognitive processes Ski hill Graph Pedagogy is suitable for most teaching styles and provides inclusive ethical music theory for diverse music education Suitable for teaching meter fundamentals with students of all ages
