Richard Littleton Guerrant

Nurturing Evolution:

Nurturing Evolution Richard Burnett Carter, 1993 In *Nurturing Evolution* Richard B Carter cites several fields of knowledge in order more comprehensively to argue that a human being is specifically a political animal rather than a hostile naked ape which has partially given up its solitary interests to survive in competition with other hostile naked apes Carter argues that humanness itself is in significant part a result of childhood nurture beginning at birth and that institutions of early nurture comprise social wombs i e true extensions of those evolutionary processes controlling fetal development within the mother's womb Carter further argues that the political creations designed to protect and nourish those social wombs are in effect also adjuncts of human evolution *Nurturing Evolution* ends by elaborating on the great dissimilarity between morally responsible human adults produced within politically nurtured families and the naked apes envisaged by other schools of political theory

Nurturing Natures Graham Music, 2016-10-21 This new edition of the bestselling text *Nurturing Natures* provides an indispensable synthesis of the latest scientific knowledge about children's emotional development Integrating a wealth of both up to date and classical research from areas such as attachment theory neuroscience developmental psychology and cross cultural studies it weaves these into an accessible enjoyable text which always keeps in mind children recognisable to academics practitioners and parents It unpacks the most significant influences on the developing child including the family and social context It looks at key developmental stages from life in the womb to the pre school years and right up until adolescence covering important topics such as genes and environment trauma neglect or resilience It also examines how children develop language play and memory and new to this edition moral and prosocial capacities Issues of nature and nurture are addressed and the effects of different kinds of early experiences are unpicked creating a coherent and balanced view of the developing child in context *Nurturing Natures* is written by an experienced child therapist who has used a wide array of research from different disciplines to create a highly readable and scientifically trustworthy text This book should be essential reading for childcare students for teachers social workers health visitors early years practitioners and those training or working in child counselling psychiatry and mental health Full of fascinating findings it provides answers to many of the questions people really want to ask about the human journey from conception into adulthood

Evolution of Evolution Richard Littleton Guarrant, 2018-09-30 Numerous scholarly articles and books have been written about biologic and social evolution compassion life's meaning violence and predictions of future outcomes However what is not often addressed but is increasingly desperately needed is the realization of the evolutionary survival value of caring for others This book strives to link our humanities and religious philosophies to a scientific understanding of human destiny and provide a key to meaning in our lives Though this idea has incubated for over two decades recent extremism in Charlottesville and global threats of inhumanity and violence make this more timely than ever for all who care about who we are and our children's future Furthermore our capacity for benefit or destruction of Homo sapiens or civilization as we know

it sets a ticking timer on the urgency of this realization and focused action we don't have forever to get it

Women's Evolutionary Insight: Unveiling the Active Role of Women in Human History Pasquale De Marco, 2025-08-15 In *Women's Evolutionary Insight: Unveiling the Active Role of Women in Human History* we challenge traditional evolutionary narratives that have often marginalized women's contributions. This thought-provoking book sheds light on the profound impact women have had on our species, revealing their agency, power, and resilience throughout history. Through a comprehensive exploration of biology, culture, and society, we uncover the intricate ways in which women have shaped social structures, influenced cultural development, and driven technological advancements. We examine the role of female choice in mate selection, highlighting the significance of women's preferences in shaping human evolution. We delve into the evolution of gender roles, revealing how women's contributions to cooperative behaviors, nurturing, and wisdom have been essential for our survival and prosperity. Challenging stereotypes, we celebrate the creative spirit of women, exploring their immense contributions to art, literature, and music. We uncover the strength and resilience of women, showcasing their remarkable ability to overcome adversity and thrive in the face of challenges. We trace the evolution of women's roles throughout history, examining the impact of cultural and societal factors on their status and opportunities. This book is a clarion call for gender equality, recognizing the immense value of women's contributions to society. We explore the challenges and opportunities of changing gender dynamics, advocating for a world where women's voices are heard and valued. We envision a future where women are empowered to reach their full potential, where their talents and abilities are celebrated, and where they are equal partners in shaping the destiny of humanity. Join us on this enlightening journey as we explore the remarkable and often overlooked role of women in human evolution. Discover the strength, resilience, and wisdom of women throughout history and gain a new appreciation for the profound impact they have had on our species. *Women's Evolutionary Insight* is a must-read for anyone interested in gender studies, evolutionary psychology, or the untold stories of women's contributions to human history. Love and Hate Irenäus Eibl-Eibesfeldt, 2017-07-05 The author argues that there are specific turning points in evolution. Structures and behavioral patterns that evolved in the service of discrete functions sometimes allow for unforeseen new developments as a side effect. In retrospect, they have proven to be pre-adaptations and serve as raw material for natural selection to work upon. *Love and Hate* was intended to complement Konrad Lorenz's book *On Aggression* by pointing out our motivations to provide nurturing and thus to counteract and correct the widespread but one-sided opinion that biologists always present nature as bloody in tooth and claw and intra-specific aggression as the prime mover of evolution. This simplistic image is nonetheless still with us all the more regrettably because it hampers discussion across scholarly disciplines. Eibl-Eibesfeldt argues that leaders in individualized groups are chosen for their pro-social abilities. Those who comfort group members in distress, who are able to intervene in quarrels, and to protect group members who are attacked, those who share those who in brief show abilities to nurture are chosen by the others as

leaders rather than those who use their abilities in competitive ways Of course group leaders may need beyond their pro social competence to be gifted as orators war leaders or healers Issues of love and hate are social in origin and hence social in consequence Life has emerged on this planet in a succession of new forms from the simplest algae to man man the one being who reflects upon this creation who seeks to fashion it himself and who in the process may end by destroying it It would indeed be grotesque if the question of the meaning of life were to be solved in this way In language that is clear and accessible throughout arguing forcefully for the innate and preprogrammed dispositions of behavior in higher vertebrates including humans Eibl Eibesfeldt steers a middle course in discussing the development of cultural and ethical

influences that shape your life Start your journey of self discovery and empowerment today **Guided Evolution of Society** Bela H. Banathy, 2013-03-09 Based on a comprehensive review of human and societal evolution the book develops an approach to conscious self guided evolution In the course of the evolutionary journey of our species there have been three seminal events The first happened some seven million years ago when our humanoid ancestors entered on the evolutionary scene Their journey toward the second crucial event lasted over six million years when as the greatest event of our evolutionary history homo sapiens sapiens started the revolutionary process of cultural evolution Today we have arrived at the threshold of the third major event the revolution of conscious evolution when it becomes our responsibility to enter into the evolutionary design space and guide the evolutionary journey of our species The book tells the story of the first six million years of the journey in just enough detail to understand how evolution had worked in times when it was primarily biological driven by natural selection With the human revolution some fifty thousand years ago with the emergence of self reflective consciousness the evolutionary process transformed from biological into cultural From this point on the book follows the journey with detailed attention in order to learn how cultural evolution works The book is organized in three parts Part One commences with an exposition of a brief history of the evolutionary idea through time with a focus on a review of the science of general evolution and specifically social and societal evolution Next the book unfolds the evolutionary story of our species from the time when the first humanoids entered the evolutionary scene to our current era Part Two develops a systems view of evolution explores the ways and means of how evolution works characterizes evolutionary consciousness and develops the idea of conscious evolution Part Three builds upon the knowledge developed in the first two parts and sets forth the key conditions of conscious self guided evolution elaborating the core condition which is the acquisition of evolutionary competence through evolutionary learning The focus of this part is on an approach to the design of evolutionary guidance systems that our families neighborhoods communities organizations social and societal systems can use to design the future they aspire to attain The work is set aside from other statements in three important ways It provides 1 a comprehensive review of how evolution has worked with a focus on socio cultural evolution 2 an explanation of evolutionary consciousness and the conditions of engaging in conscious evolution and 3 most significantly it develops a detailed approach and a methodology to the design of evolutionary guidance systems **The Irreducible Needs Of Children** T. Berry

Brazelton, Stanley I. Greenspan, 2009-02-23 What do babies and young children really need This impassioned dialogue cuts through all the theories platitudes and controversies that surround parenting advice to define what every child must have in the first years of life The authors both famed advocates for children lay out the seven irreducible needs of any child in any society and confront such thorny questions as How much time do children need one on one with a parent What is the effect of shifting caregivers of custody arrangements Why are we knowingly letting children fail in school Nothing is off limits even such an issue as whether every child needs or deserves to be a wanted child This short hard hitting book the fruit of decades

of experience and caring sounds a wake up call for parents teachers judges social workers policy makers anyone who cares about the welfare of children

Nurturing Our Humanity Riane Eisler, Douglas P. Fry, 2019-07-05 *Nurturing Our Humanity* offers a new perspective on our personal and social options in today's world showing how we can build societies that support our great human capacities for consciousness caring and creativity It brings together findings largely overlooked from the natural and social sciences debunking the popular idea that we are hard wired for selfishness war rape and greed Its groundbreaking new approach reveals connections between disturbing trends like climate change denial and regressions to strongman rule Moving past right vs left religious vs secular Eastern vs Western and other familiar categories that do not include our formative parent child and gender relations it looks at where societies fall on the partnership domination scale On one end is the domination system that ranks man over man man over woman race over race and man over nature On the other end is the more peaceful egalitarian gender balanced and sustainable partnership system *Nurturing Our Humanity* explores how behaviors values and socio economic institutions develop differently in these two environments documents how this impacts nothing less than how our brains develop examines cultures from this new perspective including societies that for millennia oriented toward partnership and proposes actions supporting the contemporary movement in this more life sustaining and enhancing direction It shows how through today's ever more fearful frenzied and greed driven technologies of destruction and exploitation the domination system may lead us to an evolutionary dead end A more equitable and sustainable way of life is biologically possible and culturally attainable we can change our course
