The Geopolitics of China's Belt and Road Initiative Theodor Tudoroiu,2023-11-30 This book argues that China s Belt and Road Initiative should be seen more as a geopolitical project and less as a global economic project with China aiming to bring about a new Chinese led international order It contends that China s international approach has two personas an aggressive one focusing on a nineteenth century style territorial empire which is applied to Taiwan and the seas adjacent to China and a new style persona based on relationship building with the political elites of countries in the Global South relying on large scale infrastructure projects to help secure the elites in power a process often leading to lower democratic participation and weaker governance structures It also shows how this relationship building with elites leads to an acceptance of Chinese norms and to changes in states geopolitical preferences and foreign policies to align them with China s geopolitical interests with states thereby joining China s emerging international order Overall the book emphasizes that this new style non territorial empire building based

on relationships is a major new development in international relations not fully recognized and accounted for by international relations experts and theorists **Future of Regional Cooperation in Asia and the Pacific** Bambang

Initiative and the Port of Piraeus Tatiana Gontika, 2021-08-05 This book provides the reader with a better understanding of the One Belt One Road OBOR initiative its various projects around the world and its consequences at a local as well as an international level Background information on both Chinese and Greek sociopolitical history and their maritime industry is provided The book also provides readers with the opinions of people directly involved with the Piraeus Port China Ocean Shipping Group Company COSCO deal through interviews conducted and included in the book OBOR a signature initiative of

Chinese President Xi Jinping is currently one of the most frequently discussed enterprises worldwide. This controversial mix of worldwide projects has put both China and Xi at the center of attention and not in a positive way. Of course not all projects included in the initiative have been or are likely to be successful but the initiative has far ranging economic cultural and political potential. OBOR in its essence is an attempt by the Chinese government to secure a paramount position in global finance for the country and ensure that primacy extends far into the future. In particular it is an attempt to ensure that there are enough natural resources for China to support itself in the long term. Therefore the areas selected for the implementation and development of OBOR are deliberately strategic. One of the countries that China has chosen to invest in is Greece specifically the Port of Piraeus. The OBOR initiative has many similarities with the ancient Silk Road. Although the ancient route and modern concept are in no way identical many similarities become evident when the two are compared. To understand China's motivation to build such a network looking back at history is required. This project was long in the making. Various discussions took place both on an international and a domestic level until all parties came to an agreement. The deal at Piraeus between Greece and China affected more people than the politicians and the shipowners it affected everyone involved in the operations of the port as well as the residents of the area. To further comprehend the impact on their lives one must see things through their eyes and there is no better way than contacting individuals and conversing with them. In conclusion the specific deal at Piraeus and the OBOR initiative as a whole have the potential of benefiting the international and local communities. However specific measures must be taken and governments must collaborate in order for the deal in Piraeus and the OBOR initiative to have the most beneficial and the least negative impact.
