Howard, 1954 **Fly-Fishing Inshore Saltwaters for Pacific Salmon** Richard K. Stoll, 2012-05 Inside Richard Stoll challenges conventional salmon fishing wisdom and the basic tenets of fly fishing as purveyed by the masters of the sport One of the great misconceptions among fly anglers and writers is that fish see the way humans see Not only are fish eyes constructed different than human eyes and for different intended purposes but fish eyes are wired to fish brains differently Further how light acts in water is substantially different from the way it acts in air There are also other key senses through which fish perceive their food and environment in very different ways from us And at times these other senses may be even more important in fish feeding behaviors than sight As an aquatic biologist environmental engineer and avid fly angler Stoll combines the above observations with the major environmental factors that affect the aquatic environments in which fish live From this he creates truly unique fly fishing perspectives and approaches not only for salmon but for types of fly fishing

Salmon Prose Jay Nicholas,2015-01-04 Editors usually ask this question first What is your target audience Editors cringe at the way I answer this question for Salmon Prose 1 Salmon fiction enthusiasts the first two short stories are pure fantasy and quite unlike what most people would expect from a scientist angler 2 Salmon conservation advocates you may agree disagree or simply find intriguing ideas here but there is plenty to consider if the reader is actively engaged in salmon management or efforts to influence management decisions 3 Salmon and steelhead anglers if you fish there is much to stimulate discussion here again not necessarily the stuff one would read in the traditional press 4 Students of the hatchery versus wild fish debate oh yes Salmon Prose is chock full of information and advice on this touchy subject 5 Nicholas cult readers if you are among the few who follow my diverse writing read on for a wild roller coaster voyage touching on everything from the most professional to most personal aspects of my work with Pacific salmon This book is comprised of previously published material accompanied by new material and a few photos and sketches The material is so diverse that many pieces should probably be digested one at a time so as not to risk exploding your head Only a madman free from the constraints of a sensible editor would jam all of these pieces into one book cover But here they are and I invite you to enjoy consider and tolerate as you read Jay W Nicholas November 2014
