Anisfeld,2024-06-27 Water Management fills a critical gap providing a base of

knowledge to understand and manage complex water problems It is geared primarily towards students at the undergraduate and graduate levels but will also be a helpful resource for practicing water professionals who are looking for new ideas or a broader view of the subject This text explores the entire gamut of water issues from dams to desalination from prior appropriation to pumped storage from sanitation to stormwater Rather than teaching from one disciplinary perspective it examines water through a variety of lenses hydrology climate science ecology and engineering but also law economics history and environmental justice The result is a comprehensive introduction to one of the most demanding challenges of our time developing just and sustainable solutions to water management *Applied Population Biology* S.K. Jain,L.W.

Botsford,2007-07-23 An increasing variety of biological problems involving resource management conservation and environmental quality have been dealt with using the principles of population biology defined to include population dynamics genetics and certain aspects of community ecology There appears to be a mixed record of successes and failures and almost no critical synthesis or reviews that have attempted to discuss the reasons and ways in which population biology with its remarkable theoretical as well as experimental advances could find more useful application in agriculture forestry fishery medicine and resource and environmental management This book provides examples of state of the art applications by a distinguished group of researchers in several fields The diversity of topics richly illustrates the scientific and economic breadth of their discussions as well as epistemological and comparative analyses by the authors and editors Several

principles and common themes are emphasized and both strengths and potential sources of uncertainty in applications are discussed This volume will hopefully stimulate new interdisciplinary avenues of problem solving research **The Management of Marine Regions: The North Pacific** Edward Miles, Stephen Gibbs, David Fluharty, Christine Dawson, David Teeter, 2021 The North Pacific Project was established at the Institute for Marine Studies University of Washington in September 1976 and was funded by the Rockefeller Foundation This funding eventually covered the period September 1 1976 to August 31 1980 The Project seeks to identify and describe in detail the major marine policy problems of the North Pacific region This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1982 **Indigenous Peoples' Governance of Land and Protected Territories in the Arctic** Thora Martina Herrmann, Thibault Martin, 2015-12-22 This book addresses critical questions and analyses key issues regarding Indigenous Aboriginal Peoples and governance of land and protected areas in the Arctic It brings together contributions from scientists indigenous and non indigenous researchers local leaders and members of the policy community that document Indigenous Aboriginal approaches to governance of land and protected areas at the local regional and international level explore new territorial governance models that are emerging as part of the Indigenous Aboriginal governance within Arctic States provinces territories and regions analyse the recognition or lack thereof concerning indigenous rights to self determination in the Arctic and examine how traditional decision making arrangements and practices can be linked with governments in the process of good governance The book highlights essential lessons learned success stories and remaining issues all of which are useful to address issues of Arctic governance of land and protected areas today and which could also be relevant for future governance arrangements **Magnuson Fishery Conservation and Management Act** United States.
