Computational Intelligence in Data Mining - Volume 1 Lakhmi C. Jain, Himansu Sekhar Behera, Jyotsna Kumar Mandal, Durga Prasad Mohapatra, 2014-12-10 The contributed volume aims to explicate and address the difficulties and challenges for the seamless integration of two core disciplines of computer science, i.e. computational intelligence and data mining. Data Mining aims at the automatic discovery of underlying non-trivial knowledge from datasets by applying intelligent analysis techniques. The interest in this research area has experienced a considerable growth in the last years due to two key factors: a knowledge hidden in organizations' databases can be exploited to improve strategic and managerial decision making; b) the large volume of data managed by

organizations makes it impossible to carry out a manual analysis The book addresses different methods and techniques of integration for enhancing the overall goal of data mining The book helps to disseminate the knowledge about some innovative active research directions in the field of data mining machine and computational intelligence along with some current issues and applications of related topics *Content-based Retrieval of Medical Images* Paulo Mazzoncini de

Azevedo-Marques,Rangaraj Rangayyan,2022-06-01 Content based image retrieval CBIR is the process of retrieval of images from a database that are similar to a query image using measures derived from the images themselves rather than relying on accompanying text or annotation To achieve CBIR the contents of the images need to be characterized by quantitative features the features of the query image are compared with the features of each image in the database and images having high similarity with respect to the query image are retrieved and displayed CBIR of medical images is a useful tool and could provide radiologists with assistance in the form of a display of relevant past cases One of the challenging aspects of CBIR is to extract features from the images to represent their visual diagnostic or application specific information content In this book methods are presented for preprocessing segmentation landmarking feature extraction and indexing of mammograms for CBIR The preprocessing steps include anisotropic diffusion and the Wiener filter to remove noise and perform image enhancement Techniques are described for segmentation of the breast and fibroglandular disk including maximum entropy a moment preserving method and Otsu s method Image processing techniques are described for automatic detection of the nipple and the edge of the pectoral muscle via analysis in the Radon domain By using the nipple and the pectoral muscle as landmarks mammograms are divided into their internal external upper and lower parts for further analysis Methods are presented for feature extraction using texture analysis shape analysis granulometric analysis moments and statistical measures The CBIR system presented provides options for retrieval using the Kohonen self organizing map and the k nearest neighbor method Methods are described for inclusion of expert knowledge to reduce the semantic gap in CBIR including the query point movement method for relevance feedback RFb Analysis of performance is described in terms of precision recall and relevance weighted precision of retrieval Results of application to a clinical database of mammograms are presented including the input of expert radiologists into the CBIR and RFb processes Models are presented for integration of CBIR and computer aided diagnosis CAD with a picture archival and communication system PACS for efficient workflow in a hospital Table of Contents Introduction to Content based Image Retrieval Mammography and CAD of Breast Cancer Segmentation and Landmarking of Mammograms Feature Extraction and Indexing of Mammograms Content based Retrieval of Mammograms Integration of CBIR and CAD into Radiological Workflow **Digital Healthcare Empowering Europeans**
