French Warships in the Age of Steam 1859-1914 Stephen S. Roberts, 2021-10-31 This outstanding book will be essential for future studies of naval policy in the period between la Gloire and the Great War The Naval Review This book is the first comprehensive listing in English of more than 1400 warships that were added to the official French navy fleet list between 1 January 1859 and World War I It includes everything from the largest battleships to a small armoured gunboat that looked like a floating egg Reflecting the main phases of naval policy the ships are listed in three separate parts to keep contemporary designs together and then by ship type and class For each class the book provides a design history explaining why the ships were built substantial technical characteristics for the ships as completed and after major reconstructions and selected career milestones including the ultimate fate of each ship

Following the earlier volumes written jointly with Rif Winfield *French Warships in the Age of Sail 1626-1786* and *French Warships in the Age of Sail 1786-1861* this trilogy now provides a complete picture of the development of French warships over a period of almost three centuries. As a technical reference on the French ships of 1859 to 1914 this book is a must for the serious naval architecture student, modeler or enthusiast. So much solid information is packed in this book arranged logically clearly and with so many illustrations I cannot see where another volume on this subject can compete. Highly recommended. *Nautical Research Journal*. Superlatives abound in describing this book: arguably the finest naval shiplist ever created. *Warship International*. *The Development of the Economies of Continental Europe 1850-1914 (Routledge Revivals)* Alan Milward, S. Saul, 2012-08-06. This work first published in 1977 is a reissue of a trailblazing work, the first textbook of economic history to deal comprehensively with the economic development of the whole continent in this period and to do so from a continental rather than a British perspective. But it is more than merely a textbook; it is an interpretative synthesis of the wide range of research on this subject in many countries. As such it will be an indispensable guide for teachers and will extend and improve the scope of teaching by making available for the first time in English the results of continental research. In addition it is a work of fundamental interest to economists in which theories and hypotheses of economic development are now examined in a much wider historical context. In this way the book is an exploration of the objective validity of earlier theories and the starting point for further research into economic development and European history. The work covers the continental development of the German and French economies after 1870 and then in that context analyses the development of the smaller western economies. It then considers the relatively underdeveloped economies of eastern and southern Europe and includes the first attempt at a synthesis of economic development before 1914 in the Balkans. It concludes with an analysis of the international economy and its relationship to the economic development of the continent. **The British Library General Catalogue of Printed Books 1976 to 1982** British Library, 1983.
