Pain And Pleasure A Study Of Bodily Feelings Second Expanded Edition:

Pain and Pleasure Thomas Szasz, 1988-12-01 In this work Dr Szasz dispels popular and scientific confusion about what pain and pleasure actually are Demonstrating the doubtful value of such distinctions as real and Imagined pain or physical and intellectual pleasure he analyses the basic concepts psychological philosophical and sociological involved in bodily feelings and discusses how these feelings are communicated Some of the subjects discussed in Pain and Pleasure include self mutilation sexual satisfaction hysterical anesthesia false pregnancy laughter homosexuality and dream analysis **The**

Human as the Other Matthew Rukgaber, 2025-01-23 Philosophical anthropology investigates what makes us human but it has produced accounts that exclude some members of our species It relies often on non naturalistic philosophies of consciousness that locate humanity in the cognitive capacity to objectively represent things to reason teleologically and use tools to use symbols and language or to be self conscious and question existence This work pursues an alternative thoroughly naturalistic philosophical anthropology by combining Arnold Gehlen s theory of our behaviorally detached and institutionally structured impulses with Maurice Merleau Ponty s views on intersubjectivity affect sexuality and social institutions It locates the human within the unique structure of our capacity for feeling which produces an inclusive account of the human as the other or Homo alter Humans are deeply and thoroughly dependent on affective bodily communicative bonds in which other humans appear as sources of pleasure communicative meaning institutional norms and interpersonal approbation and disapprobation However this socio biological account of the human denies that human nature alone can prescribe the necessary form of institutions such as the home which is a criticism of any potential political anthropology A result of this focus on our social and affective natures is a novel account of shame as a response to institutional and interpersonal exclusion Failing to recognize humanity within our dependency on others and the structure of feeling is a widespread problem in philosophy and society in general that contributes to the social and metaphysical exclusion of disabled persons who might lack certain forms of consciousness and cognition Reimagining philosophical anthropology as the study of the unique way that human beings are socially present to one another this work challenges such dehumanization

Pharmacracry Thomas Szasz, 2003-09-01 The modern penchant for transforming human problems into diseases and judicial sanctions into treatments replacing the rule of law with the rule of medical discretion leads to a type of government social critic Thomas Szasz calls pharmacracry He warns that the creeping substitution of democracy for pharmacracry private personal concerns increasingly perceived as requiring a medical political response inexorably erodes personal freedom and dignity **Freudians and Schadenfreudians** Jeffrey Berman, 2024-08-22 Sigmund Freud can be a polarizing figure beloved by many and despised by some Focusing on eight key writers and scholars who either passionately loved or gleefully loathed Freud this book represents Freud s wide legacy the reach of his ideas their controversies and their ability still to provoke inspire confound outrage and compel The book begins by focusing on four highly prolific authors whose admiration for Freud

is boundless Lionel Trilling Harold Bloom Kurt R Eissler and Peter Gay Berman then explores four more writers whose aim was not simply to debunk Freud and destroy his monstrous creation but to cast both into hell D H Lawrence Vladimir Nabokov Thomas Szasz and Frederick Crews Each chapter discusses the author's involvement with Freud exploring the continuities and discontinuities of his or her writings as well as offering snapshots of the writers suggesting how their personal and professional lives were inextricably related Berman draws out some surprising commonalities between the Freudolaters and Schadenfreudians going on to discuss the current state of psychoanalysis and the psychoanalytic credos by which contemporary analysts live

Faith in Freedom Thomas Szasz, 2017-07-12 The libertarian philosophy of freedom is characterized by two fundamental beliefs the right to be left alone and the duty to leave others alone Psychiatric practice routinely violates both of these beliefs It is based on the notion that self ownership exemplified by suicide is a not an inherent right but a privilege subject to the review of psychiatrists as representatives of society In *Faith in Freedom* Thomas Szasz raises fundamental questions about psychiatric practices that inhibit an individual's right to freedom His questions are fundamental Is suicide an exercise of rightful self ownership or a manifestation of mental disorder Does involuntary confinement under psychiatric auspices constitute unjust imprisonment or is it therapeutically justified hospitalization Should forced psychiatric drugging be interpreted as assault and battery on the person or is it medical treatment The ethical standards of psychiatric practice mandate that psychiatrists employ coercion Forgoing such intervention is considered a dereliction of the psychiatrists duty to protect How should friends of freedom especially libertarians deal with the conflict between elementary libertarian principles and prevailing psychiatric practices In *Faith in Freedom* Thomas Szasz addresses this question more directly and more profoundly than in any of his previous works

Anatomy of Masochism June Rathbone, 2012-12-06 Are dominance and submission inevitable in human relationships Believing that sadomasochism is becoming an ever more obtrusive phenomenon in developed countries the author surveyed 48 self declared sadomasochists 43 male 5 female and 35 controls 26 male 9 female in an effort to elicit information on early family relationships morale and sexual behavior and fantasy she also looks at the philosophy of masochism and its damaging effects

Human Behavior, 1976

Pain, 1990

Caring about Health Stan van Hooft, 2006 Presenting a philosophical exploration of the ideas central to health care practice this book explores such concepts as caring health disease suffering and pain from a phenomenological perspective The book draws out the ethical demands that arise when one encounters these phenomena and the forms of ethical education that help health care workers respond to those demands

Coercion as Cure Frank Villafana, 2017-07-12 Understanding the history of psychiatry requires an accurate view of its function and purpose In this provocative new study Szasz challenges conventional beliefs about psychiatry He asserts that in fact psychiatrists are not concerned with the diagnosis and treatment of bona fide illnesses Psychiatric tradition social expectation and the law make it clear that coercion is the profession's determining characteristic Psychiatrists may diagnose or treat people without their consent or even

against their clearly expressed wishes and these involuntary psychiatric interventions are as different as are sexual relations between consenting adults and the sexual violence we call rape But the point is not merely the difference between coerced and consensual psychiatry but to contrast them The term psychiatry ought to be applied to one or the other but not both As long as psychiatrists and society refuse to recognize this there can be no real psychiatric historiography The coercive character of psychiatry was more apparent in the past than it is now Then insanity was synonymous with unfitness for liberty Toward the end of the nineteenth century a new type of psychiatric relationship developed when people experiencing so called nervous symptoms sought help This led to a distinction between two kinds of mental diseases neuroses and psychoses Persons who complained about their own behavior were classified as neurotic whereas persons about whose behavior others complained were classified as psychotic The legal medical psychiatric and social denial of this simple distinction and its far reaching implications undergirds the house of cards that is modern psychiatry Coercion as Cure is the most important book by Szasz since his landmark *The Myth of Mental Illness* *Catalog of Copyright Entries.
