George,P.G.

Jung,2015-09-18 The mainstream approach to the understanding of pain continues to be governed by the biomedical paradigm and the dualistic Cartesian ontology This Volume brings together essays of scholars of literature philosophy and history on the many enigmatic shades of pain experience mostly from an anti Cartesian perspective of cultural ontology by scholars of literature philosophy and history A section of the essays is devoted to the socio political dimensions of pain in the Indian context The book offers a critical perspective on the reductive conceptions of pain and argue that non substance ontology or cultural ontology supports a more humane and authentic understanding of pain The general ontological features

of the self in pain and culturally imbued dimensions of pain experience are thus brought together in a rare blend in this Volume The essays dwell on the importance of understanding what cultural social and political forces outside our control do to our pain experience They show why such understanding is necessary both to humanely deal with pain and to rectify erroneous approaches to pain experience They also explore the thoroughly ambivalent spaces between pain and pleasure and the cathartic and productive dimensions of pain The essays in this Volume investigate pain experiences through the fresh lenses of history gender ethics politics death illness self loss torture shame dispossession and denial

Treatment of Cancer Fifth Edition Pat Price, Karol Sikora, Tim Illidge, 2008-05-30 Since the first edition was published in 1982 *Treatment of Cancer* has become a standard text for postgraduate physicians in the UK and beyond providing all information necessary for modern cancer management in one comprehensive but accessible volume. By inviting experts from a number of disciplines to share their knowledge the editors have succeeded in delivering a truly integrated approach to the care of the patient with cancer. This fifth edition adopts the successful structure of previous editions whilst being thoroughly revised and updated and with several completely new chapters covering important topics such as drug development, cancer prevention and economics of cancer care as well as treatments such as radioimmunotherapy, biological therapies and antibody therapy. Part One considers the scientific basis and fundamental principles underlying cancer treatment and examines the likely developments that will occur over the next decade at the leading edge of oncology. Part Two is divided into two sections: the first covering general issues of cancer management including planning techniques, concomitant chemoradiotherapy, surgical oncology and palliative care; and the second using a system-based approach to cover the clinical aspects and management plans for the whole spectrum of malignant disease. *Treatment of Cancer* surpasses other oncology texts in condensing the essential information for exemplary cancer care into one readable and accessible guide and will be an invaluable addition to the bookshelves of the busy oncologist in training or in practice.
