**Pain as Human Experience** Mary-Jo DelVecchio Good, Paul Brodwin, Byron J. Good, 1994-11-14 With case studies drawn from anthropological investigations of chronic pain sufferers and pain clinics in the northeastern United States the authors attempt to invent new ways of writing about this language resistant human experience Focused on substantive issues in the study of chronic pain their work explores the great divide between the culturally shaped language of suffering and the traditional language of medical and psychological theorizing They argue that the representation of experience in local social worlds is a central challenge to the human sciences and to ethnographic writing and that meeting that challenge is also crucial to the refiguring of pain in medical discourse and health policy debates Anthropologists scholars from the medical social sciences and humanities and many general readers will be interested in *Pain as Human Experience* In addition behavioral medicine and pain specialists psychiatrists and primary care practitioners will find much that is relevant to their work in this book Jacket

**Pain as Human Experience** Good/Brodwin, 1994 Chronic pain challenges the central tenet of biomedicine that objective knowledge of the human body and mind is possible apart from subjective experience and social context Sufferers finding that chronic pain alters every aspect of life often become frustrated and distrust a profession seemingly unable to explain or effectively treat their illness The authors of this innovative volume offer an entirely different ethnographic approach searching out more effective ways to describe and analyze the human context of pain How can we analyze a mode of experience that appears to the pain sufferer as an unmediated fact of the body and is yet so resistant to language With case studies drawn from anthropological investigations of chronic pain sufferers and pain clinics in the northeastern United States the authors explore the great divide between the culturally shaped language of suffering and the traditional language of medical and psychological theorizing They argue that the representation of experience in local social worlds is a central challenge to the human sciences and to ethnographic writing and that meeting that challenge is also crucial to the refiguring of pain in medical discourse and health policy debates Anthropologists scholars from the medical social sciences and humanities and many general readers will be interested in *Pain as Human Experience* In addition behavioral medicine and pain specialists psychiatrists and primary care practitioners will find much that is relevant to their work in this book *Pain as Human Experience*, 1992

**Cultural Ontology of the Self in Pain** Siby K. George, P.G. Jung, 2015-09-18 The mainstream approach to the understanding of pain continues to be governed by the biomedical paradigm and the dualistic Cartesian ontology This Volume brings together essays of scholars of literature philosophy and history on the many enigmatic shades of pain experience mostly from an anti Cartesian perspective of cultural ontology by scholars of literature philosophy and history A section of the essays is devoted to the socio political dimensions of pain in the Indian context The book offers a critical perspective on the reductive conceptions of pain and argue that non substance ontology or cultural ontology supports a more humane and authentic understanding of pain The general ontological features

of the self in pain and culturally imbued dimensions of pain experience are thus brought together in a rare blend in this Volume The essays dwell on the importance of understanding what cultural social and political forces outside our control do to our pain experience They show why such understanding is necessary both to humanely deal with pain and to rectify erroneous approaches to pain experience They also explore the thoroughly ambivalent spaces between pain and pleasure and the cathartic and productive dimensions of pain The essays in this Volume investigate pain experiences through the fresh lenses of history gender ethics politics death illness self loss torture shame dispossession and denial **Pre-reflective**

**Consciousness** Sofia Miguens, Gerhard Preyer, Clara Morando, 2015-10-16 Pre reflective Consciousness Sartre and Contemporary Philosophy of Mind delves into the relationship between the current analytical debates on consciousness and the debates that took place within continental philosophy in the twentieth century and in particular around the time of Sartre and within his seminal works Examining the return of the problem of subjectivity in philosophy of mind and the idea that phenomenal consciousness could not be reduced to functional or cognitive properties this volume includes twenty two unique contributions from leading scholars in the field Asking questions such as Why we should think that self consciousness is non reflective Is subjectivity first personal Does consciousness necessitate self awareness Do we need pre reflective self consciousness Are ego disorders in psychosis a dysfunction of pre reflective self awareness How does the Cartesian duality between body and mind fit into Sartre s conceptions of consciousness **Suffering** Iain Wilkinson, 2005 Providing a clear and thoughtful discussion of human suffering Ian Wilkinson explores some of the ways in which research into social suffering might lead us to reinterpret the meaning of modern history as well as revise our outlook upon the possible futures that await us *Pain: Management, Expression, Interpretation*, 2020-05-06 **The Handbook of Social Studies in Health and**

**Readings in General Psychology** Edward Stevens Robinson,Florence Richardson-Robinson,1929 *Medicine, Rationality and Experience* Byron J. Good,1994 Biomedicine is often thought to provide a scientific account of the human body and of illness In this view non Western and folk medical systems are regarded as systems of belief and subtly discounted This is an impoverished perspective for understanding illness and healing across cultures one that neglects many facets of Western medical practice and obscures its kinship with healing in other traditions Drawing on his research in several American and Middle Eastern medical settings in this 1993 book Professor Good develops a critical anthropological account of medical knowledge and practice He shows how physicians and healers enter and inhabit distinctive worlds of meaning and experience He explores how stories or illness narratives are joined with bodily experience in shaping and responding to human suffering and argues that moral and aesthetic considerations are present in routine medical practice as in other forms of healing

The Collected Works of Edward Schillebeeckx Volume 4 Edward Schillebeeckx,2014-09-25 World and Church deals with the conflict between religiosity and life in the world Deliberately Schillebeeckx turns around the order of the words in the idiom church and world thereby stressing the embedding of faith and church life in particular contexts In the first three chapters he reflects on this tension as he experienced it in burgeoning existentialism and debates between Catholics and Marxists in those turbulent years in Paris where he was living immediately after World War II It includes thoughts on pastoral work among the working class and the then popular pretres ouvriers movement He looks at some social

problems and the mutual interrogation of believers and non believers also in light of the ideological compartmentalisation pillarization evident in diverse spheres of European society education social work and health care Schillebeeckx concludes by considering the responsibility of Catholic intellectuals and academics for the future of the world and the church including the possible significance of a Catholic university

**Rival Truths** Lindsay St Claire, 2018-10-24 It is common sense that our survival as individuals depends on the survival of our physical bodies However common sense has been medicalised Terms such as road rage and premenstrual syndrome sound like medical problems and suggest that it is affected individuals rather than experiences or circumstances that require treatment Without denying their importance Rival Truths challenges four basic common sense views of health and illness and offers rival social psychological explanations The primacy of biological facts is challenged by looking at the effects of social psychological influences such as those mediated by stress The assumption that medical practices are scientific is challenged by evidence that they also reflect and recreate social constructions The assumption that medical advances are the most effective way to combat disease is questioned as their success may rely on changes in beliefs or behaviour and finally critical analyses suggest that medical treatment can sometimes be to the disadvantage of patients Lindsay St Claire has helped to raise awareness that health problems might be caused by social arrangements not biological dysfunction Thus social psychology might suggest new ways to enhance health status which do not depend on medical breakthroughs This book will be of interest for health psychology students medical students and anyone involved in caring professions
