Palaeoecology Of Quaternary Drylands:

Palaeoecology of Quaternary Drylands Werner Smykatz-Kloss, Peter Felix-Henningsen, 2014-03-12 The twelve contributions in this volume represent the results of a ten year interdisciplinary workshop on desert margins concerned with the geomorphological geochemical mineralogical sedimentological soil scientific characterisation of semi deserts in Spain Africa Arabia and China Desert sediments and soils as well as processes and characteristics of their formation are regarded from different geoscientific perspectives The subjects of research include the development of desert soils and landscapes the formation of alluvial loess swamp ores fulgurites and floodout sediments and focus on the reconstruction of palaeoecological events and changes A critical study of dating methods rounds off the book Palaeoecology of Quaternary Drylands Werner Smykatz-Kloss, 2004-02-20 The twelve contributions in this volume represent the results of a ten year interdisciplinary workshop on desert margins concerned with the geomorphological geochemical mineralogical sedimentological soil scientific characterisation of semi deserts in Spain Africa Arabia and China Desert sediments and soils as well as processes and characteristics of their formation are regarded from different geoscientific perspectives The subjects of research include the development of desert soils and landscapes the formation of alluvial loess swamp ores fulgurites and floodout sediments and focus on the reconstruction of palaeoecological events and changes A critical study of dating methods rounds off the book

Gobero Elena A. A. Garcea, 2013 The Sahara Sahel borderland occupies a critical geographical position due to its recurrent latitudinal shifts continually having a strong impact on humans animals and plants Gobero is located at the southern limits of the present Sahara in Niger The archaeological record at this site encompasses the re occupation of the Sahara ca 10 000 years ago until approximately 2000 years ago During this long period Gobero witnessed significant fluctuations in climate and water resource availability that resulted in cycles of human occupation abandonment and re occupation around a natural basin occupied by a palaeolake until desertification became an irreversible process and the area turned into a no return frontier for its occupants This book presents the archaeological anthropological and environmental data collected during the 2005 and 2006 field seasons at Gobero Various factors highlight the extraordinary significance of this site Thanks to its geographical position straddling the ancient shifting borders of the Sahara and the Sahel the Gobero archaeological record reveals critical population movements in this part of Africa and different economic and technological strategies its inhabitants employed to adapt to changing environmental conditions The presence of both settlement and burial features at Gobero gives a comprehensive view of the cultural social economic and funerary traditions of the people who lived and died at this site during almost the entire Holocene The results from these archaeological investigations provide a term of reference for future research and interpretations of past human occupations in the Sahara as well as North and West Africa **Climate Change in Deserts** Martin Williams, 2014-08-11 Reconstructing climatic changes in deserts and their margins at a variety of scales in space and time this book draws upon evidence from land and sea including desert

dunes wind blown dust river and lake sediments glacial moraines plant and animal fossils isotope geochemistry speleothems soils and prehistoric archaeology The book summarises the Cenozoic evolution of the major deserts of the Americas Eurasia Africa and Australia and the causes of historic floods and droughts The book then considers the causes and consequences of desertification and proposes four key conditions for achieving ecologically sustainable use of natural resources in arid and semi arid areas Climate Change in Deserts is an invaluable reference for researchers and advanced students interested in the climate and geomorphology of deserts geographers geologists ecologists archaeologists soil scientists hydrologists climatologists and natural resource managers **Methods in Paleoecology** Darin A. Croft, Denise F. Su, Scott W.

Simpson, 2018-10-27 This volume focuses on the reconstruction of past ecosystems and provides a comprehensive review of current techniques and their application in exemplar studies The 18 chapters address a wide variety of topics that span vertebrate paleobiology and paleoecology body mass postcranial functional morphology evolutionary dental morphology microwear and mesowear ecomorphology mammal community structure analysis contextual paleoenvironmental studies paleosols and sedimentology ichnofossils pollen phytoliths plant macrofossils and special techniques bone microstructure biomineral isotopes inorganic isotopes 3 D morphometrics and ecometric modeling A final chapter discusses how to integrate results of these studies with taphonomic data in order to more accurately characterize an ancient ecosystem Current investigators advanced undergraduates and graduate students interested in the field of paleoecology will find this book immensely useful The length and structure of the volume also makes it suitable for teaching a college level course on reconstructing Cenozoic ecosystems **Holocene Palaeoenvironmental History of the Central Sahara** Roland

Baumhauer, Jürgen Runge, 2009-02-27 The environmental setting within the Central Sahara was subject to considerable changes during Late Quaternary mainly driven by major global climate variations although human impact increased constantly since Early Holocene Such global events can be reconstructed with the help of reliefs sediments and palaeosoils and their specific morphological chemical and mineralogical properties The project's focus is to ascertain new and established data on climate variations and associated palaeoenvironmental changes within the Central Sahara and to systematically collate and correlate them to results obtained from the Afro Asian dry land belt and adjacent areas The joint analysis of Late Quaternary landscape development and present environmental conditions in the Central Sahara will result in the modelling of Late Pleistocene and Holocene palaeoenvironments emphasising various aspects This book will be of interest to all concerned with environmental changes in desert ecosystems in the past and at present and related development problems of Saharan countries especially Ecologists Botanists Earth scientists and Climatologists It will be valuable for advanced undergraduates and postgraduates as a reference for review and overview articles as well as a source of information for new original manuscripts on the topic of Late Pleistocene and Holocene landscape evolution in the lower latitudes of Africa Palaeobotanists Palynologists Geomorphologists and Quaternarists will equally find this edition useful for

their work **Dryland Ecohydrology** Paolo D'Odorico, Amilcare Porporato, 2006-01-09 Ecohydrology emerges as a new field of research aiming at furthering our understanding of the earth system through the study of the interactions between the water cycle and vegetation By combining the analysis of biotic and abiotic components of terrestrial ecosystems this volume provides a synthesis of material on arid and semiarid landscapes which is currently spread in a number of books and journal articles The focus on water limited ecosystems is motivated by their high sensitivity to daily seasonal and decadal perturbations in water availability and by the ecologic climatic and economic significance of most of the drylands around the world Conceived as a tool for scientists working in the area of the earth and environmental sciences this book presents the basic principles of eco hydrology as well as a broad spectrum of topics and advances in this research field The chapters collected in this book have been contributed by authors with different expertise who work in several arid areas around the World They describe the various interactions among the biological and physical dynamics in dryland ecosystems starting from basic processes in the soil vegetation climate system to landscape scale hydrologic and geomorphic processes ecohydrologic controls on soil nutrient dynamics and multiscale analyses of disturbances and patterns The Archaeology of Drylands Graeme Barker, David Gilbertson, 2003-09-02 Many dryland regions contain archaeological remains which suggest that there must have been intensive phases of settlement in what now seem to be dry and degraded environments This book discusses successes and failures of past land use and settlement in drylands and contributes to wider debates about desertification and the sustainability of dryland settlement **Dryland Climatology** Sharon E. Nicholson, 2011-10-27 A comprehensive review of dryland climates and their relationship to the physical environment hydrology and inhabitants Chapters are divided into five major sections on background meteorology and climatology the nature of dryland climates in relation to precipitation and hydrology the climatology and climate dynamics of the major dryland regions on each continent and life and change in the world s drylands It includes key topics such as vegetation geomorphology desertification micro habitats and adaptation to dryland environments This interdisciplinary volume provides an extensive review of the primary literature covering nearly 2000 references and the conventional and satellite datasets that form key research tools for dryland climatology Illustrated with over 300 author photographs it presents a unique view of dryland climates for a broad spectrum of researchers environmental professionals and advanced students in climatology meteorology geography environment science earth system science ecology hydrology and geomorphology Australian Landscapes P. Bishop, B. Pillans, Brad Pillans, 2010 Australian Landscapes provides an up to date statement on the geomorphology of Australia Karst desert bedrock rivers coasts submarine geomorphology biogeomorphology and tectonics are all covered aided by the latest geochronological techniques and remote sensing approaches The antiquity and enduring geomorphological stability of the Australian continent are emphasized in several chapters but the cutting edge techniques used to establish that stability also reveal much complexity including areas of considerable recent tectonic activity and a wide range of rates of landscape

change Links to the biological sphere are explored in relation both to the lengthy human presence on the continent and to a biota that resulted from Cenozoic aridification of the continent dated using new techniques New syntheses of glaciation in Tasmania aridification in South Australia and aeolian activity all focus on Quaternary landscape evolution **The Physical Geography of Mongolia** Batchuluun Yembuu, 2021-05-04 This book gives the most detailed and comprehensive physico geographical overview of the very unique country of Mongolia The country offers diverse geographical features and natural landscapes combined with a long history This book offers integrated and systematical research on the geophysical characteristics of Mongolia with an academic orientation It provides the readers with general knowledge of the physical geography of Mongolia as well as new results of the latest research The volume consists of 11 chapters each written by field experts with contributions from scientific researchers from Mongolia The topics covered geological and geomorphological characteristics and processes landscapes and landforms climate and climate change hydrology glaciers and permafrost soils environmental changes biodiversity and many other aspects of physical geography in Mongolia The book appeals to researchers and students of geography and related fields and can serve as a guide for field trips to Mongolia or basic literature for research projects **Studies on the Environmental Change and Human Activities in Semi-arid Area of**

Africa Kazuharu Mizuno, 2005 **Research in Deserts and Mountains of Africa and Central Asia** Frank Lehmkuhl, Detlef Busche, Bernd Wünnemann, 2002 **Arabian Deserts** H. Stewart Edgell, 2006-07-21 This is the first comprehensive survey of all the deserts of Arabia based largely on the author's 50 years of experience there The text deals with every kind of desert in the region from vast sand seas to clay pans and stony plains to volcanic flows Along with dune types unique to the region the author outlines climatic changes current ecology and human influence on desertification

Environmental Change in Drylands Andrew C. Millington, Kenneth Pye, 1994-06-30 Encompasses a wide ranging selection of peer reviewed papers covering geomorphology and biogeography including research which has sought to integrate the two disciplines The main division of articles has been made in terms of timescales of the studies in which the majority of evidence presented relates to environments before the last 1000 years **Arid Zone Geomorphology** David S. G. Thomas, 2011-02-08 The new edition of Arid Zone Geomorphology aims to encapsulate the advances that have been made in recent years in the investigation and explanation of landforms and geomorphological processes in drylands Building on the success of the previous two editions the Third Edition has been completely revised and updated to reflect the latest developments in the field Whilst this latest edition will remain a comprehensive reference to the subject the book has been restructured to include regional case studies throughout to enhance student understanding and is clearly defined into five distinct sections Firstly the book introduces the reader to Large Scale Controls and Variability in Drylands and then moves on to consider Surface Processes and Characteristics The Work of Water The Work of the Wind The book concludes with a section on Living with Dryland Geomorphology that includes a chapter on geomorphological hazards and the human impact

on these environments Once again recognised world experts in the field have been invited to contribute chapters in order to present a comprehensive and up to date overview of current knowledge about the processes shaping the landscape of deserts and arid regions In order to broaden the appeal of the Third Edition the book has been reduced in extent by 100 pages and the Regional chapters have been omitted in favour of the inclusion of key regional case studies throughout the book The Editor is also considering the inclusion of a supplementary website that could include further images problems and case studies

Dryland Rivers L. J. Bull, M. J. Kirkby, 2002-03-22 Examines the processes operating in the headwaters and main channels of ephemeral rivers in semi arid environments and includes coverage of current fieldwork investigations modeling approaches and management issues focuses on dryland channel networks and processes presents a historical framework for research discusses examples of current studies and evaluates contemporary modelling approaches Emphasis is on the Mediterranean region with comparisons to other dryland regimes eg California Australia Chile

Zentralblatt für Geologie und Paläontologie ,2009

Aeolian Geomorphology Ian Livingstone, Andrew Warren, 2019-02-28 A revised introduction to aeolian geomorphology written by noted experts in the field The new revised and updated edition of Aeolian Geomorphology offers a concise and highly accessible introduction to the subject The text covers the topics of deserts and coastlines as well as periglacial and planetary landforms The authors review the range of aeolian characteristics that include soil erosion and its consequences continental scale dust storms sand dunes and loess Aeolian Geomorphology explores the importance of aeolian processes in the past and the application of knowledge about aeolian geomorphology in environmental management The new edition includes contributions from eighteen experts from four continents All the chapters demonstrate huge advances in observation measurement and mathematical modelling For example the chapter on sand seas shows the impact of greatly enhanced and accessible remote sensing and the chapter on active dunes clearly demonstrates the impact of improvements in field techniques Other examples reveal the power of greatly improved laboratory techniques This important text Offers a comprehensive review of aeolian geomorphology Contains contributions from an international panel of eighteen experts in the field Includes the results of the most recent research on the topic Filled with illustrative examples that demonstrate the advances in laboratory approaches Written for students and professionals in the field Aeolian Geomorphology provides a comprehensive introduction to the topic in twelve new chapters with contributions from noted experts in the field
