## **Paleoecology Of Volcanic Soils In The Co:**

*Paleoecology of Easter Island: Natural and Anthropogenic Drivers of Ecological Change* Valentí Rull, Santiago Giralt, 2018-09-04 After more than three decades of paleoecological research the potential role of climatic and anthropogenic drivers on Easter Island's ecological and cultural change is still under discussion This eBook aims to provide a synthetic view of the topic using evidence from different research fields such as paleoecology archaeology history and molecular phylogenetics A holistic approach is provided to combine the results of these research fields into a comprehensive framework able to account for most of the available multidisciplinary evidence This eBook is dedicated to the memory of John R Flenley the pioneer of paleoecological study of Easter Island who passed away on June 22 2018      **Early Hominin Paleoecology** Matt Sponheimer, Julia A. Lee-Thorp, Kaye E. Reed, Peter Ungar, 2013-05-15 An introduction to the multidisciplinary field of hominin paleoecology for advanced undergraduate students and beginning graduate students Early Hominin Paleoecology offers an up to date review of the relevant literature exploring new research and synthesizing old and new ideas Recent advances in the field and the laboratory are not only improving our understanding of human evolution but are also transforming it Given the increasing specialization of the individual fields of study in hominin paleontology communicating research results and data is difficult especially to a broad audience of graduate students advanced undergraduates and the interested public Early Hominin Paleoecology provides a good working knowledge of the subject while also presenting a solid grounding in the sundry ways this knowledge has been constructed The book is divided into three sections climate and environment with a particular focus on the latter adaptation and behavior and modern analogs and models and features contributors from various fields of study including archaeology primatology paleoclimatology sedimentology and geochemistry Early Hominin Paleoecology is an accessible introduction into this fascinating and ever evolving field and will be essential to any student interested in pursuing research in human paleoecology Additional Contributors David Braun Beth Christensen David J Daegling Crag Feibel Fred E Grine Clifford Jolly Naomi E Levin Mark A Maslin John Mitani Jay Quade Amy L Rector Jeanne Sept Lillian M Spencer Mark Teaforde Carol V Ward Katy E Wilson      **Volcanic Hazards** Robert I. Tilling, 1989      **Paleoclimate and Evolution, with Emphasis on Human Origins** Elisabeth S. Vrba, George H. Denton, Timothy C. Partridge, Lloyd H. Burckle, 1995-01-01 Addressing the relationship between climatic and biotic evolution this work focuses on how climatic change during the last 15 million years especially the last three million has affected human evolution and other evolutionary events      **Orbital Forcing and Cyclic Sequences** P. L. DeBoer, D. G. Smith, 2009-04-08 Classically orbital cycles have been recognized in pelagic and lacustrine sequences characterized by quiet sedimentation not disturbed by tectonics However there is now increasing recognition that orbital cycles do influence climate and oceanography in general terms There is also increasing acceptance of the possibility at least that the effect should be felt over large parts of the Earth's surface and that orbital cycles may well leave signs in other sedimentary environments that

are commonly considered to be dominated by tectonics and eustasy. Containing thirty one papers from a symposium held at the International Sedimentological Congress in Nottingham in 1990, this volume spans a range of topics from the astronomical theory behind orbital forcing to field studies dealing with a broad range of sedimentary environments and to modelling and simulation. State of the art research papers. International expert authorship. The latest research in the highly topical subject of orbital forcing.

**Das Quartär in den Tropen** Klaus Heine, 2019-04-03 Das Eiszeitalter. Quartär ist eine Zeit extremer Klimaschwankungen, die zum Anwachsen und Abschmelzen gewaltiger Eisschilde in den hohen Breiten führten. Die tropischen Wälder, Savannen, Regenwälder und Gebirgsregionen erlebten gleichermaßen dramatische Klimaänderungen, deren Spuren in sedimentären Ablagerungen erhalten geblieben sind. Die Kenntnis der tropischen Klimageschichte ist von großer Bedeutung, da in den Tropen und Randtropen natürliche und neuerdings vom Menschen ausgelöste Prozesse das weltweite Klima maßgeblich steuern. Dennoch sind aus diesen Regionen nur relativ wenige Paläoklimadaten bekannt. Dieses Buch stellt die Klimaarchive der Tropen vor und diskutiert kritisch deren paläoklimatischen Aussagewert. Mit seiner holistischen Sicht auf der Basis von jahrzehntelangen eigenen Forschungen zeigt der Autor auf, dass mangelnde geokologische Kenntnisse der Tropenwelt zu Fehldeutungen in den Modellierungen der Klimazukunft führen können. Die hier präsentierten Ergebnisse fordern eine Korrektur vieler weit verbreiteter Ansichten über die Bedeutung der atmosphärischen Treibhausgase für die globale Erwärmung der letzten 150 Jahre.

**Paleontology and Geology of Laetoli: Human Evolution in Context** Terry Harrison, 2011-01-19 This volume 1 and its companion volume 2 present the results of new investigations into the geology, paleontology and paleoecology of the early hominin site of Laetoli in northern Tanzania. The site is one of the most important paleontological and paleoanthropological sites in Africa, world-renowned for the discovery of fossils of the early hominin *Australopithecus afarensis* as well as remarkable trails of its footprints. The first volume provides new evidence on the geology, geochronology, ecology, ecomorphology and taphonomy of the site. The second volume describes newly discovered fossil hominins from Laetoli belonging to *Australopithecus afarensis* and *Paranthropus aethiopicus* and presents detailed information on the systematics and paleobiology of the diverse associated fauna. Together, these contributions provide one of the most comprehensive accounts of a fossil hominin site and they offer important new insights into the early stages of human evolution and its context.
