Pathobiology Of The Human Atherosclerotic Plaque:

Pathobiology of the Human Atherosclerotic Plaque Seymour Glagov, William P., III Newman, Sheldon A. Schaffer, 2012-12-06 Seymour Glagov The last meeting devoted exclusively to an examination of the atherosclerotic plaque took place in Chicago 25 years ago under the joint auspices of the Council on Arteriosclerosis of the American Heart Association and the Chicago Heart Association The proceedings were published subsequently in a volume entitled Evolution of the Atherosclerotic Plaque edited by Richard J Jones 1 Both experimental and human lesions were considered and several provocative new approaches to the disorder were discussed The electron microscope was being applied systematically to the study of blood vessels at that time so that details of the infrastructure and cellular composition of the artery wall and of atherosclerotic lesions were presented in some detail There was as one result of these explorations considerable discussion of morphologic evidence suggesting that the principal cell involved in the atherogenic process was neither the fibroblast nor the macrophage as had been supposed but the smooth muscle cell In particular the findings indicated that this cell could incorporate lipid and become a foam cell *Pathobiology of the Human Atherosclerotic Plaque* Seymour Glagov, 1990

Pathobiology of Human Disease, 2014-08-01 Pathobiology of Human Disease bridges traditional morphologic and clinical pathology molecular pathology and the underlying basic science fields of cell biology genetics and molecular biology which have opened up a new era of research in pathology and underlie the molecular basis of human disease The work spans more than 48 different biological and medical fields in five basic sections Human Organ Systems Molecular Pathology Basic Mechanisms of Diseases Animal Models Other Model Systems Experimental Pathology Clinical Pathology Each article provides a comprehensive overview of the selected topic to inform a broad spectrum of readers from research professionals to advanced undergraduate students Reviews quantitative advances in the imaging and molecular analysis of human tissue new microarray technologies for analysis of genetic and chromosomal alterations in normal and diseased cells and tissues and new transgenic models of human disease using conditional tissue specific gene targeting Articles link through to relevant virtual microscopy slides illustrating side by side presentation of Normal and Disease anatomy and histology images Fully annotated with many supplementary full color images graphs tables and video files linked to data sets and to live references enabling researchers to delve deeper and visualize solutions *Pathophysiology and Treatment of Atherosclerotic Disease in Peripheral Arteries* Alope Virmani Finn, 2024-06-12 Pathophysiology and Treatment of Atherosclerotic Disease in Peripheral Arteries is a thorough review of the disease written by experts studying its detection and treatment These state of the art chapters summarize in a comprehensive manner emerging knowledge about this important area of medicine The pathophysiology and treatment of peripheral artery PAD disease remains poorly understood even by practitioners Often it is assumed that PAD should be treated in a similar fashion to coronary artery disease CAD when in fact recent data suggest a distinct pathophysiology with genetic risk having some but not complete overlap with CAD This is a novel reference of

emerging data on the factors behind its development and progression detection and treatment suggest an emerging paradigm for this disease Provides understanding for the pathophysiology of PAD from pathologic and molecular perspectives Reviews state of the art modalities for its detection as well as the data surrounding new medical and interventional treatment for PAD Elucidates the impact of new treatment modalities such as drug coated balloons and atherectomy devices such a lithotripsy

Modern Surgical Care Thomas A. Miller,2006-08-15 Completely updated with contributions by world leaders in surgery and the surgery specialties this reference assists surgeons in the diagnosis and treatment of patients by considering disease as a derangement of normal physiology thus allowing the surgeon to correlate the appropriate use of laboratory and radiologic modalities Arranged according to specific organ systems the book is easily accessible and reflects the impact that scientific discoveries and technical advances have had on our understanding of the physiologic processes in surgical patients

The Immunology of Cardiovascular Homeostasis and Pathology Susanne Sattler,Teresa Kennedy-Lydon,2017-06-30 Cardiovascular immunology is a newly emerging research area investigating the crosstalk between the cardiovascular and the immune system This crosstalk is evident through 1 crucial immunological capacities and functions of cardiovascular cell types including cardiomyocytes fibroblasts endothelial cells pericytes and cardiac resident macrophages 2 the impact of aberrant immune function on the development of cardiovascular disease such as atherosclerosis direct and indirect immune mediated heart disease and vasculitis and 3 the crucial role of the immune system in cardiac repair and regeneration The Immunology of Cardiovascular Homeostasis and Pathology covers all these aspects of cardiovascular immunology starting with homeostatic immunological functions of traditional cardiovascular cell types and moving then to the role of the immune system in cardiovascular pathology and to recent research into targeting the immune system to boost cardiac healing and regeneration

Revolutions in Human Biospecimen Study: Leveraging new technologies to explore the pathology, therapeutics and biomarkers for atherosclerotic disease Ying Wang,Michal Mokry,Kathryn L. Howe,2023-11-20 Over the last few years new high throughput biotechnologies are revolutionizing our ways to utilize human biospecimens for understanding atherosclerotic disease These recent advances allow deep profiling of individual cells at the genomics epigenomics transcriptomics and proteomics levels or even simultaneous detection of various combinations of Omics in the same cell Additionally novel methods to integrate data at different levels from tissue sections and dissociated tissues are the emerging trends in large and institutional biobank studies Growing literature has shown the value of such sequencing and bioinformatic strategies in shedding light on 1 how risk genes as identified by the Genome Wide Association Study contribute to atherogenesis genotype to phenotype and 2 how features of atherosclerotic lesions affect patient response in clinical trials phenotype to the clinical outcome The hybrid of cutting edge biotechnologies and bioinformatic approaches helps us maximize biobank resources to accelerate bench to bedside research
