Pathways Out of Poverty Gary S. Fields, Guy Pierre Pfeffermann, 2003-09-30 Identifies the ways in which private firms and farms contribute to economic mobility and poverty reduction and what governments can do to enhance this contribution

Pathways Out of Poverty Gary S. Fields, 2013-12-01 Until recently development economists tended to assume a role for private enterprises in reducing poverty without articulating it explicitly How private firms contribute to economic mobility and poverty reduction and what governments can do to enhance their contribution is the theme of this book In developing countries private enterprise is far and away the largest source of employment and investment and a significant source of government revenue In addition to these tangible contributions private enterprise is an important source of less tangible but critically important factors such as openness to ideas innovation and opportunity The book presents new evidence which demonstrates the essential role which private firms are playing in the course of economic development Throughout the focus is on economic mobility Regional case studies ranging from the Far East to Sub Saharan Africa hone in on the role of entrepreneurship in development Drawing on the rich materials of the World Bank's Worldwide Business Environment Survey key policy factors are identified Special attention is paid to obstacles facing small and medium sized enterprises The concluding chapters focus on practical ways in which governments of developing and transition countries can encourage the capacity of poor people to move up the economic ladder

Halsey Rogers,Jean-Jacques Dethier,2006-08-11 Despite significant gains in promoting economic growth and living conditions or human progress globally over the last twenty five years much of the developing world remains plagued by poverty and its attendant problems including high rates of child mortality illiteracy environmental degradation and war In Growth and Empowerment Nicholas Stern Jean Jacques Dethier and F Halsey Rogers propose a new strategy for development Drawing on many years of work in development economics in academia in the field and at international institutions such as the World Bank the authors base their strategy on two interrelated approaches building a climate that encourages investment and growth and at the same time empowering poor people to participate in that growth This plan differs from other models for development including the dogmatic approach of market fundamentalism popular in the 1980s and 1990s Stern Dethier and Rogers see economic development as a dynamic process of continuous change in which entrepreneurship innovation flexibility and mobility are crucial components and the idea of empowerment as both a goal and a driver of development is central The book points to the unique opportunity today after 50 years of successes and failures and with a growing body of analytical work to draw on to pursue new development strategies in both research and action **International Labour**
