Our Common Journey National Research Council, Policy and Global Affairs, Policy Division, Board on Sustainable Development, 1999-11-09 World human population is expected to reach upwards of 9 billion by 2050 and then level off over the next half century How can the transition to a stabilizing population also be a transition to sustainability How can science and technology help to ensure that human needs are met while the planet's environment is nurtured and restored Our Common Journey examines these momentous questions to draw strategic connections between scientific research technological development and societies efforts to achieve environmentally sustainable improvements in human well being The book argues that societies should approach sustainable development not as a destination but as an ongoing adaptive learning process Speaking to the next two generations it proposes a strategy for using scientific and technical knowledge to better inform future action in the areas of fertility reduction urban systems agricultural production energy and materials use ecosystem restoration and biodiversity conservation and suggests an approach for building a new research agenda for sustainability science Our Common Journey documents large scale historical currents of social and environmental change and reviews methods for what if analysis of possible future development pathways and their implications for sustainability The book also identifies the greatest threats to sustainability in areas such as human settlements agriculture industry and energy and explores the most promising opportunities for circumventing or mitigating these threats It goes on to discuss what indicators of change from children's birth weights to atmosphere chemistry will be most useful in monitoring a transition to sustainability *Sustainability for the 21st Century* David Pijawka, Bjoern Hagen, 2018-06 **Pathways to Sustainability** Melissa Leach, STEPS Centre, 2007 **Pathways to Sustainability** Melissa Leach, Ian Scoones, Andy Stirling, STEPS Centre, 2007 **Pathways to Sustainability** Timothy L. Killeen, Donald J. Wuebbles, Jason E. Lane, 2025-07-08 Global sustainability is impacted by several major issues including climate change resource depletion biodiversity loss and pollution Climate change results in extreme weather events while overreliance on fossil fuels and water scarcity depletes essential resources Biodiversity loss stems from habitat destruction and species extinction Pollution encompassing air water and soil contamination further degrades the environment Rapid population growth and urbanization increase pressure on resources and infrastructure while social inequities and economic disparities exacerbate these challenges Unsustainable consumption and production coupled with weak governance and policy hinder sustainability efforts Technological and infrastructural challenges and cultural and behavioral barriers impede progress Addressing these issues requires a comprehensive approach that integrates environmental social and economic dimensions fostering innovation collaboration and equitable practices This edited volume addresses the pressing sustainability and environmental challenges our planet and society face today It is intended to comprehensively explore how we can move beyond merely discussing these issues to finding and implementing informed solutions It aims to inform the creation of a sustainable future for all of us both

locally and globally by focusing on cross sector engagement human capacity building co design networking and innovation The primary objective of the volume is to propose practical pathways to solutions and their implementation highlighting the progress and innovations being developed worldwide This book will explore how research and innovation are applied to understand mitigate and adapt to the significant environmental stresses we face It will showcase the latest in sustainability science and foster new collaborations expanding networks and connecting with new markets **Thriving Beyond**

Sustainability Andrés R. Edwards,2010 Features a collection of individuals organisations and communities from around the world that are committed to building an alternative future one that strives to restore ecological health reinvent outmoded institutions and rejuvenate our environmental social and economic systems Pub desc **Pathways to Sustainability**

Kathryn M. Cholette,2006 The goal of my study is to augment the ideas that are associated with sustainability A particular aim is to link flourishing humanity and flourishing nature together in this concept To achieve this I discuss some beliefs values and institutions that appear to hinder and some that appear capable of facilitating a shift towards ecological sustainability based on human well being Key to this discussion is the concept of dematerialization or the process of adjusting the economy and way of life to the shrinking access to natural resources dematerialization demonstrates the need to challenge many of the fundamental aspects of the dominant capitalist approach to our economy on social and environmental grounds Ultimately these explorations lead to the final conclusion for this study that rather than market mechanisms planning based on research analysis and policy is the most effective organizing method for achieving ecological sustainability
