engaging the patient Finally multilevel interventions are formulated for these disorders The plan begins with clinician guided self care recommendations to re establish the normal rhythm of appetite and satiety The next level of interventions consists of skill building techniques such as relaxation and imagery Lastly psychotherapy and advanced applied psychophysiological interventions are detailed Case examples are used throughout to illustrate the pathways to illness the turning points and the pathways to health From the patients viewpoints the pathways metaphor is a motivator The patient is guided to understand the paths that led to illness Subsequently the patient becomes empowered by the pathways framework to begin to make choices that lead to health
