Patient Outcomes Research Teams Ports Managing Conflict Of Interest:

Patient Outcomes Research Teams (PORTS) Institute of Medicine, Committee on Potential Conflicts of Interest in Patient Outcomes Research Teams, 1991-02-01 The new Agency for Health Care Policy and Research in the U S Public Health Service is funding a set of multidisciplinary groups called Patient Outcomes Research Teams PORTs Their purpose is to assess alternative treatments for medical conditions using a variety of outcome measures In guiding insurance coverage these PORTs are expected to wield considerable influence on medical practice and health policy This book addresses possible threats to their credibility that might be based on real or apparent conflicts of interest including both financial and other conflicts It raises points to consider for the new agency for PORTs and their institutions for industry for the health services research community and for the U S Congress in avoiding and managing conflicts of interest **New and Forthcoming**

Books National Academy Press (U.S.), 1992 Translational Informatics Philip R.O. Payne, Peter J. Embi, 2014-08-23 Integrative and translational methodologies and frameworks have transformed modern biomedical research and the delivery of clinical care This shift has been manifested in a number of ways including the rapid growth and increasing availability of high throughput bio molecular instrumentation and analysis platforms innovative clinical research programs intended to accelerate knowledge translation and initial efforts to deliver personalized healthcare informed by the genomic profiles of patients A common theme of reports and publications concerned with such transformative changes in the biomedical and healthcare domains is concerned with the challenges and opportunities related to the collection management integration analysis and dissemination of large scale heterogeneous biomedical data sets In particular the absence of well established and adopted theoretical and practical frameworks intended to address such needs is a major impediment to the realization of translational and knowledge driven healthcare in which the best possible scientific evidence is used to inform the care of every patient In this vacuum the development of integrative clinical or translational research paradigms is significantly limited by the propagation of both data and expertise silos This book details for the first time the current state of this extremely potent area of healthcare innovation and policy and defines the interaction between clinical translational science and biomedical informatics **Health Policy Analysis** Curtis P. McLaughlin, Professor Emeritus Kenan-Flagler Business School and School of Public Health University of North Carolina Chapel Hill North Carolina Curtis P McLaughlin, Craig D. McLaughlin, Mj Craig D McLaughlin, 2014-07-23 This text is about the process of developing health policy relevant to the United States We have included the perspectives of a number of disciplines and professions We have drawn heavily on our personal experiences and backgrounds which include economics political science management communications and public health We have also drawn on the experiences of other countries Strange Stability Benjamin Wilson, 2025-11-18 Strategic stability is admired as the basis of arms control but the doctrine is not what is commonly assumed Benjamin Wilson shows that its early promoters falsely asserted their own objectivity and developed a logic that actually perpetuated the nuclear

arms race benefiting the military industrial complex that commanded their loyalty *Managing Managed Care* Committee on Quality Assurance and Accreditation Guidelines for Managed Behavioral Health Care, Institute of Medicine, 1997-05-05

Managed care has produced dramatic changes in the treatment of mental health and substance abuse problems known as behavioral health. Managing Managed Care offers an urgently needed assessment of managed care for behavioral health and a framework for purchasing, delivering, and ensuring the quality of behavioral health care. It presents the first objective analysis of the powerful multimillion dollar accreditation industry and the key accrediting organizations. Managing Managed Care draws evidence-based conclusions about the effectiveness of behavioral health treatments and makes recommendations that address consumer protections, quality improvements, structure, and financing roles of public and private participants, inclusion of special populations, and ethical issues. The volume discusses trends in managed behavioral health care, highlighting the emerging role of the purchaser. The committee explores problems of overlap and fragmentation in the delivery of behavioral health care and discusses the issue of access, a special concern when private systems are restricted and public systems overburdened. Highly applicable to the larger health care system, this volume will be of particular interest to all stakeholders in behavioral health: federal and state policymakers, public and private purchasers, health care providers, and administrators, consumers, and consumer advocates, accrediting organizations, and health services researchers.
