Darfur Allegory Rogaia Mustafa Abusaraf,2021-03-16 The Darfur conflict exploded in early 2003 when two rebel groups the Sudan Liberation Movement and the Justice and Equality Movement struck national military installations in Darfur to send a hard hitting message of resentment over the region s political and economic marginalization The conflict devastated the region s economy shredded its fragile social fabric and drove millions of people from their homes Darfur Allegory is a dispatch from the humanitarian crisis that explains the historical and ethnographic background to competing narratives that have informed international responses At the heart of the book is Sudanese anthropologist Rogaia Abusharaf s critique of the pseudoscientific notions of race and ethnicity that posit divisions between Arab northerners and African Darfuris Elaborated in colonial times and enshrined in policy afterwards such binary categories have been adopted by the media to explain the civil war in Darfur The narratives that circulate internationally are thus highly fraught and cover over to counterproductive effect forms of Darfurian activism that have emerged in the conflict s wake Darfur Allegory marries the analytical precision of a committed anthropologist with an insider s view of Sudanese politics at home and in the diaspora laying bare the power of words to heal or perpetuate civil conflict

When Worlds Collide T. Max Friesen, 2013-05-16 Interactions between societies are among the most powerful forces in human history. However, because they are difficult to reconstruct from archaeological data, they have often been overlooked and understudied by archaeologists. This is particularly true for hunter-gatherer societies, which are frequently seen as adapting to local conditions rather than developing in the context of large-scale networks. *When Worlds Collide* presents a new model for discerning interaction networks based on the archaeological record and then applies the model to long-term change in an Arctic society. Max Friesen has adapted and expanded world system theory in order to develop a model that explains how hunter-gatherer interaction networks or world systems are structured and why they change. He has utilized this model to better understand the development of Inuvialuit society in the western Canadian Arctic over a 500-year span from the pre-contact period to the early twentieth century. As Friesen combines local archaeological data with more extensive ethnographic and archaeological evidence from the surrounding region, a picture emerges of a dynamic Inuvialuit world system characterized by bounded territories, trade, warfare, and other forms of interaction. This world system gradually intensified as the impacts of Euroamerican colonial activities increased. This intensification, Friesen suggests, was based on pre-existing Inuvialuit social and economic structures rather than on patterns imposed from outside. Ultimately, this intense interacting network collapsed near the end of the nineteenth century. *When Worlds Collide* offers a new way to comprehend small-scale world systems from the point of view of indigenous people. Its approach will prove valuable for understanding hunter-gatherer societies around the globe.

Three Eyes for the Journey Dianne M. Stewart, 2005-07-07 Studies of African-derived religious traditions have generally focused on their retention of African elements. This emphasis, says Dianne Stewart, slights the ways in which communities in the African diaspora have created and formed new religious meaning. In this fieldwork-based study, Stewart shows that African people have been agents of their own religious ritual and theological formation. She examines the African-derived and African-centered traditions in historical and contemporary Jamaica, Myal, Obeah, Native Baptist Revival, Zion, Kumina, and Rastafari, and draws on them to forge a new womanist liberation theology for the Caribbean.
