Family communication patterns, self-efficacy, and adolescent online prosocial behavior: a moderated mediation model

Weizhen Zhan¹ & Zhenwu You¹✉

As technology has been developing by leaps and bounds, concerns regarding adolescent online behavioral patterns have garnered significant attention. Nevertheless, current research exhibits limitations in both perspective and depth. Consequently, this study introduces a moderated mediation model to investigate whether the mediating effect of self-efficacy and the moderating effect of emotional regulation strategies are valid in the relationship between family communication patterns and adolescent online prosocial behavior. A questionnaire survey encompassing 1183 adolescents across 12 schools in three cities of mainland China was conducted. The findings reveal that conversation orientation contributes to the augmentation of adolescents' self-efficacy and online prosocial behavior, whereas conformity orientation follows a reversed trend. Furthermore, self-efficacy serves as a mediator in the relationship between conversation orientation and conformity orientation, influencing adolescent online prosocial behavior in both positive and negative manners. Additionally, this study underscores the significance of emotion regulation strategies: cognitive reappraisal not only reinforces the positive effects of conversation orientation, but also mitigates the adverse effects of conformity orientation, while expressive suppression demonstrates the inverse effect. This research yields a comprehensive and insightful understanding of adolescent online prosocial behavior, furnishing a valuable theoretical foundation for future research and practice in family education.

Dave Capuzzi, Larry Golden

Patterns Of Adolescent Self Image:

Patterns of Adolescent Self-image Daniel Offer, Eric Ostrov, Kenneth Irwin Howard, 1984 Examines the development of self image in both normal and disturbed adolescents Illustrates the differences between normal boys and girls self images and the distinct patterns of self image and symptomatology that characterize various type of disturbed adolescents **Handbook of Adolescent Psychology, Volume 1** Richard M. Lerner, Laurence Steinberg, 2009-04-06 The study of and interest in adolescence in the field of psychology and related fields continues to grow necessitating an expanded revision of this seminal work This multidisciplinary handbook edited by the premier scholars in the field Richard Lerner and Laurence Steinberg and with contributions from the leading researchers reflects the latest empirical work and growth in the field Psychosocial Disturbances in Young People Michael Rutter, 1995 The book considers what is special about adolescence and what is known about the risk factors for psychosocial problems in this age period *Preventing Adolescent Suicide* Dave Capuzzi, Larry Golden, 2013-08-21 First published in 1988 Many people absolutely reject suicide under any circumstances However most of us can sympathize with the suicidal motives let s say of an elderly person afflicted with terminal cancer But it disturbs the core of our being that a child would find this life so empty of hope that death would be preferable Teenagers are so full of pain pleasure sexuality energy curiosity idealism bravado vulnerability rebellion and promise This book comes to grips with the reality of adolescent suicide In the book are fifteen chapters organized under five major parts *Ebook: Adolescence* Steinberg, 2016-04-16 Ebook Adolescence Pathways Through Adolescence Lisa J. Crockett, Ann C. Crouter, 2014-03-05 Adolescent researchers are increasingly aware that they must examine development both across time and across context To do so however requires new conceptualizations and methodological approaches to the study of development including attention to the pathways young people choose in adolescence and follow into adulthood This volume assembles work by key researchers in the field who are struggling to understand how developmental trajectories are constructed and maintained throughout the adolescent period A complete understanding of developmental pathways requires the recognition that adolescents social contexts family school neighborhood and or peer group are important influences on the choices they make at this developmental period Researchers have traditionally studied contexts in isolation rather than examining the interrelationships among contexts and their implications for adolescent development The present volume seeks to address this gap in the literature with attention given not only to the interrelationships among contexts for white middle class youth but also to these issues for minority adolescents in neighborhoods that vary in terms of access to resources It concludes with an examination of researcher community collaboration as a strategy to move communities toward a greater awareness of adolescent development and the problems facing youth in their community and as a means to promote potential avenues for policy change and intervention **Health Promotion Throughout the Life Span - E-Book** Carole Lium Edelman, Elizabeth Connelly Kudzma, 2021-10-20 Selected for Doody s Core Titles 2024 with Essential Purchase designation
