Visual Storytelling Todd James Pierce,Ryan G. Van Cleave,2016 Visual Storytelling combines the intrinsic high level of interest that young people have for graphic novels with the educational mission of the college English classroom Teachers particularly teachers of Freshman Comp and Freshman Sophomore Literature are faced with a significant challenge of presenting literature in a way that simultaneously Interests students Presents a model of literary evaluation Convinces students that such evaluation is important Leaves them room in which to develop their own model Encourages students to draft sophisticated responses in writing At the introductory college level many teachers struggle to create transformative and engaging classroom experiences within the limitations of traditional readers A graphic reader has the ability to open students to artistic and meaningful narratives narratives rich in character and culture that challenge

advanced students and engage students resistant to traditional Composition assignments A graphic reader presents literature in such a way that students often experience a greater sense of comprehension and therefore participate more fully in class A graphic reader especially for a Composition classroom engages entry level students in the college experience and energizes them toward success A graphic reader can bring many benefits to the college classroom particularly the Freshman classroom and that these benefits can be used to market the book as distinct from the traditional Freshman reader Instead focusing only on text based literacy a graphic reader can give extra attention to critical and visual literacies and promote critical literacy through its diverse and thought provoking subject matter Many graphic novels can be read in one sitting but the topics raised can spark discussions complex and relevant enough to last multiple classes These discussions provide an opportunity to investigate and analyze popular culture s representations of life experiences ethnic and cultural groups and historical events common themes in graphic texts Further the nature of the graphic text asks students to read between text and image to generate and answer questions about art especially the question of what constitutes literary merit life and the intersection s between the two

Eat Cake. Be Brave. Melissa Radke, 2018-07-17 From the star of USA reality show *The Radkes* and creator of the viral Red Ribbon Week video this is a hilarious and inspiring story of finding self confidence in a world of naysayers My name is Melissa Radke and there is a very real chance you have no idea who I am or why I wrote a book But admit it you re curious Even though millions of people seem to like watching my videos and *The Radkes* TV show bemoaning the trials of parenting marriage French braiding faith and living life as an anti aging female you may still be wondering who let me write a book I mean books are written by people who say things like I was having a root canal and I literally died in the chair I saw heaven Also when I came back to earth I could speak Mandarin Yeah that didn t happen to me I wrote this book because when I turned 41 I made the decision to live brave bolder and freer I thought our lives were supposed to change when we turned 40 But mine changed when I turned 41 and I set out to prove that it wasn t too late for me And maybe just maybe reading about my journey to find my sense of self worth will help you rightfully believe in yours This book is about how all the years of my life led up to the one that changed it So cut a big slice and raise a fork Here s to bravery Here s to courage Here s to cake And not the crappy kind like carrot

This Is Your Brain on Music Daniel J. Levitin, 2006-08-03 In this groundbreaking union of art and science rocker turned neuroscientist Daniel J Levitin explores the connection between music its performance its composition how we listen to it why we enjoy it and the human brain Taking on prominent thinkers who argue that music is nothing more than an evolutionary accident Levitin poses that music is fundamental to our species perhaps even more so than language Drawing on the latest research and on musical examples ranging from Mozart to Duke Ellington to Van Halen he reveals How composers produce some of the most pleasurable effects of listening to music by exploiting the way our brains make sense of the world Why we are so emotionally attached to the music we listened to as teenagers whether it was Fleetwood Mac U2 or Dr Dre That practice rather than talent is the
