Abstract. *This article reviews the overall significance of the concept of community participation in health with respect to endemic diseases. It also observes how changes in Latin American society during the past forty years have forced radical changes in the notion of participation. The article describes changes in society and analyzes participation in the Cold War context, with four modalities of participation: as ideological manipulation, as cheap labor, as medical care facilitation, and as subversion. It then reviews participation in the context of the crisis of ideologies and describes two modalities: participation as a grassroots movement and as popular promotion. Finally, it interprets the forms participation takes in the context of economic adjustment programs, and from there it describes participation as both a complement to the State and a form of privatization. The article concludes with a proposal for participation as a mechanism to expand and extend democracy; in this sense, it highlights participation as a means of criticism of power, a fomenter of democratic organization, and a mechanism of transformation for the health sector.*

Key words: Consumer Participation; Community Participation; Democracy; Health Policy; Public Health

Resumen. *El artículo revisa las distintas significaciones que ha tenido el concepto de participación comunitaria en salud y en relación a las endemias, y observa cómo los cambios en la sociedad latinoamericana han obligado a producir transformaciones radicales en la idea de participación durante los últimos cuarenta años. El artículo describe estos cambios en la manera de concebir la participación comunitaria con los cambios de la sociedad, comienza analizando la participación en el contexto de la guerra fría, en la cual encuentra cuatro modalidades: la participación como manipulación ideológica, como mano de obra barata, como facilitadora de la acción médica y como subversión. Luego pasa a revisar la participación en el contexto de la crisis de las ideologías y allí describe dos modalidades: la participación como movimiento de base y como promoción popular. Finalmente interpreta las maneras que la participación adquiere en el contexto de los programas de ajuste y allí la describe como complemento del Estado y como privatización. El artículo concluye con una propuesta de la participación como un mecanismo para obtener más democracia y en ese sentido destaca a la participación como medio de crítica del poder, como fomento de la organización democrática y como un mecanismo de transformación del sector salud.*

The Logic of Multiparty Systems M.J. Holler, 2012-12-06 What determines the number of political parties in a democracy Electoral rules certainly influence the incentives to create and maintain parties However a society's political culture can maintain parties despite electoral rules that give them poor prospects of success Thus comparing the number of parties and differences in electoral rules across countries cannot clearly test the effect of the electoral rules A better test would examine a society with a fairly continuous political culture but a change in electoral rules Postwar France is such a society While the basic social order has not changed there was a drastic change in the electoral system in 1958 which theory implies would reduce the number of parties Thus we can test the hypothesis that the number of parties fell with the change in electoral system We can also calculate an equivalent number of parties to see how closely France approached a two party system under the new regime The first section describes the electoral rules under the Fourth and Fifth Republics The second section develops a model that indicates how the change in electoral rules should have affected the incentives for multiple parties The third section tests the hypothesis that the number of parties fell from the Fourth to the Fifth Republic

1 Electoral Rules In the French Fourth Republic 1945 1958 political parties existed largely to serve the direct interests of their members
