[The Myth of the Entrepreneurial State](#) Deirdre Nansen McCloskey, Alberto Mingardi, 2020-10-16. A common narrative of the post-World War II economists was that the State is indispensable for guiding investment and fostering innovation. They claimed that the wealth of the modern world is the result of past State guidance and that what is needed for future economic growth is more State guidance. This position has recently been rejuvenated in reaction to the Great Recession of 2008. The truth is that the enriched modern economy was not a product of State coercion. It was a product of a change in political and social rhetoric in northwestern Europe from 1517 to 1789. The Great Enrichment that came from human ingenuity emancipated from the bottom up, not human ingenuity directed from the top down. The true question is what, on balance, is the best way to organize innovation: by the wise State or by commercially tested betterment. The American Institute for Economic Research in Great Barrington, Massachusetts, was founded in 1933 as the first independent voice for sound economics in the United States. Today it publishes ongoing research, hosts educational programs, publishes books, sponsors interns and scholars, and is home to the world-renowned Bastiat Society and the highly respected Sound Money Project. The American Institute for Economic Research is a 501(c)(3) public charity. The Adam Smith Institute is one of the world's leading think tanks, recognized as the best domestic and international economic policy think tank in the UK and ranked 2nd in the world among Independent Think Tanks by the University of Pennsylvania. Independent, non-profit, and non-partisan, the Adam Smith Institute works to promote free market, neoliberal ideas through research, publishing, media outreach, and education. The Institute is today at the forefront of making the case for free markets and a free society in the United Kingdom. The Institute was founded in the 1970s as post-war socialism reached its high watermark. Then, as now, its purpose was to educate the public about free markets and economic policy and to inject sound ideas into the public debate.

*Home on the Rails* Amy G. Richter, 2006-03-13. Recognizing the railroad's importance as both symbol and experience in Victorian America. Amy G.

Richter follows women travelers onto trains and considers the consequences of their presence there. For a time Richter argues nineteenth century Americans imagined the public realm as a chaotic and dangerous place full of potential where various groups came together, collided, and influenced one another for better or worse. The example of the American railroad reveals how by the beginning of the twentieth century this image was replaced by one of a domesticated public realm, a public space in which both women and men increasingly strove to make themselves at home. Through efforts that ranged from the homey touches of railroad car decor to advertising images celebrating female travelers and legal cases sanctioning gender segregated spaces, travelers and railroad companies transformed the railroad from a place of risk and almost unlimited social mixing into one in which white men and women alleviated the stress of unpleasant social contact. Making themselves at home aboard the trains, white men and women domesticated the railroad for themselves and paved the way for a racially segregated and class stratified public space that freed women from the home yet still preserved the railroad as a masculine domain.
