

A sepia-toned photograph of a large group of children, likely students, sitting on the wide steps of a multi-story brick building. The children are dressed in early 20th-century clothing, with many wearing light-colored shirts and dark trousers or dresses. The building behind them has several windows and a central entrance with a small arched doorway. The overall scene suggests a school or institutional setting from the early 1900s.

Highlander John M. Glen, 2021-10-21 and racial justice during a critical era in southern and Appalachian history This volume is the first comprehensive examination of that extraordinary and often controversial institution Founded in 1932 by Myles Horton and Don West near Monteagle Tennessee this adult education center was both a vital resource for southern radicals and a catalyst for several major movements for social change During its thirty year history it served as a community folk school as a training center for southern labor and Farmers Union members and as a meeting place for black and white civil rights activists As a result of the civil rights involvement the state of Tennessee revoked the charter of the original institution in 1962 At the heart of Horton s philosophy and the Highlander program was a belief in the power of education to effect profound changes in society By working with the knowledge the poor of Appalachia and the South had gained from their experiences Horton and his staff expected to enable them to take control of their own lives and to solve their own problems John M Glen s authoritative study is more than the story of a singular school in Tennessee It is a biography of Myles Horton co founder and long time educational director of the school whose social theories shaped its character It is an analysis of the application of a particular idea of adult education to the

Young Children, 1976 *Restoring Education: Central to American Greatness* David A. Norris, 2011-06-07 This book documents the unique and specific American principles for government. The bedrock principles are presented in Chapter One. John Adams, vice president under George Washington and second president of the United States, said: "liberty cannot be preserved without a general knowledge among the people who have a right from the frame of their nature to knowledge as their great Creator who does nothing in vain besides this they have a right an indisputable unalienable right to that most dreaded and envied kind of knowledge I mean of the characters and conduct of their rulers. Rulers are no more than attorneys, agents and trustees for the people and if the cause the interest and trust is wantonly trifled away the people have a right to revoke the authority. And the preservation of the means of knowledge among the lowest ranks is of more importance to the public than all the property of all the rich men in the country." The Tea Party Colonists were objecting to taxes required by the British Parliament because their representatives had not been allowed to participate in tax enforcement decisions. When shipments of tea were in the Boston harbor the crisis came to a head. They liked their tea but in the early evening of December 16, 1776, about 200 men descended upon the ships and dumped the shipments of tea into the harbor waters. Pre-publication reviews are in the front of the book; this is undoubtedly one of the best books ever written on the subject.

[Holding Values](#) Brenda S. Engel, Anne C. Martin, 2005 The essays in *Holding Values* together constitute both a critique of current policies in education and a clear statement of an alternative vision of progressive education practice. Addressing important topics like the ways children learn, testing, evaluation and assessment, staff development, racial diversity and community are some of the nation's most experienced and thoughtful voices including Vito Perrone, Lillian Weber, Joseph and Helen Featherstone, Deborah Meier, Harold Berlak, Kathe Jervis, Eleanor Duckworth, Edward Chittenden, Susan Harman, Patricia Carini, George Hein. The essays provide compelling jargon-free explanations of the ideas embodied in the progressive perspective along with classroom stories that will strike a chord of recognition in anyone who has worked with children in schools. Speaking to the pressing need to expand boundaries and open possibilities for children, *Holding Values* makes an eloquent plea to keep alive the humanistic values and practices that have been in large part abandoned in schools. At the same time it provides practical examples of how to implement an education that upholds social justice, creativity, thoughtfulness and intellectual and social growth.
