Roots Of Solidarity:

Pluralizing Humanism Slavica Jakelić, 2025-02-28 Humanism is appealed to today whenever we want to tackle the conditions of dehumanization in the contemporary world But for humanism to be viable in the twenty first century this book argues it needs to be pluralized Employing theoretical historical and sociological arguments this book moves beyond the discourse of critique It engages theories of religion and secularism as well as postmodern postcolonial and decolonial critiques of Western humanist projects to uncover the ideas and practices of religious and secular humanisms when they challenge dehumanization in the pursuit of conditions of flourishing for all Through studies of the Solidarity movement in Poland and the anti apartheid movement in South Africa the book demonstrates the centrality of humanist traditions to the emergence of religious secular solidarities that transformed the political landscapes of the world By highlighting the instances in which humanisms functioned as checks on each other s absolutist claims the book contends that humanisms supply a constructive path for addressing the challenges of our time a time of radically divided societies and intolerant even violent forms of nationalism A challenge to the critiques of humanism that seek to identify it solely as the legacy of the West as anti religious discourse or relegate it to the domain of power constellations **Pluralizing Humanism** highlights the rich plurality of humanist discourses and the need for their mutual engagements It points to humanist ideals as constitutive of politics that can guide our human power because they are irreducible to it As such this book will appeal to social scientists social theorists religious studies scholars and ethicists with interests in religion secularism social movements and humanist thought and practice

Repression and Resistance in Communist Europe Jason Sharman, 2004-06 This book explores the role of coercion in the relationship between the citizens and regimes of communist Eastern Europe Looking in detail at Soviet collectivisation in 1928 34 the Hungarian Uprising of 1956 and the Polish Solidarity Movement of 1980 84 it shows how the system excluded channels to enable popular grievances to be translated into collective opposition how this lessened the amount of popular protest affected the nature of such protest as did occur and entrenched the dominance of state over society

Doing Faithjustice Kammer, Fred, SJ, 2023
 The author defines faithjustice as a passionate virtue which disposes citizens to become involved in the greater and lesser societies around themselves in order to create communities where human dignity is protected and enhanced the gifts of creation are shared for the common good and the poor are treated with respect and a special love He says it is in the end a habit of the believing heart Against the backdrop of the author's explicit experiences as a southerner lawyer priest and Jesuit this book expounds on the meaning of faithjustice starting with the biblical grounding It then traverses the full breadth of historical developments in the Catholic Christian community for more than 200 years and elucidates the meaning of faithjustice in our contemporary context Underlining all this is the author's conviction that only people who are living out faithjustice commitments can promote the truth about the necessity of solidarity and counter the pernicious mistrust that creates division in society This updated edition includes new materials on creation and the jubilee tradition and on the parables of Jesus the writings of Popes Benedict XVI and Francis and other social teaching documents from the past twenty years and updated economic racial and social data and analysis in light of the justice tradition

Southern African Liberation Movements and the Global Cold War 'East' Lena Dallywater, Chris Saunders, Helder Adegar Fonseca, 2019-06-17 In the global context of the Cold War the relationship between liberation movements and Eastern European states obviously changed and transformed Similarly forms of material aid and ideological encouragement underwent changes over time The articles assembled in this volume argue that the traditional Cold War geography of bi polar competition with the United States is not sufficient to fully grasp these transformations The question of which side of the ideological divide was more successful or lucky in impacting actors and societies in the global south is still relevant yet the Cold War perspective falls short in unfolding the complex geographies of connections and the multipolarity of actions and transactions that exists until today Acknowledging the complexities of liberation movements in globalization processes the papers thus argue that activities need to be understood in their local context including personal agendas and internal conflicts rather than relying primarily on the traditional frame of Cold War competition They point to the agency of individual activists in both Africa and Eastern Europe and the lessons practices and languages that were derived from their often contradictory encounters In Southern African Liberation Movements authors from South Africa Portugal Austria and Germany ask What role did actors in both Southern Africa and Eastern Europe play What can we learn by looking at biographies in a time of increasing racial and international conflict And which creative solutions need to be found to combine efforts of actors from various ideological camps Building on archival sources from various regions in different languages case studies presented in the edition try to encounter the lack of a coherent state of the art They aim at combining the sometimes scarce sources with qualitative interviews to give answers to the many open questions regarding Southern African liberation movements and their connections to the East

Social Movements and the New State Brian K. Grodsky, 2012-09-26 The world's democracies cheered as the social movements of the Arab Spring ended the reigns of longstanding dictators and ushered in the possibility of democracy Yet these unique transitions also fit into a broader pattern of democratic breakthroughs around the globe where political leaders emerge from the pro democracy movement that helped affect change In *Social Movements and the New State* Brian Grodsky examines the relationships between new political elites and the civil society organizations that brought them to power in three culturally

and geographically disparate countries Poland South Africa and Georgia This book argues that the identities and personal networks developed during the struggle provide movement activists with opportunities to influence minor issues but that new and differing institutional pressures create schisms on broader policy that can turn prior bonds into a liability rather than an asset Drawing on media analyses and more than 150 elite interviews Grodsky offers a rare empirical assessment of the degree to which social movement organizations shape activists beliefs and actions over the long term

Labour and Transnational Action in Times of Crisis Andreas Bieler,Roland Erne,Darragh Golden,Idar Helle,Knut Kjeldstadli,Tiago Matos,Sabina Stan,2015-07-10 Processes of neoliberal globalization have put national trade unions under pressure as the transnational organization of production puts these labour movements in competition with each other The global economic crisis has intensified these pressures further And yet economic and political integration processes have also provided workers with new possibilities to organize resistance Emphasizing the importance of agency this book analyzes transnational labour action in times of crisis historically and now It draws on a variety of fascinating cases across formal and informal collectives in order to clarify which factors facilitate or block the formation of solidarity Moving beyond empirical description of cases to an informed understanding of collective action across borders the volume provides an insightful theorization of transnational action

Racism Postcolonialism Europe Graham Huggan,Ian Law,2022-04-01 Racism Postcolonialism Europe turns the postcolonial critical gaze that had previously been most likely to train itself on regions other than Europe and sometimes those perceived to be most culturally or geographically distant from Europe back on Europe itself The book argues that racism is alive and dangerously well in Europe and examines this racism through the lens of postcolonial criticism Postcolonial racism can be a racism of reaction based on the perceived threat to traditional social and cultural identities or a racism of false respect based on mainstream liberals desire to hold at arm s length different cultures they are anxious not to offend Most of all postcolonial racism at least within the contemporary European context is a racism of surveillance whereby foreigners become aliens protection disguises

preference and cultural difference slides into racial stigmatization all in the interests of representing the European people which is a very different entity to the European population as a whole Boasting a broad multidisciplinary approach and a range of distinguished contributors including Philomena Essed Michel Wieviorka and Griselda Pollock Racism Postcolonialism Europe will be required reading for scholars and students of race postcolonial studies sociology European history and literary and cultural studies
