Formational Units in Sign Languages Rachel Channon, Harry van der Hulst, 2011-10-27 Sign languages and spoken languages have an equal capacity to communicate our thoughts Beyond this however while there are many similarities there are also fascinating differences caused primarily by the reaction of the human mind to different modalities but also by some important social differences The articulators are more visible and use larger muscles with consequent greater effort It is difficult to visually attend to both a sign and an object at the same time Iconicity is more systematic and more available in signs The body especially the face plays a much larger role in sign Sign languages are more frequently born anew as small groups of deaf people come together in villages or schools Sign languages often borrow from the written form of the surrounding spoken language producing fingerspelling alphabets character signs and related signs This book examines the effects of these and other differences using observation experimentation and theory The languages examined include Asian Middle Eastern European and American sign languages and language situations include home signers and small village signers children gesturers adult signers and non native signers

Futurescapes ,2009-01-01 This book testifies to the growing interest in the many spaces of utopia It intends to map out on utopian and science fiction discourses some of the new and revisionist models of spatial analysis applied in Literary and Cultural Studies in recent years The aim of the volume is to side step the established generic binary of utopia and dystopia or science fiction and thus to open the analysis of utopian literature to new lines of inquiry The essays collected here propose to think of utopias not so much as fictional texts about future change and transformation but as vital elements in a cultural process through which social spatial and subjective identities are formed Utopias can thus be read as textual systems implying a distinct spatial and temporal dimension as spatial practices that tend to naturalize a cultural and social construction that of the good life the radically improved welfare state the Christian paradise the counter society etc and make that representation operational by

interpellating their readers in some determinate relation to their givenness as sites of political and individual improvement This volume is of interest for all scholars and students of literature who wish to explore the ways in which utopias of the past and recent present have circulated as media of cultural exchange and homogenization as sites of cultural and linguistic appropriation and as foci for the spatial formation of national and regional identities in the English speaking world *The Crisis of Method in Contemporary Analytic Philosophy* Avner Baz,2017 Avner Baz presents a critique of the working practices of analytic philosophy in recent decades He challenges the assumptions on which the philosophical method of cases rests and he presents a pragmatist conception of language on which the method of cases as used both armchair and experimental philosophers is fundamentally misguided Issues in Contemporary African Linguistics Ndimele, Ozo-mekuri,Yuka, Lenzemo Constatine,2016-07-25 The book is devoted to Professor O ladele Awobuluyi of Adekunle Ajasin University Akungba Akoko Nigeria It contains forty 40 well researched papers selected through a rigorous assessment process out of the many submitted for consideration The papers are grouped into four sections Language and Society Formal Linguistics Applied Linguistics Pragmatics Language Acquisition Lexicography We hope readers will find these papers useful in their continuous quest for invaluable knowledge in African linguistics **Arm and Hand Movement: Current Knowledge and Future Perspective** Renée Morris,Ian Q Whishaw,2015-05-27 This Research Topic is devoted to arm and hand movement in health as well as in several disease conditions It is a collection of several original research papers and reviews clinical case studies hypothesis and theory articles opinions commentaries and methods papers that cover some important aspects of the topic from distinct scientific perspectives We invite the readers to appreciate the range in methodologies and experimental designs that together have led to widen our understanding of this especially broad field of research *Wednesday Is Indigo Blue* Richard E.
