Imperialism and Capitalism in the Twenty-First Century James Petras, Henry Veltmeyer, Humberto Márquez, 2016-05-13 We live in a time of dynamic but generally regressive regime change a period in which major political transformations and a rollback of a half century of legislation are accelerated under conditions of a prolonged and deepening economic crisis and a worldwide offensive against the citizenry and the working class Written by two of the world's leading left wing thinkers Imperialism and Capitalism in the Twenty First Century takes the form of a number of analytical probes into some of the dynamics of capitalist development and imperialism in contemporary conditions of a system in crisis It is too early to be definitive about the form that capitalism and imperialism and socialism might be or is taking as we are in but the early stages of a new developmental dynamic the conditions of which are too complex to anticipate or grasp in thought they require a closer look and much further study from a critical development and Marxist perspective The purpose of this book is to advance this process and give some form to this perspective

Beyond the Global Capitalist Crisis Berch Berberoglu, 2016-04-15 The deep economic recession that has occurred in all major sectors of the U S and global economy is a manifestation of the underlying contradictions of the capitalist system that has resulted in the accumulation of vast fortunes on one side and impoverishment debt and destitution on the other In short the crisis of global capitalism is the result of the immense disparities in wealth and income and a consequent widening gap between capital and labor This ground breaking book brings together a team of experts on the contemporary global capitalist political economy who are able to shed light on the inner workings of global capitalism and the capitalist globalization process that has led to the growth and development of capitalism from the national to the global level with all its fundamental internal dynamics and contradictions operating on a world scale It will make an important contribution to understanding the underlying causes of the current global economic crisis and show the way out of this crisis by way of a powerful critique of the global capitalist system that will ultimately go through a major economic political and social transformation Analysis of the global capitalist crisis raises questions regarding the process of capitalist globalization especially now that neoliberal economic policies have failed Does this signal the end of capitalist globalization and the collapse of the global capitalist system This book will take up these questions and entertain the possibility of a new beginning in the global political economy through an analysis of the next period of post capitalist developments worldwide that may set

the stage for the rise of socialism across the globe *Latin America and the Caribbean in the Global Context* Betty Horwitz, Bruce M. nineteenth century Europe these are the focus of the Social Question In 1942 William Beveridge called them the giant evils while diagnosing the crises produced by the emergence of industrial society More recently during the final quarter of the twentieth century the global spread of neoliberal policies enlarged these crises so much that the Social Question has made a comeback The Social Question in the Twenty First Century maps out the linked crises across regions and countries and identifies the renewed and intensified Social Question as a labor issue above all The volume includes discussions from every corner of the globe focusing on American exceptionalism Chinese repression Indian exclusion South African colonialism democratic transitions in Eastern Europe and other phenomena The effects of capitalism dominating the world the impact of the scarcity of waged work and the degree to which the dispossessed poor bear the brunt of the crisis are all evaluated in this carefully curated volume Both thorough and thoughtful the book serves as collective effort to revive and reposition the Social Question reconstructing its meaning and its politics in the world today

Latin American politics international relations and area specialists of all regions of the world *Two to Tango* Eduardo Fernández-Arias, Charles Sabel, Ernesto Stein, Alberto Trejos, 2016-06-17 It takes two to tango Strong public private collaboration is key for discovering and implementing effective productive development policies to bring out the best in existing economic activities and to foster economic transformation The 25 Latin American cases analyzed in this volume show how and why many public and private partners are dancing smoothly while others stumble or follow different drummers This book is a resource for designing institutions to make public private interaction a win win strategy **Humanism and Embodiment** Susan E. Babbitt, 2014-06-19 A live issue in anthropology and development studies humanism is not typically addressed by analytic philosophers Arguing for humanism as a view about truths Humanism and Embodiment insists that disembodied reason not religion should be the target of secularists promoting freedom of enquiry and human community Susan Babbitt s original study presents humanism as a meta ethical view paralleling naturalistic realism in recent analytic epistemology and philosophy of science Considering the nature of knowledge particularly the radical contingency of knowledge claims upon causal mechanisms religious thinkers like Thomas Merton and Ivan Illich offer more scientific conceptions of practical deliberation than are offered by some non religious ethicists Drawing on philosophical sources such as Marxism Buddhism and Christianity this original study considers implications of an embodied conception of reason revealing philosophical practical and political implications **The Great Credit Crash** Jeffrey Sommers, Martijn Konings, 2020-05-05 Most accounts of the current financial crisis tell a story of deregulation out of control markets and irresponsible speculation But few of those works have done more than regurgitate the newspaper coverage In contrast The Great Credit Crash digs deeper drawing on some of the most prominent radical analysts of the modern market to foreground the key questions that are still waiting to be answered This volume presents a more complete and convincing analysis of the recent economic disaster which is revealed as a product of a social order built during the triumphalist years of neoliberal capitalism The contributors assess current events and political responses critically examining official rhetoric and hegemonic narratives to point the way to an understanding of the crisis beyond the subprime headlines **The Cuban Revolution as Socialist Human Development** Henry Veltmeyer, Mark Rushton, 2011-11-11 The book argues that the Cuban Revolution should be understood as a model of socialist human development Several particular features of this model were critical to the survival of the Cuban Revolution under conditions of neoliberal globalization **Breeding Latin American Tigers** Robert Devlin, Graciela Moguillansky, 2011-10-11 This book is motivated by the emerging rehabilitation of industrial policies as a tool for supporting economic transformation and high rates of growth in developing countries It argues that underperforming disciples of the Washington Consensus market fundamentalism should learn and practice the art of systemic industrial policies which requires a medium long term strategic perspective and intelligent proactive state interventions in markets However it also stresses that rehabilitation requires that industrial policies be developed and implemented in a context of

home grown public private alliances that avoid state capture by special interests It first examines the how of industrial policy in the public sectors of ten non Latin American countries in Asia Europe and Oceania that have been successful in promoting economic catch up with rich countries or have performed better than Latin American countries with similar resource endowments The book defines 10 1 generic First Principles for the use design and execution of modern industrial policies and then examines the experiences of nine Latin American and Caribbean governments against these First Principles The authors identify large gaps in the organizational and operational effectiveness of their public sectors and suggest ways to close these gaps
