manslaughter in the shooting deaths of two Idaho game wardens Claude Jr was well liked by many including a sympathetic jury which rejected possible first or second degree murder verdicts Was it a case of self defense or outright murder Olsen who last wrote the popular Son a psychopath and his victims LJ 11 15 83 skillfully presents his viewpoint in a readable tale more reminiscent of Old West traditions than of the 1980s Recommended *Hunter-trader-trapper*, 1914 **North Atlantic Maritime Cultures** Raoul Andersen, 2011-06-15 No detailed description available for North Atlantic Maritime Cultures **Albatrosses, Petrels and Shearwaters of the World** Derek Onley, Paul Scofield, 2019-11-14 Famous for their size and elegance in flight albatrosses are familiar to anyone who has travelled through the southern oceans and are a flagship family of conservation concern However albatrosses are just one of several groups of pelagic birds those that visit land only to breed and spend the rest of their lives far from the coast soaring from ocean to ocean in a never ending search for food Mysterious and graceful these birds can present a formidable identification challenge to even the most experienced birder This book provides the answer the first comprehensive guide to pelagic birds the albatrosses petrels shearwaters storm petrels and diving petrels A total of 46 spectacular colour plates highlight key ID criteria of the birds in flight with close ups of diagnostic regions of the plumage The plates are accompanied by accurate distribution maps while the sparkling text brings the world of these amazing birds to life Several extremely rare species such as Beck's Petrel are illustrated for the first time while the New Zealand Storm petrel rediscovered as recently as 2004 is also included Sea watchers all around the world will find this superb field guide indispensable *Albatrosses, Petrels and Shearwaters of the World* Derek J. obligate carnivores they survive only by preying upon other animals and they have become one of evolution's most successful predatory lineages of mammals. *Wild Cats of the World* explores the spectacular Cat Family in unprecedented depth. Drawing on thousands of scientific papers and direct observations in the field, each species is profiled at length, covering all aspects of felid behaviour and ecology. The book is profusely illustrated with colour plates, black and white sketches showing important aspects of cat life, and accurate images of every species' skull. Over 400 spectacular photographs are included, many of them showing extremely rare and little-known cats published here for the first time. Each profile includes an up-to-date range map and explains the most current science on how cats are classified and related to each other, including some very recent surprising discoveries. Despite their great evolutionary success, the challenges facing felids in the modern world are profound. Only one, the ubiquitous domestic cat, does not require dedicated conservation action to ensure survival for the next century. The book also explores the current conservation issues facing wild cats, the increasingly perilous status of many species, and how they can be saved.

Rats and How to Destroy Them (Traps and Trapping Series - Vermin & Pest Control)

Mark Hovell, 2013-04-18. Originally published in 1924, this rare early work on rats and their control is both expensive and hard to find in its first edition. READ COUNTRY BOOKS has republished it in an affordable, high-quality modern edition using the original text and artwork. The author was an expert and dedicated destroyer of rats who also invented the Terrier Death Run Rat Trap and the Blocking Trap. He was persuaded to write this fascinating book after fighting a memorable battle in ridding a friend's house and farm of a long-established and numerous rat colony. Utilising his vast knowledge of the Brown and the Black Rat and his many years of practical experience in their destruction, he penned this, the most comprehensive of all books ever published on this particular subject. Over five hundred pages contain forty-eight detailed chapters, including: Habits and Natural History of the Rat; Traps: Type and Use; Signals; Trapping Methods; Snaring; Ferrets and Ferreting; The Mongoose; Dogs; Trailing; Poisoning; Virus; Blocking; Flooding; Fumigation; Varnish; and Rat Lime Trap; The Rodier System; How to Deal with Rats in the House; Shop; Outbuildings; Yards; Stables; Cow Houses; Fowl Pens; Pig Sties; Gardens; Greenhouses; Rivers and Ships; Rats on Shooting Estates and Farms; Sewers; Notes on Plague; Cancer in Rats; etc. etc. There are also chapters on the control of mice, cockroaches, and sparrows, with extra detailed chapters on traps and their design. Over fifty text illustrations are included, detailing trap design and usage, etc. Also retained are several pages of vintage advertisements for rat traps, poisons, baits, books, etc. This is a fascinating read for anyone interested in the countryside, rural conservation, pest control, game keeping, etc., with much of the historical information remaining useful and practical today. Many of the earliest sporting books, particularly those dating back to the 1900s and before, are now extremely scarce and increasingly expensive. READ COUNTRY BOOKS are republishing many of these classic works in affordable, high-quality modern editions using the original text and artwork.
