Infectious Diseases in Critical Care Jordi Rello, Martin H. Kollef, Emilio Díaz, Alejandro Rodríguez, 2010-05-28 Infections and their complications are a very important clinical area in the intensive care unit setting Community acquired infections and nosocomial infections both contribute to the high level of disease acquisition common among critically ill patients The accurate diagnosis of nosocomial infections and the provision of appropriate therapies including antimicrobial therapy effective against the identified agents of infection have been shown to be important

determinants of patient outcome Critical care practitioners are in a unique position in dealing with infectious diseases They are often the initial providers of care to seriously ill patients with infections Additionally they have a responsibility to ensure that nosocomial infections are prevented and that antimicrobial resistance is minimized by prudently employing antibiotic agents It is the editors hope that this book will provide clinicians practicing in the intensive care unit with a reference to help guide their care of infected patients To that end they have brought together a group of international authors to address important topics related to infectious diseases for the critical care practitioner **Pediatric Anesthesia** Bruno

Bissonnette,2014-05-14 No longer merely a subspecialty pediatric anesthesia is now a professional entity in its own right as is amply demonstrated in this comprehensive addition to the medical and surgical literature Pediatric Anesthesia Basic Principles State of the Art Future comprises the contributions of 150 experts in the field from all over the world providing this book with a truly global perspective This textbook will help anesthesiologists already interested in pediatric anesthesia to the knowledge and skills inherent to the safe practice of anesthesia for infants and children
