Secretary of Energy United States. Congress. House. Committee on Appropriations. Subcommittee on Department of the Interior and Related Agencies, 1987. House of Commons - Environmental Audit Committee: Energy Subsidies - HC 61 Great Britain: Parliament: House of Commons: Environmental Audit Committee, 2013-12-02. The Government is shifting the goal posts on fuel poverty so that official statistics record far fewer households as fuel poor. The changes to the fuel poverty definition and target in part being made through amendments to the Energy Bill should be stopped unless the Government is prepared to make a public commitment to end fuel poverty altogether. A short-term bid to cut bills must not throw energy and climate change policy off course. In the longer term, green levies could actually keep bills down if they drive energy efficiency improvements that cut the cost of heating our homes. Insulating homes and supporting green technologies is vital to help the fuel poor and cut the emissions causing climate change. At the Rio 20 Summit and the G20, the Government committed itself to phasing out fossil fuel subsidies that encourage wasteful consumption and contribute to greenhouse gas emissions. The Government must set a target to reduce subsidies to harmful fossil fuels. The Government should also use the Autumn Statement as an opportunity to provide a clear and comprehensive analysis of energy subsidies in the UK. The report also looks at whether Government support for the new nuclear power station at Hinkley Point constitutes a subsidy and concludes that it does despite the Government's assurance otherwise. The Government's policy of no public subsidy for new nuclear requires it to provide only similar support to that provided to other types of energy, but even on that basis, the deal for Hinkley Point C is dissimilar, notably on support for decommissioning and waste. **Sustainable Energy Strategy**, 1995. A series of roundtable meetings on U.S. energy policy were held around the nation Aug 2 1994 Jan 13 1995. Participants sought public input on energy topics. Here are summaries of the roundtable meetings including questions from their audiences.
