Medical Histology A Text Atlas With Introductory Pathology:

Medical Histology R. L. Bacon, N. R. Niles, 2012-12-06 It is difficult for a teacher to accept the fact that not all of the information in his or her field is a necessary part of the armamentarium of the student This holds for histologists and for that matter pathologists biochemists and ophthalmologists It may especially hold for those who were trained during exciting periods in the history of their discipline In the past two decades information in every basic medical science has increased greatly perhaps exponentially and the basic science curriculum has been compressed to the point where the medical student can reasonably be expected to acquire only a superficial knowledge of any one of these sciences Hence the information provided must be carefully selected effectively presented in retainable doses and useful for understanding material to be presented later in the curriculum and for the solution of clinical problems In the compact courses of today the presentation of only enough data to support basic working concepts of structure and function is appropriate Additional factual information constitutes trivia which in our opinion interferes with effective development retention and use of the concepts This philosophy has been the basis for the preparation of this book Consistent with this philosophy the text is brief and the content has been carefully examined for its appropriateness to the needs of the medical student **Medical Histology**

Robert L. Bacon, Nelson R. Niles, 1983 *An Atlas of Histology* Shu-Xin Zhang, 2013-03-20 The beginning student of histology is frequently confronted by a paradox diagrams in many books that illustrate human microanatomy in a simplified cartoon like manner are easy to understand but are difficult to relate to actual tissue specimens or photographs In turn photographs often fail to show some important features of a given tissue because no individual specimen can show all of the tissue's salient features equally well This atlas filled with photo realistic drawings was prepared to help bridge the gap between the simplicity of diagrams and the more complex reality of microstructure All of the figures in this atlas were drawn from histological preparations used by students in my histology classes at the level of light microscopy Each drawing is not simply a depiction of an individual histological section but is also a synthesis of the key structures and features seen in many preparations of similar tissues or organs The illustrations are representative of the typical features of each tissue and organ The atlas serves as a compendium of the basic morphological characteristics of human tissue which students should be able to recognize **Wheater's Basic Pathology: A Text, Atlas and Review of Histopathology E-Book** Barbara

Part 4 further considers toxicology's presence via the Internet, databases, and software tools. Among the miscellaneous topics in the concluding Part 5 are laws and regulations, professional education, grants and funding, and patents. Volume 2: The Global Arena offers contributed chapters focusing on the toxicology contributions of over 40 countries, followed by a glossary of toxicological terms and an appendix of popular quotations related to the field. The book, offered in both print and electronic formats, is carefully structured, indexed, and cross-referenced to enable users to easily find answers to their questions or serendipitously locate useful knowledge they were not originally aware they needed. Among the many timely topics receiving increased emphasis are disaster preparedness, nanotechnology, omics, risk assessment, societal implications such as ethics and the precautionary principle, climate change, and children's environmental health. Introductory chapters provide a backdrop to the science of toxicology, its history, the origin and status of toxicoinformatics, and starting points for identifying resources. Offers an extensive array of chapters organized by subject, each highlighting resources such as journals, databases, organizations, and review articles. Includes chapters with an emphasis on format, such as government reports, general interest publications, blogs, and audiovisuals. Explores recent Internet trends, web-based databases, and software tools in a section on the online environment. Concludes with a miscellany of special topics such as laws and regulations, chemical hazard, communication resources, careers, and professional education. K-12 resources, funding, poison control centers, and patents.
