Medical Image Processing R. Suganya,S. Rajaram,A. Sheik Abdullah,2018-01-29 The field of medical imaging seen rapid development over the last two decades and has consequently revolutionized the way in which modern medicine is practiced Diseases and their symptoms are constantly changing therefore continuous updating is necessary for the data to be relevant Diseases fall into different categories even a small difference in symptoms may result in categorising it in a different group altogether Thus analysing data accurately is of critical importance This book concentrates on diagnosing diseases like cancer or tumor from different modalities of images This book is divided into the following domains Importance of big data in medical imaging pre processing image registration feature extraction classification and retrieval It is further supplemented by the medical analyst for a continuous treatment process The book provides an automated system that could retrieve images based on user s interest to a point of providing decision support It will help medical analysts to take informed decisions

before planning treatment and surgery It will also be useful to researchers who are working in problems involved in medical imaging

Big Data in Multimodal Medical Imaging Ayman El-Baz, Jasjit S. Suri, 2019-11-05 There is an urgent need to develop and integrate new statistical mathematical visualization and computational models with the ability to analyze Big Data in order to retrieve useful information to aid clinicians in accurately diagnosing and treating patients The main focus of this book is to review and summarize state of the art big data and deep learning approaches to analyze and integrate multiple data types for the creation of a decision matrix to aid clinicians in the early diagnosis and identification of high risk patients for human diseases and disorders Leading researchers will contribute original research book chapters analyzing efforts to solve these important problems
