Rubin, Ock Boon Chung, 2013-09-05 The purpose of this book is to present a rather simple argument Parents thoughts about childrearing and the ways in which they interact with children to achieve particular parenting or developmental goals are culturally determined Within any culture children are shaped by the physical and social settings within which they live culturally regulated customs and childrearing practices and culturally based belief systems The psychological meaning attributed to any given social behavior is in large part a function of the ecological niche within which it is produced Clearly it is the case that there are some cultural universals All parents want their children to be healthy and to feel secure However healthy and unhealthy at least in the psychological sense of the term can have different meanings from culture to culture

Boutellier,2013-12-12 Over the last twenty five years the significance of criminal justice has dramatically changed In a post modern culture criminal law serves more and more as a focal point in public morality The discovery of the victim of crime can be seen as the marking point by which criminal justice got its central position in the maintenance of social order It is the result of a general victimalization of today s morality This ingenious book according to Michael Tonry combines insights from criminology sociology and moral philosophy It is especially inspired by the work of Richard Rorty who stresses the sensibility for suffering as the major source of morality in post modern times It describes the arousal of attention for victims and the development of crime prevention More specifically it analyzes child sexual abuse and prostitution This illuminating book will be an eye opener for theorists in criminology and moral philosophy but will also be an inspiring work for policy makers in the area of criminal justice
