Parliament In The Age Of The Internet:

Parliament in the Age of the Internet John Taylor, Stephen Coleman, Wim B. H. J. van de Donk, 1999 Parliament in the Age of the Internet offers a response to the crisis of political communication It examines the potential applications of new information and communication technologies to the political process Its contributors explore the question of whether the immense developments in the means of communicating information based upon digital technologies the convergence of computers and telecommunications and the extraordinary development of internet technology profoundly affect the way that parliamentary democracy operates **The Internet, Democracy and Democratization** Peter Ferdinand, 2013-02-01 The

Internet is transforming relations between states and citizens This study gives examples of how it is creating new political communities at various levels both in democracies and authoritarian regimes It is also used by marginalized anti democratic groups such as neo Nazis *E-Parliament and ICT-Based Legislation: Concept, Experiences and Lessons* Sobaci, Mehmet

Zahid, 2011-11-30 Concepts such as e voting e democracy e participation online campaigning and e parliament are the most powerful proof of the use of ICTs in political activities processes and institutions E Parliament and ICT Based Legislation Concept Experiences and Lessons presents a conceptual framework regarding e parliament and analyzes the impacts of ICTs on the structure of parliament its functions relations with other actors and the legislative process As a result of the means and opportunities created by ICTs parliaments have had a chance to simplify and integrate their administrative processes and involve citizens in legislative processes This book reflects on new understandings developments and practices in parliaments within the framework of ICT usage **Routledge Handbook of Internet Politics** Andrew Chadwick, Philip N.

Howard, 2010 The politics of the internet has entered the social science mainstream This volume is concerned with theoretical conceptual debates political institutions practices how the internet creates new policy problems for liberal democratic non liberal democratic states not to mention their roles in the global system **Parliaments and Citizens**

Cristina Leston-Bandeira, 2016-04-22 The relationship between parliaments and citizens is one of the least studied subjects in legislative studies yet this is a crucial dimension to understand parliaments and the role they play in our political systems Furthermore this relationship has gained considerable visibility over the last decade thanks in part to the development of new media but also as a reaction to the trends of political apathy In a context of increasing political disengagement parliamentary discourse shifted attention from the traditionally predominant relationship with government to the relationship with citizens Issues of legitimacy became more directly associated with the link between parliament and citizens resulting in investment in new and more complex mechanisms for contact with citizens even in the more centralised systems This book looks at a wide range of case studies across Europe and beyond assessing overall strategies in the move towards stronger engagement with citizens It assesses the extent to which the shift in discourse has led to actual changes in parliamentary practice This book was published as a special issue of the Journal of Legislative Studies *Parliaments in Asia* Zheng

Yongnian, Lye Liang Fook, Wilhelm Hofmeister, 2013-10-23 Much writing on politics in Asia revolves around the themes of democracy and democratisation with a particular focus on political systems and political parties This book on the other hand examines the role that parliaments a key institution of democracy play in East Southeast and South Asia including Taiwan and Hong Kong Parliaments in these locations function in a variety of historical political and socio economic circumstances with different implications for institution building and political development This book examines questions like how accessible representative transparent accountable and effective are parliaments To what extent are parliaments able to hold other political actors to account or how far are they constrained by the political environment in which they operate Going further this book considers how new media such as the Internet and other social platforms through providing avenues for individuals to articulate their views separate from official channels are influencing the ways parliaments work To stay relevant parliamentarians need to reach out and engage these individuals in formulating deciding and fine tuning policies In the information age being a parliamentarian has become more challenging and how a parliamentarian copes with this change will shape the nature and pace of political development **Digital Divide** Pippa Norris, 2001-09-24 There is widespread concern that the Internet is exacerbating inequalities between the information rich and poor New Media and Politics Barrie Axford, Richard Huggins, 2001-01-26 Exploring the theme of the putative transformation of political modernity under the impact of new media this book adopts a questioning approach to the ways in which cultural and technological factors are affecting the temper of political life and reflects the variety of normative thinking about and empirical research on the changing character of politics in mediatized cultures New Media and Politics examines the extent to which commercial populism now dominates electoral and other political discourses the ways in which the functions of leadership government and political parties are modified by different forms of both old and new media the democratic or undemocratic import of such changes and the ways in which the dominant territorial paradigm of politics is challenged by the space and time devouring capacities of electronic media **The Internet and National Elections** Randolph Kluver, Nicholas Jankowski, Kirsten Foot, Steven M. Schneider, 2007-05-07 This volume represents an important contribution towards gaining a cross national understanding of the current and emerging impacts of the Internet on political practice **Can The Internet Strengthen Democracy?** Stephen Coleman, 2017-05-11 From its inception as a public communication network the Internet was regarded by many people as a potential means of escaping from the stranglehold of top down stage managed politics If hundreds of millions of people could be the producers as well as receivers of political messages could that invigorate democracy If political elites fail to respond to such energy where will it leave them In this short book internationally renowned scholar of political communication Stephen Coleman argues that the best way to strengthen democracy is to reinvent it for the twenty first century Governments and global institutions have failed to seize the opportunity to democratise their ways of operating but online citizens are ahead of them developing practices that could revolutionise the exercise of

political power **Information and Communication Technology and Public Innovation** V.J.J.M. Bekkers,H. van Duivenboden,M. Thaens,2006-07-25 The modernization of public administration is a recurring theme on the political and public agenda in many countries This book demonstrates how public administration organizations try to adapt to changing circumstances in their environment in order to secure their legitimacy presenting a number of case studies **The Information Ecology of E-government** V. J. J. M. Bekkers,Vincent Homburg,2005 It seems that only a short time ago numerous academics and practitioners in the field were somewhat blinded by the successes of the dot com developments in the private sector and some of them enthusiastically claimed that public administration was to be revolutionized But that did not happen and also the dot com soap bubble burst This suggests that there is much yet to be learned about innovation in public administration especially about innovations at the cornerstones of technological and institutional transformations New and more fully developed formulations of theory into practice are needed The goal of the editors of this book is to contribute to some aspects of the understanding of e government In order to understand electronic government one has to scrutinize the various environments and contexts in which e government is developed and implemented As such it builds upon the biological and environmental lines of reasoning that have been suggested by authors like Bonnie Nardi and Vicky O Day and Thomas Davenport and Laurence Prusak ICT Adoption and Application in the Malaysian Public Sector Ambali, Abdul Raufu,Bakar, Ahmad Naqiyuddin,2014-10-31 Information and Communication Technologies hold great potential in facilitating public services however one of the main problems in applying ICT systems successfully lies in users behavior Before ICT can be fully assimilated into the public domain it will first be necessary to successfully conciliate users to their adoption ICT Adoption and Application in the Malaysian Public Sector aims to resolve the difficulties in applying practical ICT systems within the public sphere thoroughly addressing disparities in ICT theory user attitudes and the underlying factors that hinder the full adoption of ICT systems This publication is a valuable resource for policymakers software developers policy analysts academic researchers and students interested in the field of ICT **Encyclopedia of Digital Government** Anttiroiko, Ari-Veikko,Malkia, Matti,2006-07-31 Containing more than 250 articles this three volume set provides a broad basis for understanding issues theories and applications faced by public administrations and public organizations as they strive for more effective government through the use of emerging technologies This publication is an essential reference tool for academic public and private libraries **Electrified Democracy** Andrew Blick,2021-07 An examination in historical context of the approach the UK Parliament has taken towards the Internet and its wider implications *Liberal Democracy and the Social Acceleration of Time* William E. Scheuerman,2020-06-09 A fine contribution to the literature on the problems of modern liberal democracy Choice The pace of American society has quickened exponentially since the Founding Fathers first mapped the constitution Information travels at the speed of light so does money We can hop from one side of the country to the other in a matter of hours contact our elected officials instantaneously and share our views with thousands of people at

the touch of a button Both academia and the popular media have grappled with the consequences of this acceleration on every aspect of contemporary life Most pressing however may be its impact on political life In *Liberal Democracy and the Social Acceleration of Time* William Scheuerman offers a sophisticated assessment of the implications of social and technological celerity in the operation of liberal democracies Specifically he asks what is acceleration's main impact on the traditional liberal democratic model of the separation of powers According to Scheuerman high speed has created an imbalance The executive branch was intended to react with dispatch by contrast legislatures and the courts were designed to be more deliberate and thoughtful While this system of checks and balances was effective in the age of horse and buggy Scheuerman argues that the very features that were these institutions strengths may now be a liability Throughout this book Scheuerman offers a constructive critique which articulates ways in which liberal democracy might be recalibrated in accordance with the tempo of modern society

The Internet Galaxy Manuel Castells, 2002-10-31 Castells helps us understand how the Internet came into being and how it is affecting every area of human life This guide reveals the Internet's huge capacity to liberate but also its possibility to exclude those who do not have access to it

Political Communication in a New Era Philippe Maarek, Gadi Wolfsfeld, 2005-08-18 This book seeks to provide readers with a cross national perspective concerning the art of political communication in a field increasingly affected by globalization fragmentation of political audiences and the rise of professional communications experts a field concerned not only with how leaders are chosen but also with how they govern Structured in two sections *Political Communication in a New Era* examines both methods of gathering and disseminating information in a time of technological transformation and developments in the uses of political communication across the globe Contributors offer perspectives from Canada France Germany Israel Italy and the United States

The Legislature of Brazil Cristiane Brum Bernardes, Cristina Leston-Bandeira, Ricardo de João Braga, 2018-02-02 This book develops a critical analysis of the Brazilian legislature specifically the role of its lower chamber the Chamber of Deputies in policy making and how this combines with its public engagement role namely in terms of promoting participation and transparency The book draws from Nelson Polsby's theoretical conceptualization about transformative and arena legislatures The purpose is not to reach a consensus about the exact categorisation of the legislature in Polsby's classification On the contrary the chapters are mainly concerned in challenging this classification through interdisciplinary perspectives drawn from within the legislative studies in Brazil The book's first chapters introduce the reader to an historical overview of the Brazilian legislature's policy making and organization identifying its role in proposing public policies and scrutinising proposals from the Executive Branch The subsequent chapters focus on its public engagement role and address contemporary elements such as political participation and transparency and how these interlink or not with legislative practices and influence the production of law The book provides a unique insight into the operation and power of the legislature of a key global power Brazil in a presidential political system context The chapters

originally published as a special issue in the Journal of Legislative Studies **Government e-Strategic Planning and Management** Leonidas G. Anthopoulos, Christopher G. Reddick, 2013-10-05 Various e strategies have been developed since the late 90s in an attempt to describe the governmental vision for administrative and for societal change the objectives and priorities with regard to the development of the Information and Communication Technologies ICT at national and at supranational levels Terms such as the European Information Society the U S Information Highways and the Korean and Chinese Informatization try to describe social transformation that occurs due to the ICT and to determine means with which governments will capitalize the ICT to improve social life and to support economic growth This book focuses on the e strategic management approaches that are followed worldwide addresses the gaps that appear between e strategic updates and presents alternative strategic management methods adopted or to use strategic management methods as a means to describe the e strategic evolution in their geographic areas Each chapter evaluates e strategic management approaches to define multi criteria decision making systems for e strategic transformation and Indicative methods for e strategic analysis This book also illustrates experiences from national and supranational cases which come from different geographic areas regarding e strategic planning and management and demonstrates e strategic initiation and development across different countries and continents and the association between policies and ICT It also seeks to perform a systematic analysis of various representative cases in order to capture the realized e Strategic transformation It will be of interest to scholars and policy makers in public administration management and information technology
