The Spatha M.C. Bishop,2020-01-23 Adopted from the Celts in the 1st century BC the spatha a lethal and formidable chopping blade became the primary sword of the Roman soldier in the Later Empire Over the following centuries the blade its scabbard and its system of carriage underwent a series of developments until by the 3rd century AD it was the universal sidearm of both infantry and cavalry Thanks to its long reach the spatha was the ideal cavalry weapon replacing the long gladius hispaniensis in the later Republican period As the manner in which Roman infantrymen fought evolved styles of hand to hand combat changed so much that the gladius was superseded by the longer spatha during the 2nd century AD Like the gladius the spatha was technologically advanced with a carefully controlled use of steel Easy maintenance was key to its success and the spatha was designed to be easily repaired in the field where access to a forge may have been limited It remained the main Roman sword into the Late Roman period and its influence survived into the Dark Ages with Byzantine Carolingian and Viking blades Drawing together historical accounts excavated artefacts and the results of the latest scientific analyses of the blades renowned authority M C Bishop reveals the full history of the development technology training and use of the spatha the sword that defended an empire Monthly Catalog of United States Government Publications ,1975

C. Bishop,John Coulston,2006-04-22 Rome s rise to empire is often said to have owed much to the efficiency and military skill of her armies and their technological superiority over barbarian enemies But just how advanced was Roman military equipment What were

its origins and how did it evolve The authors of this book have gathered a wealth of evidence from all over the Roman Empire excavated examples as well as pictorial and documentary sources to present a picture of what range of equipment would be available at any given time what it would look like and how it would function They examine how certain pieces were adopted from Rome's enemies and adapted to particular conditions of warfare prevailing in different parts of the Empire They also investigate in detail the technology of military equipment and the means by which it was produced and discuss wider questions such as the status of the soldier in Roman society Both the specially prepared illustrations and the text have been completely revised for the second edition of this detailed and authoritative handbook bringing it up to date with the very latest research It illustrates each element in the equipment of the Roman soldier from his helmet to his boots his insignia his tools and his weapons This book will appeal to archaeologists ancient and military historians as well as the generally informed and inquisitive reader

The Armies of Ancient Persia Kaveh Farrokh, 2014-02-28 Throughout most of the classical period Persia was one of the great superpowers placing a limit on the expansion of Western powers It was the most formidable rival to the Roman empire for centuries until Persia by then under the Sassanians was overwhelmed by the Islamic conquests in the seventh century AD Yet the armies of ancient Persia have received relatively little detailed attention certainly in comparison to those of Rome This work is the first of three volumes that will form the most comprehensive study of ancient Persian armies available The Sassanians the native Iranian dynasty that ousted their Parthian overlords in AD 226 developed a highly sophisticated army that was able for centuries to hold off all comers They continued the Parthians famous winning combination of swift horse archers with heavily armored cataphract cavalry also making much use of war elephants but Kaveh Farrokh interestingly demonstrates that their oft maligned infantry has been much underestimated The author born in Athens Greece and expert in ancient Persian languages and military history has been researching the military history and technology of Persia for a quarter of a century He draws on the latest research and new archaeological evidence
