Muir Gray, 2013-01-11 How eliminating risk illiteracy among doctors and patients will lead to better health care decision making Contrary to popular opinion one of the main problems in providing uniformly excellent health care is not lack of money but lack of knowledge on the part of both doctors and patients The studies in this book show that many doctors and most patients do not understand the available medical evidence Both patients and doctors are risk illiterate frequently unable to tell the difference between actual risk and relative risk Further unwarranted disparity in treatment decisions is the rule rather than the exception in the United States and Europe All of this contributes to much wasted spending in health care The contributors to Better Doctors Better Patients Better Decisions investigate the roots of the problem from the emphasis in medical research on technology and blockbuster drugs to the lack of education for both doctors and patients They call for a new more enlightened health care with better medical education journals that report study outcomes completely and transparently and patients in control of their personal medical records not afraid of statistics but able to use them to make informed decisions about their treatments **The Pirate Who Does**

The Mansion of Happiness Jill Lepore, 2013-03-26 Renowned Harvard scholar and New Yorker staff writer Jill Lepore has written a strikingly original ingeniously conceived and beautifully crafted history of American ideas about life and death from before the cradle to beyond the grave How does life begin What does it mean What happens when we die All anyone can do is ask Lepore writes That's why any history of ideas about life and death has to be like this book a history of curiosity Lepore starts that history with the story of a seventeenth century Englishman who had the idea that all life begins with an egg and ends it with an American who in the 1970s began freezing the dead In between life got longer the stages of life multiplied and matters of life and death moved from the library to the laboratory from the humanities to the sciences Lately debates about life and death have determined the course of American politics Each of these debates has a history
