Participation In Government Making A Difference:

Making a Difference: Dossier on Community Engagement on Nature Based Tourism in India , Participation in Government ,1996 Sustainable Development Strategies Barry Dalal-Clayton,Stephen Bass,2012-09-10 This book is a cornerstone resource for a wide range of organizations and individuals concerned with sustainable development at national or local levels as well as for international organizations concerned with supporting such development Whilst the focus is on integrated strategies for sustainable development the approaches and methods covered are equally relevant to poverty reduction environmental and sectoral strategies programme development and review Agenda 21 called for all countries to develop sustainable development strategies For such strategies to be effective there needs to be a real commitment In every country government at all levels the private sector and civil society must work together in a true partnership in transparent ways which enable genuine stakeholder participation The necessary mechanisms and processes need to be coordinated to enable continuous learning and improvement This resource book provides flexible non prescriptive guidance on how to develop assess and implement national sustainable development strategies It sets out principles and ideas on process and methods and suggests how these can be used It is based on an analysis of past and current practice drawing directly from experience in both developed and developing countries Following a discussion of the nature and challenges of sustainable development and the need for strategic responses to them the heart of the book covers the main tasks in strategy processes Individual chapters offer a rich range of guidance ideas and case studies Political Participation, Diffused Governance, and the Transformation of Democracy Yvette Peters,2017-11-27 Although democratic governments have introduced a number of institutional reforms in part intended to increase citizens political involvement studies show a continued decline in regular political engagement This book examines different forms of political participation in democracies and in what way the delegation of public responsibilities or the diffusion of politics has affected patterns of participation since the 1980s The book addresses this paradox by directly investigating the impact of institutional changes on citizens political participation empirically It re analyses patterns of political participation in contemporary democracies providing an in depth time series cross sectional analysis that helps develop a better understanding of how variation in political participation can be explained both between countries and over time As such it develops an institutional theoretical framework which can help to explain levels of participation and shows that instead of displaying more political apathy citizens have reallocated or displaced their activities to a broader array of forms of participation This book will be of key interest to students and scholars of comparative politics democratization political participation and electoral politics

Linking Activism Morgan Gardner,2013-09-13 This book a unique examination of the activist striving to work for more holistic social change creates a conceptual framework to give visibility to the complexity of activist practice that spans environmental and social justice concerns *Electoral Justice and Political Culture* Dai zhicheng,2021-12-15 The election

process reflects the essence of the electoral system The justice of the electoral process can best reflect whether the electoral system is legitimate and democratic The democratic and legal shortcomings of China s electoral system can be solved by rationalizing and democratizing the electoral process which is consistent with the realization of justice under the electoral process In this book procedural justice is combined with the electoral process to find the conditions and elements needed to achieve more justice in elections The electoral system is still based on the political will of the political party to rule and the electoral system itself has serious legislative problems which shows that the foundation of China s electoral system has problems Then China s electoral system cannot truly represent the political voices and political interests of the people in the implementation and at the same time cannot reflect the fairness of the election in the electoral procedure and the determination of the election results The People s Congress system and the Political Consultation system simply cannot elect the right representatives who truly represent the interests of the people The elected government and state power organs are separated from the people s political status political interests and development interests in the operation of their duties and the exercise of power By analyzing the problems in China s electoral system and election procedures the book concludes the conditions for the realization of more justice rationalization and democratization of China s electoral system and election procedures through procedural justice The spiritual connotation of procedural justice under the electoral system and election procedures are combined with the traditional Chinese democratic political culture to construct an electoral political culture adapted to the contemporary Chinese political environment advancing the development of procedural justice in China s electoral system to realize the rationality legitimacy and democracy of elections

theory including the state and structure of identity the individual and the public and the enduring issues of civic engagement and collective discourse It examines some of the complex challenges faced by citizens and policy makers and explores the existing procedural and institutional mechanisms that undermine democratic political accountability as well as its legitimation Drawing from classical conceptions of citizenship in the early Greco Roman eras to the more contemporary critical social theory and postmodernist contentions the work casts a wide net that covers complex issues including rights and obligation the doctrine of state sovereignty and authority equality the principle of majority rule citizen participation in governance public versus self interest ideas of justice immigration and cultural identity global citizenship and the evolution of hybrid communities that challenge traditional notions of state citizenship identity With meticulous detail and powerful analysis author Kalu N Kalu unceasingly places citizenship as the central thesis of this project illuminating its intellectual richness on the one hand and demonstrating the ongoing challenges in both conceptualization and practice on the other
