## **Pure Strategy Power And Policy In The Space And Information Age:**

The Nature of War in the Information Age David J. Lonsdale, 2004-06 Much of today's Revolution in Military Affairs RMA literature subscribes to the idea that the information age will witness a transformation in the very nature of war In this book David Lonsdale puts that notion to the test      *Theorizing European Space Policy* Thomas C. Hoerber, Emmanuel Sigalas, 2016-11-10 In the modern world technical issues define space policy Missing from discussions of space policy however is a consideration of the political consequences of new space endeavors particularly in the context of the European Union This book therefore approaches space policy instead from the discipline of European studies and analyzes the European integration process through the lenses of political science history economics and international relations The strengths of each discipline are used to apply theoretical approaches to current issues in European space policy *Theorizing European Space Policy* is the latest contribution to the growing debate on space policy and its role in the European integration process      **Pure Strategy** Everett Dolman, 2012-11-12 A stimulating new inquiry into the fundamental truth of strategy its purpose place utility and value This new study is animated by a startling realization the concept of strategic victory must be summarily discarded This is not to say that victory has no place in strategy or strategic planning The outcome of battles and campaigns are variables within the strategist's plan but victory is a concept that has no meaning there To the tactical and operational planner wars are indeed won and lost and the difference is plain Success is measurable failure is obvious In contrast the pure strategist understands that war is but one aspect of social and political competition an ongoing interaction that has no finality Strategy therefore connects the conduct of war with the intent of politics It shapes and guides military means in anticipation of a panoply of possible coming events In the process strategy changes the context within which events will happen In this new book we see clearly that the goal of strategy is not to culminate events to establish finality in the discourse between states but to continue them to influence state discourse in such a way that it will go forward on favorable terms For continue it will This book will provoke debate and stimulate new thinking across the field and strategic studies      *A European Space Policy* Thomas Hoerber, Sarah Lieberman, 2019-05-10 This book builds a bridge between current research in space policy and contemporary European political studies by addressing developments in European space policy and its significance for European integration It answers questions central to European studies applying them to the burgeoning field of EU space policy and takes an interdisciplinary approach examining space policy in the light of a range of policy areas including common foreign security policy technology policy transport policy and internal market Using a theoretical framework based around notions of neo institutionalism to evaluate the evolving nature of space policy in Europe the book provides clear insights into the development of the sector and the resulting developments made to the European political landscape This text will be of key interest to scholars and students of Space policy EU studies politics European Studies Politics International Relations Political Science History Economics and Security Studies      **General**

**MacArthur's Strategic Success During The Early Months Of The Korean War** LTC James D. Clay, 2015-11-06 Many military professionals regard General of the Army Douglas MacArthur as a very polarizing figure in military history from his strategic use of maneuver to defeat the Japanese at Leyte to his public defiance of the Commander in Chief President Truman on his policy towards the Korean War Seen by many as a tactical genius while others viewed him as an egomaniac General MacArthur exhibited both sides of this complex character but the evidence shows that MacArthur possessed a level of military competence that set him apart from his contemporaries In 1950 MacArthur demonstrated one of his most embarrassing defeats as well as one of his most brilliant successes within the course of ten weeks MacArthur exemplifies a level of confidence that earned him the modern reputation as an operational artist from his ability to turn the tide of war and restore South Korea's sovereignty

**Thomas Schelling and the Nuclear Age** Robert Ayson, 2020-09-23 An illuminating insight into the work of Thomas Schelling one of the most influential strategic thinkers of the nuclear age By the time of the Cuban Missile Crisis and the United States' early forays into Vietnam he had become one of the most distinctive voices in Western strategy This book shows how Schelling's thinking is much more than a reaction to the tensions of the Cold War In a demonstration that ideas can be just as significant as superpower politics Robert Ayson traces the way this Harvard University professor built a unique intellectual framework using a mix of social scientific reasoning from economics to social theory and psychology As such this volume offers a rare glimpse into the intellectual history which underpins classical thinking on nuclear strategy and arms control thinking which still has an enormous influence in the early twenty-first century

*European Integration and Space Policy* Thomas Hoerber, Antonella Forganni, 2020-12-21 This volume addresses developments in European space policy and its significance for European integration using discourse theory as a framework It seeks to address the developments in European space policy by examining several sensitive security questions linked in general with space activities on the one hand and the interplay between space policy and security policy in the European Union EU on the other The book argues that defence and security matters should be studied for a better understanding of space projects in their historical political economic legal and social context The volume seeks to answer the following key questions What can space policy contribute to European identity formation and the integration process What are the interests of member states EU institutions in space How is space policy perceived by European institutions and how have they been engaged in the policy process to promote activity in space In which ways is the EU engaged in space in terms of policy areas e.g. foreign policy industrial policy security and defence policies What is the impact of institutions on the policy making process in European space policy This book will be of interest to students of EU policy space policy discourse studies and International Relations in general

**Britain and Ballistic Missile Defence, 1942-2002** Jeremy Stocker, 2004-08-02 Britain was the first country to come under sustained ballistic missile attack during 1944-45 Defence against ballistic missiles has been a persistent if highly variable subject of political policy and technical investigation ever since The British Second

World War experience of trying to counter the V 2 attacks contained many elements of subsequent responses to ballistic missile threats After the war a reasonably accurate picture of Soviet missile capabilities was not achieved until the early 1960s by which time the problem of early warning had largely been solved From the mid 1960s on British attention shifted away from the development of the country's own defences towards the wider consequences of US and Soviet deployments After the end of the Cold War there was renewed interest in a limited active defence capability against Third World missile threats This well researched book is primarily aimed at students of post war British foreign and defence policies but will also be of interest to informed general readers

Pure Strategy Everett Dolman, 2004-08-02 A stimulating new inquiry into the fundamental truth of strategy its purpose place utility and value This new study is animated by a startling realization the concept of strategic victory must be summarily discarded This is not to say that victory has no place in strategy or strategic planning The outcome of battles and campaigns are variables within the strategist's plan but victory is a concept that has no meaning there To the tactical and operational planner wars are indeed won and lost and the difference is plain Success is measurable failure is obvious In contrast the pure strategist understands that war is but one aspect of social and political competition an ongoing interaction that has no finality Strategy therefore connects the conduct of war with the intent of politics It shapes and guides military means in anticipation of a panoply of possible coming events In the process strategy changes the context within which events will happen In this new book we see clearly that the goal of strategy is not to culminate events to establish finality in the discourse between states but to continue them to influence state discourse in such a way that it will go forward on favorable terms For continue it will This book will provoke debate and stimulate new thinking across the field and strategic studies

*The Red Army, 1918-1941* Earl F Ziemke, 2004-05-20 Supported by evidence released after the collapse of the Soviet Union this book follows the career of the Red Army from its birth in 1918 as the vanguard of world revolution to its affiliation in 1941 with the citadel of capitalism the USA

**The Improbable War** Christopher Coker, 2015 A prescient analysis of the likelihood of a US China conflict and how it might be avoided

**Routledge Handbook of Space Policy** Thomas Hoerber, Mariel Borowitz, Antonella Forganni, Bruno Reynaud de Sousa, 2024-12-30 This volume offers a comprehensive overview of the field of space policy Space is a technology driven domain and policy development has accelerated in recent years at a time when the space economy has begun to show remarkable potential Thus this handbook gathers experts from different fields with the aim of 1 offering an overview of the state of play regarding space policy issues and 2 expanding knowledge about possible future developments Given the cross disciplinary nature of the subject and its vast scope the authors contributions are grouped within different thematic sections as follows Theoretical structures for an understanding of space policies The history of space Society justice and the human impact Governance of space Popularisation of space New frontiers in space and expansion into the unknown World space policies by geographic areas The introduction and the conclusion chapters provide a coherent connection between the

contributions with each section presenting transversal themes such as power dynamics and rules commercialisation sustainability militarisation applications and domestic use and justice This volume will be of much interest to students of space policy and power security studies and international relations

**Space Warfare** John J. Klein, 2024-09-18 This book examines military space strategy within the context of the land and naval strategies of the past This second edition has been updated and revised with several new chapters included The book examines competition and conflict in the space domain including the methods used and sound counterstrategies to thwart a competitor's efforts Contrary to many spacepower pundits the book explains that neither is the space domain inherently offense dominant nor is there a first mover advantage when incorporating a sound space strategy Offering new insights into the nature of strategic competition in space this second edition leans heavily on the British maritime experience and the work of Julian Corbett to provide a strategic framework for understanding competition crisis and conflict in the space domain It also includes important concepts from leading theorists and strategists both past and present to amplify concepts and provide additional insights into the functioning of space strategy The book provides a foundational framework by underscoring that space strategy is shaped by the fundamental nature of all warfare along with the universal principles of strategy and the essential unity of all strategic experience Warfare is warfare no matter the domain of operations and consequently policymakers and military leaders can look to historical experience and knowledge of past strategic frameworks to help gain insights into the functioning of space warfare This book will appeal to students of spacepower defense and strategic studies and International Relations

Australia's Defence Strategy Adam Lockyer, 2017-01-30 How would we know a good defence strategy if we saw one The Asian Century is challenging many of the traditional assumptions at the heart of Australian defence policy and strategy Defence scholars have risen to the challenge of these transformational times and have collectively produced a smorgasbord of alternatives for policy makers The problem is that these recommendations all point in very different directions How should we evaluate these options Adam Lockyer tackles this question and develops a novel conceptual framework for evaluating defence strategies By doing so this book breaks new theoretical ground and makes an important contribution to our understanding of strategy in general and defence strategy in particular Lockyer then applies this analytical tool to the leading arguments in Australia's defence debate and finds that there is still substantial work to be done Lockyer concludes by proposing a new Australian defence strategy for a contested Asia that would pass the test for a good defence strategy The result is essential reading for anyone interested in strategy or the future of Australian defence policy

**05 , Toward a Theory of Spacepower** Charles D. Lutes, 2011-03-07 This volume is a product of the efforts of the Institute for National Strategic Studies Spacepower Theory Project Team which was tasked by the Department of Defense to create a theoretical framework for examining spacepower and its relationship to the achievement of national objectives The team was charged with considering the space domain in a broad and holistic way incorporating a wide range of perspectives

from U S and international space actors engaged in scientific commercial intelligence and military enterprises This collection of papers commissioned by the team serves as a starting point for continued discourse on ways to extend modify refine and integrate a broad range of viewpoints about human initiated space activity its relationship to our globalized society and its economic political and security interactions It will equip practitioners scholars students and citizens with the historical background and conceptual framework to navigate through and assess the challenges and opportunities of an increasingly complex space environment

Warfighting and Disruptive Technologies Terry Pierce, 2004-08-05 Occasionally during times of peace military forces achieve major warfighting innovations Terry Pierce terms these developments disruptive innovations and shows how senior leaders have often disguised them in order to ensure their innovations survived He shows how more common innovations however have been those of integrating new technologies to help perform existing missions better and not change them radically The author calls these sustaining innovations The recent innovation history suggests two interesting questions First how can senior military leaders achieve a disruptive innovation when they are heavily engaged around the world and they are managing sustaining innovations Second what have been the external sources of disruptive and sustaining innovations This book is essential reading for professionals and students interested in national security military history and strategic issues

**Strategy** Richard J Bailey, James W Forsyth, Mark O Yeisley, 2016-04-15 How does one engage in the study of strategy Strategy Context and Adaptation from Archidamus to Airpower argues that strategy is not just concerned with amassing knowledge it is also about recognizing our imperfect understanding of the environment and respecting the complex nature of adaptation to the unforeseen or unexpected In essence the strongest strategists are those who commit to an education that cultivates a more holistic and adaptive way of thinking With that thought in mind the contributors to Strategy each a current or former professor at the School of Advanced Air and Space Studies widely considered the Department of Defense's premier school of strategy offer ways of thinking strategically about a variety of subject matters from classical history to cyber power Practitioners in the profession of arms perhaps more than any other profession must employ critical thinking where the application of power on land at sea in the air and in space and cyberspace are concerned Strategy examines various sub disciplines regarding the use of power and illuminates different approaches to thinking which have implications beyond the implementation of force

Strategy Dynamics Matus Halas, 2025-02-05 With a wealth of valuable empirical materials Strategy Dynamics explores the concept of adaptation in strategic decision making through detailed engagement with professional military education at various war colleges and three in depth case studies of significant strategic reversals by the United States France and former Czechoslovakia It examines President Ronald Reagan's decision to withdraw U S Marines from Lebanon in 1984 Francois Mitterrand's reversal of his original plan for the French exit from the European Monetary System in 1983 and Vclav Havel's strategic pivot towards NATO membership for Czechoslovakia in 1991 After introducing a novel process oriented model of strategic decision making that highlights the

positive effect of friction on strategy adaptation the author uses process tracing to analyse factors at the individual domestic and international levels that enabled and triggered these strategic U turns The research draws on declassified and previously unavailable documents as well as interviews with key figures involved in these strategic decisions providing unique insights into the complexities of strategic decision making and the process of strategy adaptation The book compels readers to see strategy as a dynamic process continuously evolving in response to changing circumstances rather than as a fixed plan In doing so Strategy Dynamics fills a critical gap in the literature by focusing on the processes that drive strategy adaptation It offers a comprehensive study of the conditions that contribute to open societies ability to adapt their strategies more effectively and it will serve as a reference for anyone dealing with strategy adaptation

**Special Operations and Strategy** James D. Kiras, 2006-07-29 This book argues that the root of effective special operations lies in understanding the relationship between moral and material attrition this is achieved by examining both strategic theory and real life case studies
