

Your task is to construct an E-R diagram and the resulting normalized tables to solve the scenario below. You should present your results beginning with a Conceptual ERD (your initial impression of the scenario) and the corresponding Dependency Diagrams. From this continue to normalize until you have a complete set of related tables.

Your task is to develop the database design for a business that has multiple stores. They would like to be able to track the sale of products to customers, as well as inventory level per store.

Data must be captured to identify customers (name, address, phone number, email), products (price, type, manufacturer), and store (name, address).

They also need to report on things like:

*Sales per store
Sales per product
Stock levels*

HINTS:

- Begin by looking at the customer.
 - Customer Products (1:M)
- Take a top-down approach; start with E-R and move to attribute definition
- Look for partial and transitive dependencies
- Remember to make attributes as atomic as possible
- Feel free to add any attributes you think are necessary

Requirements:

In this assignment, you are responsible for the following:

- E-R diagram based on your initial view of the database
- Dependency diagram(s) showing your entity definition
- Entity definition; list all fields, primary key, and foreign keys
- E-R diagram based upon your final ("normalized view") of the database

Research Report - U.S. Army Research Institute for the Behavioral and Social Sciences U.S. Army Research Institute for the Behavioral and Social Sciences,1996 **International Encyclopedia of Ergonomics and Human Factors - 3 Volume Set** Informa Healthcare,Waldemar Karwowski,2006-03-15 The previous edition of the International Encyclopedia of Ergonomics and Human Factors made history as the first unified source of reliable information drawn from many realms of science and technology and created specifically with ergonomics professionals in mind It was also a winner of the Best Reference Award 2002 from the Engineering Libraries *Nuclear Fusion Programme: Annual Report of the Association Karlsruhe Institute of Technology/EURATOM ; January 2013 - December 2013* Pleli, Ingrid,2015-03-18 *An Assessment of the National Institute of Standards and Technology Building and Fire Research Laboratory* National Research Council,Division on Engineering and Physical Sciences,Laboratory Assessments Board,Panel on Building and Fire Research,2008-10-27 A panel of experts appointed by the National Research Council assessed the scientific and technical work of the Building and Fire Research Laboratory BFRL of the National Institute of Standards and Technology NIST The scope of the assessment included the following criteria 1 the technical merit of the current laboratory programs relative to the current state of the art worldwide 2 the adequacy of the laboratory facilities equipment and human resources as they affect the quality of the laboratory technical programs and 3 the degree to which the laboratory programs in measurement science and standards achieve their stated objectives and desired impact The book finds that overall the technical merit of the programs reviewed within the BFRL is very high and generally at a state of the art level The programs have clear ties to the overall BFRL Strategic Priority Areas and are well aligned with the mission of NIST which is to promote U S innovation and industrial competitiveness by advancing measurement science standards and technology in ways that enhance economic security and improve our quality of life Channel Modeling in 5G Wireless Communication Systems Hao Jiang,Guan Gui,2019-11-22 This book addresses the fundamental design and technical challenges for fifth generation 5G wireless channel models including multi frequency bands and multi scenarios The book presents a strong vision for 5G wireless communication networks based on current market trends proven technologies and future directions The book helps enable researchers and industry professionals to come up with novel ideas in the area of wireless heterogeneity to minimize traffic accidents to improve traffic efficiency and to foster the development of new applications such as mobile infotainment The book acts as a comprehensive reference for students instructors researchers engineers and other professionals building their understanding of 5G and in designing 5G systems Addresses fundamental design and technical challenges for 5G wireless channel models Presents how to create reliable statistical channel models to capture the propagation properties between transmitters and receivers Pertinent to researchers engineers and professionals in 5G **Requirements Engineering: Foundation for Software Quality** Roel Wieringa,Anne Persson,2010-06-16 This volume compiles the papers accepted for

presentation at the 16th Working Conference on Requirements Engineering Foundation for Software Quality REFSQ 2010 held in Essen during June 30 and July 1 2 2010 Since 1994 when the first REFSQ took place requirements engineering RE has never ceased to be a dominant factor influencing the quality of software systems and services Initially started as a workshop the REFSQ working conference series has now established itself as one of the leading international forums to discuss RE in its many relations to quality It seeks reports of novel ideas and techniques that enhance the quality of RE products and processes as well as reflections on current research and industrial RE practices One of the most appreciated characteristics of REFSQ is that of being a highly interactive and structured event REFSQ 2010 was no exception to this tradition In all we received a healthy 57 submissions After all submissions had been carefully assessed by three independent reviewers and went through electronic discussions the Program Committee met and finally selected 15 top quality full papers 13 research papers and 2 experience reports and 7 short papers resulting in an acceptance rate of 38 % The work presented at REFSQ 2009 continues to have a strong anchoring in practice with empirical investigations spanning over a wide range of application domains

Advances in Manufacturing IV Justyna Trojanowska, Agnieszka Kujawińska, Ivan Pavlenko, Jozef Husar, 2024-03-29 This book describes cutting edge research and technologies aimed at increasing the efficiency of production processes and supporting the implementation of Industry 4.0 and Industry 5.0 solutions in production Gathering peer review contributions to the 8th International Scientific Technical Conference MANUFACTURING 2024 held on May 14 16 2024 in Poznan Poland it reports on research on and applications of artificial intelligence and digital technologies to improve the production process It also presents augmented virtual and mixed reality tools that can be used or have been tested in the manufacturing industry and for education and training purposes Last but not least it highlights cutting edge solutions for green and sustainable production Offering a timely practice oriented reference guide for both researchers and practitioners in manufacturing this book is also intended to bridge the gap between university and industry fostering a closer communication and cooperation between them

What Every Engineer Should Know About the Internet of Things Joanna F. DeFranco, Mohamad Kassab, 2021-11-14 Internet of Things IoT products and cyber physical systems CPS are being utilized in almost every discipline and there continues to be significant increases in spending on design development and deployment of IoT applications and analytics within every domain from our homes schools government and industry This practical text provides an introduction to IoT that can be understood by every engineering discipline and discusses detailed applications of IoT Developed to help engineers navigate this increasingly important and cross disciplinary topic this work Offers research based examples and case studies to facilitate the understanding of each IoT primitive Highlights IoT's connection to blockchain Provides an understanding of benefits and challenges of IoT and its importance to a variety of engineering disciplines Written to be accessible to non experts in the subject *What Every Engineer Should Know About the Internet of Things* communicates the importance of this technology and how it can support and challenge all interrelated actors as well

as all involved assets across many domains

Bridging the GAAP Itzhak Venezia, Zvi Wiener, 2012 Bridging the GAAP Recent Advances in Finance and Accounting aims to promote a stronger interface between researchers in accounting and finance that will enhance the understanding of the similarities and differences between these two fields Such dialog will also acquaint researchers in each area with significant recent advances in the other area and will enable a cross fertilization of thoughts from which both can significantly benefit This consolidates the efforts to bridge the gap between finance and accounting by looking at diverse topics in accounting and finance and providing interesting points of view on different topics Most of the chapters concentrate on the topic of fair value accounting and on the question of the extent to which accounting reflects the financial situation of a firm The book combines new developments in the area of theoretical finance and accounting and the convergence of these two approaches to better serve investors and the general public

Bridging the GAAP Zvi Wiener, 2012 Bridging the GAAP Recent Advances in Finance and Accounting lies at the intersection of the two disciplines The readings in this volume bridge the gap between finance and accounting by looking at diverse topics in accounting and finance and by providing interesting points of view regarding their interface Most of the chapters concentrate on the topic of fair value accounting and on the extent to which accounting numbers mirror the financial situation of the firm This book combines new developments in the areas of theoretical and empirical finance and accounting and emphasizes the convergence of these two disciplines to better serve researchers investors and the general public The papers contained in this volume will help scholars practitioners and investors better understand the similarities and differences between these two important fields of study

Simulation Approach Towards Energy Flexible Manufacturing Systems Jan Beier, 2017-03-23 This authored monograph provides in depth analysis and methods for aligning electricity demand of manufacturing systems to VRE supply The book broaches both long term system changes and real time manufacturing execution and control and the author presents a concept with different options for improved energy flexibility including battery compressed air and embodied energy storage The reader will also find a detailed application procedure as well as an implementation into a simulation prototype software The book concludes with two case studies The target audience primarily comprises research experts in the field of green manufacturing systems

Advanced Communication and Control Methods for Future Smartgrids Taha Selim Ustun, 2019-11-27 Proliferation of distributed generation and the increased ability to monitor different parts of the electrical grid offer unprecedented opportunities for consumers and grid operators Energy can be generated near the consumption points which decreases transmission burdens and novel control schemes can be utilized to operate the grid closer to its limits In other words the same infrastructure can be used at higher capacities thanks to increased efficiency Also new players are integrated into this grid such as smart meters with local control capabilities electric vehicles that can act as mobile storage devices and smart inverters that can provide auxiliary support To achieve stable and safe operation it is necessary to observe and coordinate all of these

components in the smartgrid **Advances in Human Factors in Wearable Technologies and Game Design** Tareq Ahram, 2019-06-13 This book focuses on the human aspects of wearable technologies and game design which are often neglected It shows how user centered practices can optimize the wearable experience thus improving user acceptance satisfaction and engagement with novel wearable gadgets It addresses both research and best practices in the applications of human factors and ergonomics to sensors wearable technologies and game design innovations as well as new findings on the integration of wearability principles with regard to aesthetics affordance comfort contextual awareness customization ease of use ergonomics information overload intuitiveness obtrusiveness privacy reliability responsiveness satisfaction subtlety user friendliness and wearability Gathering the outcomes of both the AHFE 2019 Conference on Human Factors and Wearable Technologies and the AHFE 2019 Conference on Human Factors in Game Design and Virtual Environments held on July 24 28 2019 in Washington DC USA the book addresses the needs of professionals researchers and students whose work involves the human aspects of wearable smart and or interactive technologies and game design research *Pragmatics of Chinese as a Second Language* Shuai Li, 2023-11-14 This book brings together a collection of high quality empirical studies which examine multiple aspects involved in the acquisition teaching and assessment of pragmatics in Chinese as a second language L2 The studies collectively address some of the most cutting edge issues in the field of L2 pragmatics such as the acquisition of key pragmatic features methodological innovations in pragmatics assessment individual difference factors and virtual learning contexts The majority of the chapters include detailed descriptions of the instruments used and additional material in the appendices making it a truly valuable collection for researchers and students alike Furthermore the publication includes the most comprehensive state of the art review of empirical research in L2 Chinese pragmatics published bilingually in English and Chinese between 1995 and 2022 along with a supplemental annotated bibliography While the empirical studies all focus on Chinese as the target language the issues they address have implications for L2 pragmatics research in general and this book will appeal to those interested in the latest developments in the field **Advances in Cryptology -- CRYPTO 2012** Reihaneh Safavi-Naini, Ran Canetti, 2012-08-08 This book constitutes the refereed proceedings of the 32nd Annual International Cryptology Conference CRYPTO 2012 held in Santa Barbara CA USA in August 2012 The 48 revised full papers presented were carefully reviewed and selected from 225 submissions The volume also contains the abstracts of two invited talks The papers are organized in topical sections on symmetric cryptosystems secure computation attribute based and functional encryption proofs systems protocols hash functions composable security privacy leakage and side channels signatures implementation analysis black box separation cryptanalysis quantum cryptography and key encapsulation and one way functions Talent Identification and Development in Youth Soccer Adam Kelly, 2023-09-11 Talent development pathways in youth soccer provide opportunities for young players to realise their potential Such programmes have become increasingly popular throughout governing bodies professional clubs and independent organisations This has coincided with

a rapid rise in sport science literature focused specifically on optimising player development towards expertise However the decreasing age of recruitment biases in selection inconsistencies in the language used underrepresented populations and large dropout rates from pathways have magnified the potential flaws of existing organisational structures and settings Moreover despite both the professionalisation of talent development pathways and growing research attention we still know little about the characteristics that facilitate accurate recruitment strategies into pathways and long term development outcomes Talent Identification and Development in Youth Soccer provides an all encompassing guide for both researchers and practitioners by gathering the existing literature to help better understand the current context of this discipline Chapters are contributed by a team of leading and emerging international experts examining topics such as technical tactical physical psychological social activities and trajectories career transitions relative age effects creativity and genetics with each chapter offering important considerations for both researchers and practitioners With a dual emphasis on both theory and practice this book is an important text for any student researcher coach or practitioner with an interest in talent identification talent development youth soccer soccer coaching or expertise and skill acquisition

Multicriteria Decision Aid and Artificial Intelligence Michael Doumpos, Evangelos Grigoroudis, 2013-02-01 Presents recent advances in both models and systems for intelligent decision making Organisations often face complex decisions requiring the assessment of large amounts of data In recent years Multicriteria Decision Aid MCDA and Artificial Intelligence AI techniques have been applied with considerable success to support decision making in a wide range of complex real world problems The integration of MCDA and AI provides new capabilities relating to the structuring of complex decision problems in static and distributed environments These include the handling of massive data sets the modelling of ill structured information the construction of advanced decision models and the development of efficient computational optimization algorithms for problem solving This book covers a rich set of topics including intelligent decision support technologies data mining models for decision making evidential reasoning evolutionary multiobjective optimization fuzzy modelling as well as applications in management and engineering Multicriteria Decision Aid and Artificial Intelligence Covers all of the recent advances in intelligent decision making Includes a presentation of hybrid models and algorithms for preference modelling and optimisation problems Provides illustrations of new intelligent technologies and architectures for decision making in static and distributed environments Explores the general topics on preference modelling and learning along with the coverage of the main techniques and methodologies and applications Is written by experts in the field This book provides an excellent reference tool for the increasing number of researchers and practitioners interested in the integration of MCDA and AI for the development of effective hybrid decision support methodologies and systems Academics and post graduate students in the fields of operational research artificial intelligence and management science or decision analysis will also find this book beneficial

Information Modelling and Knowledge Bases XXXIII Marina Tropmann-Frick, Hannu Jaakkola, Bernhard Thalheim, Yasushi Kiyoki, Naofumi

Yoshida,2022-02-15 The technology of information modelling and knowledge bases addresses the complexities of modelling in digital transformation and digital innovation reaching beyond the traditional borders of information systems and academic research in computer science This book presents 21 papers from the 31st International conference on Information Modeling and Knowledge Bases EJC 2021 hosted by the Department Informatik of the University of Applied Sciences in Hamburg Germany and held as a virtual event from 7 to 9 September 2021 due to restrictions caused by the Corona virus The conference provides a research forum for academics and practitioners dealing with information and knowledge to exchange scientific results and experiences and EJC 2021 covered a wide range of themes extending knowledge discovery through conceptual modeling knowledge and information modeling and discovery linguistic modeling cross cultural communication and social computing environmental modeling and engineering and multimedia data modeling and systems As always the conference was open to new topics related to its main themes meaning the content emphasis of the EJC conferences is always able to adapt to the changes taking place in the research field and the 21 papers included here after rigorous review selection and upgrading are the result of presentations comments and discussions during the conference Providing an up to the minute overview of the technology of information modeling and knowledge bases the book will be of interest to all those working in the field

Comparison of Continuous and Discontinuous Collisional Bumpers: Dimensionally Scaled Impact Experiments Into Single Wire Meshes Friedrich Hörz,1992 An experimental inquiry into the utility of discontinuous bumpers was conducted to investigate the collisional outcomes of impacts into single grid like targets and to compare the results with more traditional bumper designs that employ continuous sheet stock We performed some 35 experiments using 6 3 and 3 2 mm diameter spherical soda lime glass projectiles at low velocities less than 2 5 km s and 13 at velocities between 5 and 6 km s using 3 2 mm spheres only The thrust of the experiments related to the characterization of collisional fragments as a function of target thickness or areal shield mass of both bumper designs

A Guide To Practical Human Reliability Assessment B. Kirwan,2017-12-14 Human error is here to stay This perhaps obvious statement has a profound implication for society when faced with the types of hazardous system accidents that have occurred over the past three decades Such accidents have been strongly influenced by human error yet many system designs in existence or being planned and built do not take human error into consideration A Guide to Practical Human Reliability Assessment is a practical and pragmatic guide to the techniques and approaches of human reliability assessment HRA It offers the reader explanatory and practical methods which have been applied and have worked in high technology and high risk assessments particularly but not exclusively to potentially hazardous industries such as exist in process control nuclear power chemical and petrochemical industries A Guide to Practical Human Reliability Assessment offers the practitioner a comprehensive tool kit of different approaches along with guidance on selecting different methods for different applications It covers the risk assessment and the HRA process as well as methods of task analysis error identification quantification representation of

errors in the risk analysis followed by error reduction analysis quality assurance and documentation There are also a number of detailed case studies from nuclear chemical offshore and marine HRA S exemplifying the image of techniques and the impact of HRA in existing and design stage systems
