Hammerstrom, 2015-08-11 Kexue or science captured the Chinese imagination in the early twentieth century promising new knowledge about the world and a dynamic path to prosperity Chinese Buddhists embraced scientific language and ideas to carve out a place for their religion within a rapidly modernizing society Examining dozens of previously unstudied writings from the Chinese Buddhist press this book maps Buddhists efforts to rethink their traditions through science in the initial decades of the twentieth century Buddhists believed science offered an exciting alternative route to knowledge grounded in empirical thought much like their own They encouraged young scholars to study subatomic and relativistic physics while still

maintaining Buddhism's vital illumination of human nature and its crucial support of an ethical system rooted in radical egalitarianism. Showcasing the rich and progressive steps Chinese religious scholars took in adapting to science's rising authority, this volume offers a key perspective on how a major Eastern power transitioned to modernity in the twentieth century and how its intellectuals anticipated many of the ideas debated by scholars of science and Buddhism today.

Zhang Yijing (1871-1931) and the Search for a Chinese Christian Identity Jue Wang (王觉), 2021-10-06 Can Christian identity and national identity be reconciled? For Christians in China, this question is particularly fraught. While Sinicization offers the indigenous church one path forward, it fails to provide a tenable solution for believers unwilling to submit their love of God under love of country. Dr. Jue Wang explores an alternative roadmap for Chinese Christian identity in the writings of Zhang Yijing. The editor of *True Light*, a Chinese Baptist publication, Zhang was also a Chinese patriot, Confucian, and life-long proponent of science and reason. Utilizing the lens of identity studies, Dr. Wang examines Zhang's process of reconciling faith and culture in his quest to be both authentically Christian and authentically Chinese. This study offers a fascinating glimpse into the modern history of the Chinese church while uncovering the significance of an often overlooked Chinese Christian apologist. Zhang's example offers encouragement and hope for believers around the world seeking to integrate social, cultural, and national identities under the lordship of Christ. Modern Chinese Counter-Enlightenment Peng Hsiao-yen, 2023-06-06 In *Modern Chinese Counter Enlightenment Affect Reason and the Transcultural Lexicon*, Peng Hsiao-yen argues that a trend of Counter Enlightenment had grown from the late Qing to the May Fourth era in the 1910s to the 1920s and continued to the 1940s. She demonstrates how Counter Enlightenment was manifested with case studies such as Lu Xun's writings in the late 1900s, the Aesthetic Education movement from the 1910s to 1920s, and the Science and Lifeview debate in the 1920s. During the period, the life philosophy movement highlighting the epistemic debate on affect and reason is connected with its counterparts in Germany, France, and Japan. The movement had widespread and long-term impact on Chinese philosophy and literature. Using the transcultural lexicon as methodology, this book traces how the German term *Lebensanschauung* (lifeview), a key concept in Rudolf Eucken's life philosophy, constituted a global tide of Counter Enlightenment that influenced the thought of leading Chinese intellectuals in the Republican era. Peng contends that Chinese intellectuals' transcultural connections with others in the philosophical pursuit of knowledge triggered China's self-transformation. She has successfully reconstructed the missing link in the Chinese theater of the worldwide dialectic of Enlightenment and Counter Enlightenment. This book can be considered a milestone in modern Chinese and cultural studies. It is also the most ambitious attempt in developing a new kind of interdisciplinary studies, an attempt that bears a philosophic weight and cuts across the disciplines of Sinology, comparative literature, intellectual history, and translation studies. At the same time, it seeks to demonstrate a new theory of Transcultural Lexicon, which should appeal to all scholars interested in cultural theories. Leo Ou-fan Lee, Chinese University of Hong Kong. In the age ruled by the myth of

technoscientific triumphalism this timely and refreshing book unearths a critical strand of thought and sensibility against enlightenment rationality in modern China Drawing on historical archives and debates Peng Hsiao yen stages a compelling critique of industrial modernity and the pursuit of wealth and power at the cost of emotional ties community and organic lifeways Ban Wang Stanford University

Beyond the May Fourth Paradigm Kai-wing Chow, 2008-01-01 Beyond the May Fourth Paradigm explores various dimensions of modern Chinese culture ranging from literature thought and music to scientific research business and everyday life By heeding how the May Fourth and non May Fourth groups depended on each other and joined forces in creating Chinese modernity this anthology points to the significant directions that Chinese historical actors chose as they competed but also collaborated in modernizing themselves their culture and the nation

New Culture in a New World David Kenley, 2004-06-01 During the 1920s China s intellectuals called for a new literature a new system of thought and new orientation towards modern life Commonly known as the May Fourth Movement or the New Culture Movement this intellectual momentum spilled beyond China into the overseas Chinese communities This work analyzes the New Culture Movement from a diaspora perspective namely that of the overseas Chinese in Singapore Because they were members of a diaspora the Chinese in Singapore first had to imagine themselves as part of the Chinese nation before they could fully participate in the movement Also Singapore s new culture advocates adopted then amended the movement s basic ideas to fit their situation This work furthers our understanding of transnationalism and reminds us that in our rush to deconstruct the nation we should remember the discursive power of nationalism as it both enhances and restricts the authority of its advocates

Childbirth in Republican China Tina Johnson, 2011-09-16 Childbirth in Republican China Delivering Modernity 1911 1949 is the study of a pivotal period in which traditional midwifery marked by private unregulated old style midwives was transformed into modern midwifery through the adoption of a highly medicalized and state sponsored birth model that is standard in urban China today In the twentieth century biomedical technologies altered the process of childbirth on virtually every level What had been a matter of private interest focusing on the family and lineage became a national priority a symbol of the new citizen who would participate in the creation of a revitalized nation This transformation of reproduction coalesces with the broader story of China s twentieth century revolutions marked by an emphasis on science and modernity The roles of the state and of western medical personnel were paramount in affecting these changes but equally important are the intense social and cultural shifts that occurred simultaneously The dominant themes of reproduction in twentieth century China are characterized by expanding state involvement shifting gender roles escalating consumption patterns accompanying the commercialization of private lives and the increasing medicalization of the birth process

Ai Ssu-ch'i's Contribution to the Development of Chinese Marxism Joshua A. Fogel, 2020-10-26 Before the Cultural Revolution Ai Ssu ch i 1910-1966 was one of Communist China s foremost Marxist philosophers second only to Chairman Mao himself Ai was attracted to Marxism Leninism as a young student in China and Japan and wrote numerous books and articles seeking to explain the complexities of the philosophy in language everyone could understand His writings were enormously popular during the 1930s and 1940s and went through many printings despite continuous harassment from Kuomintang censors This volume is the first full length study of Ai Ssu ch i In spite of his popularity Ai has largely been ignored in recent histories of the Chinese Communist movement because his importance lies in his function as a popularizer rather than as an original thinker However it can be shown that Mao and other leaders of the movement were influenced by him and his writings and translations certainly helped to attract many young Chinese intellectuals to the Communist cause The recent flood of reminiscence literature in China has reserved a special place of prominence for Ai Ssu ch i This is not only because he was so admired by Mao but also because he devoted his life so enthusiastically and wholeheartedly to the Party Joshua Fogel traces the pattern of this devotion via Ai s crucial role in spreading Marxist Leninist thought among Chinese intellectuals

Reviving Ancient Chinese Mathematics Jiri Hudecek, 2014-07-25 Twentieth century China has been caught between a desire to increase its wealth and power in line with other advanced nations which by implication means copying their institutions practices and values whilst simultaneously seeking to preserve China s independence and historically formed identity Over time Chinese philosophers writers artists and politicians have all sought to reconcile these goals and this book shows how this search for a Chinese way penetrated even the most central least contested area of modernity science *Reviving Ancient Chinese Mathematics* is a study of the life of one of modern China s most admired scientific figures the mathematician Wu Wen Tsun Negotiating the conflict between progress and tradition he found a path that not only ensured his political and personal survival but which also brought him renown as a mathematician of international status who claimed that he stood outside the dominant western tradition of mathematics Wu Wen Tsun s story highlights crucial developments and contradictions in

twentieth century China the significance of which extends far beyond the field of mathematics On one hand lies the appeal of radical scientific modernity mechanisation in all its forms and competitiveness within the international scientific community On the other is an anxiety to preserve national traditions and make them part of the modernisation project Moreover Wu's intellectual development also reflects the complex relationship between science and Maoist ideology because his turn to history was powered by his internalisation of certain aspects of Maoist ideology including its utilitarian philosophy of science This book traces how Wu managed to combine political success and international scientific eminence a story that has wider implications for a new century of increasing Chinese activity in the sciences As such it will be of great interest to students and scholars of Chinese history the history of science and the history and philosophy of mathematics *Dwelling in the World* Elizabeth LaCouture, 2021-08-10 By the early twentieth century Chinese residents of the northern treaty port city of Tianjin were dwelling in the world Divided by nine foreign concessions Tianjin was one of the world's most colonized and cosmopolitan cities Residents could circle the globe in an afternoon strolling from a Chinese courtyard house through a Japanese garden past a French Beaux Arts bank to dine at a German caf and fall asleep in a British garden city style semi attached brick house *Dwelling in the World* considers family house and home in Tianjin to explore how tempos and structures of everyday life changed with the fall of the Qing Empire and the rise of a colonized city Elizabeth LaCouture argues that the intimate ideas and practices of the modern home were more important in shaping the gender and status identities of Tianjin's urban elites than the new public ideology of the nation Placing the Chinese home in a global context she challenges Euro American historical notions that the private sphere emerged from industrialization She argues that concepts of individual property rights that emerged during the Republican era became foundational to state society relations in early Communist housing reforms and in today's middle class real estate boom Drawing on diverse sources from municipal archives women's magazines and architectural field work to social surveys and colonial records *Dwelling in the World* recasts Chinese social and cultural history offering new perspectives on gender and class colonialism and empire visual and material culture and technology and everyday life
