of the grotesque and the terrible no one competent to judge and enjoy will ever go to Barham in vain George Saintsbury A History of Nineteenth Century Literature In the growth of English short fiction Barham's work looms larger yet Many a good story and tale are scattered through the corpus of English fiction prior to the 1830s but it is not I think an exaggeration to claim Barham as the first consistent English writer of the true short story Wendall V Harris British Short Fiction in the Nineteenth Century Richard Barham was a genuine poet who exerts a peculiar spell A man of some property in Kent a minor canon of St Paul's Cathedral an amateur but learned antiquary he wrote mainly to amuse himself and his verse has a spontaneity of unexpected rhyming and reckless imagination that makes it different from anybody else's Barham was gifted with some special genius which makes his meters and rhyming as catching as music so that they run in your head after reading Edmund Wilson The Devils and Canon Barham Popular phrases the most prosaic sentences the cramped technicalities of legal diction and snatches of various languages are worked in with an apparent absence of all art or effort not a word seems out of place not an expression forced whilst syllables the most intractable find the only partners fitted for them throughout the range of our language These Legends have often been imitated but never equalled Walter Hamilton Parodies of the Works of English and American Authors Barham brought exceptional qualities to the development of his particular art He was a wit and his initial success was won by his startling originality Not only did he adapt the Gallic spirit and conte to the exigencies of the English language his blending of saints and demons ghosts and abbots monkish legend and romance antiquarian lore and classical knowledge murder and crime with his own freakish and whimsical sense of humour his lightning leaps from grave to gay his quaint verbal quips his wealth of topical allusion and most bizarre rhymes all combined to secure him immediate attention and resultant fame Stewart Marsh Ellis Mainly Victorian The History Of Scotland - Volume 4: From the massacre of Glencoe to the end of Jacobitism Andrew Lang, This is volume 4 covering the time from the massacre of Glencoe to the end of Jacobitism In four volumes of more than 1500 combined pages the series The History of Scotland deals with something less than two millennia of Scottish history Every single volume covers a certain period in an attempt to examine the elements and forces which were imperative to the making of the Scottish people and to record the more important events of that time *Geography, Science and National Identity* Charles W. J. Withers, 2001-10-04 Charles Withers book brings together work on the history of geography and the history of science with extensive archival analysis to explore how geographical knowledge has been used to shape an understanding of the nation Using Scotland as an exemplar the author places geographical knowledge in its wider intellectual context to afford insights into perspectives of empire national identity and the geographies of science In so doing he advances a new area of geographical enquiry the historical geography of geographical knowledge and demonstrates how and why different forms of geographical knowledge have been used in the past to constitute national identity and where those forms were constructed and received The book will make an important contribution to the study of nationhood and empire and will therefore interest

historians as well as students of historical geography and historians of science It is theoretically engaging empirically rich and beautifully illustrated The tales of a grandfather, being the history of Scotland to the close of the Rebellion, 1745-46
