American Literary Regionalism in a Global Age Philip Joseph, 2007-01-01 In this distinctive book Philip Joseph considers how regional literature can remain relevant in a modern global community Why he asks should we continue to read regionalist fiction in an age of expanding international communications and increasing nonlocal forms of affiliation With this question as a guide Joseph places the regionalist tradition of the late nineteenth and early twentieth centuries at the center of a contemporary conversation about community Part of the challenge Joseph shows is to distinguish between versions of regionalism that speak nostalgically to modern readers and those that might enter actively into a more progressive collective dialogue Examining the works of well known writers including Hamlin Garland Abraham Cahan Willa Cather Zora Neale Hurston and William Faulkner Joseph argues that these regionalist authors share a vision of local communities in open discourse with the external world capable of shaping public thought and policy and also of benefiting from the knowledge and experiences of outsiders Their fiction depicts a range of localities from Jewish American neighborhoods and midwest farming communities to southern African American towns and southwestern mixed race parishes Their characters are often associated with the literary artistic process a method stressing open ended critique that unlike journalistic philosophical or legal processes ensures open dialogue Joseph takes his argument beyond the boundaries of literary scholarship by engaging with art critics such as Lucy Lippard distance learning opponents such as David Noble and civil society proponents such as Robert Putnam and Michael Sandel Like civil society advocates today regionalist writers used the idea of community as a discursive topos and explored how values including home and neighborhood were reconciled with such democratic ideals as individual self determination and collective empowerment

feminist theory and practice Alaimo urges feminist theorists to rethink the concept of nature by probing the vastly different meanings that it carries She discusses its significance for Americans engaged in social and political struggles from for example the Indian Wars of the early nineteenth century to the birth control movement in the 1920s to contemporary battles against racism and heterosexism Reading works by Catherine Sedgwick Mary Austin Emma Goldman Nella Larsen Donna Haraway Toni Morrison and others Alaimo finds that some of these writers strategically invoke nature for feminist purposes while others cast nature as a postmodern agent of resistance in the service of both environmentalism and the women s movement By examining the importance of nature within literary and political texts this book greatly expands the parameters of the nature writing genre and establishes nature as a crucial site for the cultural work of feminism **Marriage**

Discourses Jowan A. Mohammed, Frank Jacob, 2021-11-22 Marriage was historically not only a romantic ideal but a tool of exploitation of women in many regards Women were often considered commodities and marriage was far away from the romantic stereotypes people relate to it today While marriages served as diplomatic tools or means of political legitimization in the past the discourses about marital relationships changed and women expressed their demands more openly Discourses about marriage in history and literature naturally became more and more heated especially during the long 19th century when marriages were contested by social reformers or political radicals male and female alike The present volume provides a discussion of the role of marriage and the discourses about in different chronological and geographical contexts and shows which arguments played an important role for the demand for more equality in marital relationships It focuses on marriage discourses may they have been legal or rather socio political ones In addition the disputes about marriage in literary works of the 19th and 20th centuries are presented to complement the historical debates **Culture in the American Southwest** Keith L. Bryant, 2014-09-01 If the Southwest is known for its distinctive regional culture it is not only the indigenous influences that make it so As Anglo Americans moved into the territories of the greater Southwest they brought with them a desire to reestablish the highest culture of their former homes opera painting sculpture architecture and literature But their inherited culture was altered challenged and reshaped by Native American and Hispanic peoples and a new vibrant cultural life resulted From Houston to Los Angeles from Tulsa to Tucson Keith L Bryant traces the development of high culture in the Southwest Humans create culture but in the Southwest Bryant argues the land itself has also influenced that creation Incredible light natural grandeur and a geography at once beautiful and yet brutal molded societies that sprang from unique cultural sources The peoples of the American Southwest share a regional consciousness an experience of place that has helped to create a unified but not homogenized Southwestern culture Bryant also examines a paradox of Southwestern cultural life Southwesterners take pride in their cultural distinctiveness yet they struggled to win recognition for their achievements in high culture A dynamic tension between those seeking to re create a Western European culture and those desiring one based on regional themes and resources continues to stimulate creativity Decade by decade and city by city
