Mary Leakey In Search Of Human Beginnings:

Mary Leakey Deborah Heiligman,1995 Examines the life of the noted anthropologist and describes her discoveries digging for fossils of our ancestors in East Africa **The Early Human World** Peter Robertshaw,Jill Rubalcaba,2004 Tells the story of early human life using an incredible variety of primary sources from back cover **Encyclopedia of Evolution** Stanley A. Rice,2009 Evolutionary science is not only one of the greatest breakthroughs of modern science but also one of the most controversial Perhaps more than any other scientific area evolutionary science has caused us all to question what we are where we came from and how we relate to the rest of the universe Encyclopedia of Evolution contains more than 200 entries that span modern evolutionary science and the history of its development This comprehensive volume clarifies many common misconceptions about evolution For example many people have grown up being told that the fossil record does not demonstrate an evolutionary pattern and that there are many missing links In fact most of these missing links have been found and their modern representatives are often still alive today The biographical entries represent evolutionary scientists within the United States who have had and continue to have a major impact on the broad outline of evolutionary science The biographies chosen reflect the viewpoints of scientists working within the United States Five essays that explore interesting questions resulting from studies in evolutionary science are included as well The appendix consists of a summary of Charles Darwin s Origin of Species which is widely considered to be the foundational work of evolutionary science and one of the most important books in human history The five essays include How much do genes control human behavior What are the ghosts of evolution Can an evolutionary scientist be religious Why do humans die Are humans alone in the universe

Human Origins 101 Holly M. Dunsworth,2007-08-30 What should the average person know about science Because science is so central to life in the 21st century science educators and other leaders of the scientific community believe that it is essential that everyone understand the basic concepts of the most vital and far reaching disciplines Human Origins 101 does exactly that This accessible volume provides readers whether students new to the field or just interested members of the lay public with the essential ideas of the origins of humans using a minimum of jargon and mathematics Concepts are introduced in a progressive order so that more complicated ideas build on simpler ones and each is discussed in small bite sized segments so that they can be more easily understood Human Origins 101 enables students and the general public to understand the basic concepts underlying our knowledge of our evolution as a species This small volume covers A brief history of paleoanthropology and the discovery of human s place in nature Evolution and the Origin of Life Clues to human origins from genetics The fossil and archaeological records The distinctive traits that makes us human The diversity of modern humans With a bibliography glossary and discussion of hoaxes fringe theories and hot button issues Human Origins 101 provides the perfect starting point for anyone wishing to understand how scientists know how humans evolved *The World in Ancient Times* Ronald Mellor,Amanda H. Podany,2005-06-23 Brings together 76 additional documents from all the

regions covered in The World in Ancient Times series from back cover *The Leakeys* Angela

Ellen Sterling,1997-06 **In Search of Origins** Garry Trompf,2005-01-01 Religion is an integral part of our life The answer to the question what is religion is subjective Since the word religion and its cognates are common coinage across the literate world most of us will have a fair appreciation of the term s connotations Considering students and scholars alike are lacking an introductory textbook on the origins of religion in modern Western theory and archaeological practice this work is designed to fill the lacuna Historians of ideas and social science are often not clear as to how any given theory of religion might pertain to the known archaeological record while exponents of prehistoric religion have worked with surprisingly narrow definitions of religious life Many will locate the kernel of the matter in practice or in an active spirituality Today the pressures of the global village have forced many of us to take off our blinkers and do some cross cultural homework Religious Studies has emerged as an academic discipline or intellectual pursuit with one of its functions being to facilitate mutual understanding between traditions and to ensure that the varieties of religious belief and experience are fairly appraised The series of which this book is a part will be historically rather than theologically oriented This book will cover such a vast area for investigation and it is designed to help students find their own way through the forest pick the trees which interest them and learn how to scrutinise them in depth Religious Studies is a multi disciplinary activity and one is encouraged to turn over as many stones as possible to look at religions from as many different angles as possible the psychological anthropological sociological geographical ecological political economic and the like with some awareness of current theological debates as well This book gives scope to the comparative method and all the great religions are treated side by side with points of comparison and contrast drawn This book begin with the large question of the origins and prehistory of religion including the

bearing anthropological study has on this question before giving space to the larger traditions themselves The comparative method is applied not only between such enormous aggregates of phenomena as let us say Buddhism and Islam but between these and small scale tribal traditions as well The book highlights that some religions will be difficult to separate from cultures because they amount to a total way of life An attempt is made to try to interpret religion both as culture and as a distinctive set of forces in interaction with culture or perhaps even against prevailing cultural forms This book has been designed to help students find for themselves possible answers to existential or theological questions but only as a side effect to historical and phenomenological study and as the author says provide no such answers on a platter **The Leakey**

Ten Discoveries That Rewrote History Patrick Hunt,2007-09-25 The world s greatest archaeological finds and what they tell us about lost civilizations Renowned archaeologist Patrick Hunt brings his top ten list of ancient archaeological discoveries to life in this concise and captivating book The Rosetta Stone Troy Nineveh s Assyrian Library King Tut s Tomb Machu Picchu Pompeii the Dead Sea Scrolls Thera Olduvai Gorge and the Tomb of 10 000 Warriors Hunt reveals the fascinating stories of these amazing discoveries and explains the ways in which they added to our knowledge of human history and permanently altered our worldview Part travel guide to the wonders of the world and part primer on ancient world history Ten Discoveries That Rewrote History captures the awe and excitement of finding a lost window into ancient civilization Human Beginnings in South Africa H. J. Deacon,Janette Deacon,1999 Specialists in Stone Age archaeology in

South Africa present the results of nearly 150 years of research that follows the development of humans from their early beginnings to the late 19th century They offer evidence that the roots of South African society stretch back into the Stone Age Annotation copyrighted by Book News Inc Portland OR **Origins** Frank H. T. Rhodes,2016-07-29 Fossils are the fragments from which piece by laborious piece the great mosaic of the history of life has been constructed Here and there we can supplement these meager scraps by the use of biochemical markers or geochemical signatures that add useful information but even with such additional help our reconstructions and our models of descent are often tentative For the fossil record is as we have seen as biased as it is incomplete But fragmentary selective and biased though it is the fossil record with all its imperfections is still a treasure Though whole chapters are missing many pages lost and the earliest pages so damaged as to be as yet virtually unreadable this the greatest biography of all is one in whose closing pages we find ourselves from Origins In Origins Frank H T Rhodes explores the origin and evolution of living things the changing environments in which they have developed and the challenges we now face on an increasingly crowded and polluted planet Rhodes argues that the future well being of our burgeoning population depends in no small part on our understanding of life s past its long and slow development and its intricate interdependencies Rhodes s accessible and extensively illustrated

Rethinking Human Evolution Jeffrey H. Schwartz, 2022-11-01 Contributors from a range of disciplines consider the disconnect between human evolutionary studies and the rest of evolutionary biology The study of human evolution often seems to rely on scenarios and received wisdom rather than theory and methodology with each new fossil or molecular analysis interpreted as supporting evidence for the presumed lineage of human ancestry We might wonder why we should pursue new inquiries if we already know the story Is paleoanthropology an evolutionary science

Are analyses of human evolution biological In this volume contributors from disciplines that range from paleoanthropology to philosophy of science consider the disconnect between human evolutionary studies and the rest of evolutionary biology All of the contributors reflect on their own research and its disciplinary context considering how their fields of inquiry can move forward in new ways The goal is to encourage a more multifaceted intellectual environment for the understanding of human evolution Topics discussed include paleoanthropology s history of procedural idiosyncrasies the role of mind and society in our evolutionary past humans as large mammals rather than a special case genomic analyses computational approaches to phylogenetic reconstruction descriptive morphology versus morphometrics and integrating insights from archaeology into the interpretation of human fossils Contributors Markus Bastir Fred L Bookstein Claudine Cohen Richard G Delisle Robin Dennell Rob DeSalle John de Vos Emma M Finestone Huw S Groucutt Gabriele A Macho Fabrizzio Mc Manus Apurva Narechania Michael D Petraglia Thomas W Plummer J W F Reumer Jeff Rosenfeld Jeffrey H Schwartz Dietrich Stout Ian Tattersall Alan R Templeton Michael Tessler Peter J Waddell Martine Zilversmit

Principles of Human Evolution Robert Andrew Foley, Roger Lewin, 2013-05-03 Principles of Human Evolution presents an in depth introduction to paleoanthropology and the study of human evolution Focusing on the fundamentals of evolutionary theory and how these apply to ecological molecular genetic paleontological and archeological approaches to important questions in the field this timely textbook will help students gain a perspective on human evolution in the context of modern biological thinking The second edition of this successful text features the addition of Robert Foley a leading researcher in Human Evolutionary Studies to the writing team Strong emphasis on evolutionary theory ecology and behavior and scores of new examples reflect the latest evolutionary theories and recent archaeological finds More than a simple update the new edition is organized by issue rather than chronology integrating behavior adaptation and anatomy A new design and new figure references make this edition more accessible for students and instructors New author Robert Foley leading figure in Human Evolutionary Studies joins the writing team Dedicated website www.blackwellpublishing.com/lewin provides study resources and artwork downloadable for Powerpoint presentations Beyond the Facts boxes explore key scientific debates in greater depth Margin Comments indicate the key points in each section Key Questions review and test students knowledge of central chapter concepts and help focus the way a student approaches reading the text New emphasis on ecological and behavioral evolution in keeping with modern research Fully up to date with recent fossil finds and interpretations integration of genetic and paleoanthropological approaches

Color Struck Julius O. Adekunle, Hettie V. Williams, 2010-02-24 Color Struck Essays of Race and Ethnicity in Global Perspective is a compilation of expositions on race and ethnicity written from multiple disciplinary approaches including history sociology women s studies and anthropology This book is organized around a topical chronological framework and is divided into three sections beginning with the earliest times to the contemporary world The term race has nearly become synonymous with the word ethnicity given the most recent findings in the study of

human genetics that have led to the mapping of human DNA Color Struck attempts to answer questions and provide scholarly insight into issues related to race and ethnicity

In the Beginning Nadia Durrani, Brian Fagan, 2025-02-28 In the Beginning describes the basic methods and theoretical approaches of archaeology This is a book about fundamental principles written in a clear engaging style with minimal use of technical jargon which approaches archaeology from a global perspective This new edition includes new case studies and updated sections on the latest archaeological methods theories and developments in archaeological science There are heavily updated chapters on cultural resource management public archaeology and the important role of archaeology in society as well as new material on multidisciplinary research ethics diversity underwater archaeology and the preservation of the archaeological record Beginning with a broad introduction to the field this book surveys the highlights of archaeology s vibrant history then covers the basics of preservation dating the past and the context of archaeological finds Descriptions of field surveys including the latest remote sensing methods excavation and artifact analysis lead into the study of ancient environments landscapes and settlement patterns and the people of the past There is also a chapter on archaeology as a potential career In the Beginning takes the reader on an evenly balanced journey through today s archaeology and introduces them to the importance of archaeology in the modern world This well illustrated account with its numerous boxes and sidebars is laced with interesting and often entertaining examples of archaeological research from around the globe It is aimed at introductory students in archaeology and anthropology taking survey courses on archaeology as well as more advanced readers
