Moffitt, 2014-01-10 While the Renaissance is generally perceived to be a secular movement the majority of large artworks executed in 15th century Italy were from ecclesiastical commissions Because of the nature of primarily basilica plan churches a parishioner s view was directed by the diminishing parallel lines formed by the walls of the structure Appearing to converge upon a mutual point this

resulted in an artistic phenomenon known as the vanishing point. As applied to ecclesiastical artwork the Catholic Vanishing Point CVP was deliberately situated upon or aligned with a given object such as the Eucharist wafer or Host, the head of Christ or the womb of the Virgin Mary, possessing great symbolic significance in Roman liturgy. Masaccio's fresco painting of the Trinity circa 1427 in the Florentine church of Santa Maria Novella, analyzed in physical and symbolic detail, provides the first illustration of a consistently employed linear perspective within an ecclesiastical setting. Leonardo's Last Supper, Venetian's St. Lucy Altarpiece and Tintoretto's Transfiguration illustrate the continuation of this use of liturgical perspective.

The Italian Renaissance John Stephens, 2014-06-23 In this fascinating study John Stephens interprets the significance of the immense cultural change which took place in Italy from the time of Petrarch to the Reformation and considers its wider contribution to Europe beyond the Alps. His important analysis, which is designed for students and serious general readers of history as well as the specialist, is not a straight narrative history; rather, it is an examination of the humanists, artists and patrons who were the instruments of this change, the contemporary factors that favoured it and the elements of ancient thought they revived.

The Aesthetic State Josef Chytrý, 2024-07-26 Shortly after the middle of the eighteenth century a number of thinkers from the German-speaking lands began to create a paradigm drawn from their impressions of a distant historical reality: ancient Athens. Added to it was a new mode of thought, modern dialectics, and at times even paid homage to the ancient Greek deity Dionysos to materialize their longing for an ideal. The influence of these forces came to permeate modern German consciousness, deifying the concept and activity of art, reviving the Platonic and Sanskrit vision of the cosmos as play and aesthetic creation, and projecting a way of life and labor that would honor not the commodity but the aesthetic product. With rigorous commitment to primary sources and an unflagging critical engagement with the ideas and concrete situations they raise, Josef Chytrý provides a comprehensive and extensive study of this central motif in German thought, from Winckelmann to Marcuse. Chytrý takes aesthetic state to signify the concentrated modern intellectual movement to revitalize the radical Hellenic tradition of the polis as the site of a beautiful or good life. The movement begins with the classicism of Winckelmann, Weimar aesthetic humanism, Wieland, Herder, Goethe and Schiller's formal theory of the aesthetic state, and continues through the idealism of the Swabian dialecticians, Holderlin, Hegel and Schelling, and the realism of Marx, Wagner and Nietzsche. It culminates in the postrealism of Heidegger, Marcuse, and the aesthetic modernist artist Walter Spies, who initiated a dialogue with the non-Western theatre state of the island of Bali. Josef Chytrý concludes that the future speculation on the ideal of an aesthetic state must come to terms with the postrealist themes of ontological anarchy, aesthetic ethos, and theatre state. In a bold effort to stimulate such speculation, Chytrý indicates how proponents of the aesthetic state might join forces with Rawlsian political theory to promote further the organon of persuasion that in his view serves as the common fount for the ancient dialectical and contractarian quests for the polis.
