Gestures Vilém Flusser, 2014-06-01 Throughout his career the influential new media theorist Vil m Flusser kept the idea of gesture in mind that people express their being in the world through a sweeping range of movements He reconsiders familiar actions from speaking and painting to smoking and telephoning in terms of particular movement opening a surprising new perspective on the ways we share and preserve meaning A gesture may or may not be linked to specialized apparatus though its form crucially affects the person who makes it These essays published here as a collection in English for the first time were written over roughly a half century and reflect both an eclectic array of interests and a durable commitment to phenomenological thought Defining gesture as a movement of the body or of a tool attached to the body for which there is no satisfactory causal explanation Flusser moves around the topic from diverse points of view angles and distances at times he zooms in on a modest ordinary movement such as taking a photograph shaving or listening to music at others he pulls back to look at something as vast and varied as human making embracing everything from the fashioning of simple tools to mass manufacturing But whatever the gesture Flusser analyzes it as the expression of a particular form of consciousness that is as a particular relationship between the world and the one who gestures

Freedom Carles Simó,2012-12-06 A survey of current knowledge about Hamiltonian systems with three or more degrees of freedom and related topics The Hamiltonian systems appearing in most of the applications are non integrable Hence methods to prove non integrability results are presented and the different meaning attributed to non integrability are discussed For systems near an integrable one it can be shown that under suitable conditions some parts of the integrable structure most of the invariant tori survive Many of the papers discuss near integrable systems From a topological point of view some singularities must appear in different problems either caustics geodesics moving wavefronts etc This is also related to singularities in the projections of invariant objects and can be used as a signature of these objects Hyperbolic dynamics appear as a source on unpredictable behaviour and several mechanisms of hyperbolicity are presented The destruction of tori leads to Aubrey Mather objects and this is touched on for a related class of systems Examples without periodic orbits are constructed against a classical conjecture Other topics concern higher dimensional systems either finite networks and localised vibrations on them or infinite like the quasiperiodic Schrödinger operator or nonlinear hyperbolic PDE displaying quasiperiodic solutions Most of the applications presented concern celestial mechanics problems like the asteroid problem the design of spacecraft orbits and methods to compute periodic solutions **The Anatomy of Freedom** Robin

Morgan,2014-11-11 The classic of feminist vision by one of its greatest writers with a new preface by the author With the advent of Einstein s Theory of Relativity physics and our world changed forever In The Anatomy of Freedom Robin Morgan shows us how the empowerment of women half of humanity will have the same transformative power for society that e mc2 had for the physical world This is not simply another feminist treatise Morgan looks beyond the women s movement as a crucial struggle for equal rights she sees this process as the fundamental motor for freeing both women and men and as a necessity for the survival of sentient life and of the planet itself She explains and demystifies theoretical physics in accessible terms and astonishingly uses it as a prism through which to view the equation of relationships and gender while going deep into the subconscious and plumbing the roots of passion At the same time she makes vital connections between these internal realities and global issues of the environment economics and family There has perhaps never been a book more daring The Anatomy of Freedom shows a master at her peak

The Road to Freedom Peter Allman,2012-08-21 We are not human beings that have spiritual experiences We are truly spiritual beings that are currently having a human experience In The Road to Freedom Letting Go of Your Baggage Peter Allman explains that our primary purpose is to create a divine union between our human essence and our spiritual essence and provides the road map for doing so The ego is the main reason the divine union does not occur The ego is a way of thinking It is a mind a mindset that is built on the absence of the Divine and creates a false sense of self The ego mind sees the world in terms of I want this or I

dont want this The three letters of ego could stand for edging God out People of all faiths have a prayer that is similar to Not my will but Thy will be done My will equates to the ego Thy will equates to our spiritual nature It is said we need to live in the world but not be of the world We need human strengths to live in the world Because we have a great capacity to subvert the will of God to our own we need to access our spiritual nature to be able to not be of the world **Freedom in the Air** Hamish Ross,2020-01-24 Deals with a little known aspect of the war alongside the moving story of one man s relationship with a very special animal Sqn Ldr Paul Scott Spirit of the Air This biography tells of the life of V clav Robert Bozd ch a Czech airman who escaped from the Nazi invasion fought with the French and finally arrived in Britain to fly as an air gunner with the RAF during World War II He returned to his homeland after World War II but escaped back to the UK again when the communists gained control Again he joined the RAF and rose to the rank of Warrant Officer The unique part of this is that from his time in France throughout World War II and until halfway through his second tour with the RAF Bozd ch was inseparable from his Alsatian dog Antis who became famous and was awarded a dog equivalent to the VC Antis flew with his owner on many bomber raids became the squadron mascot and was officially a serving RAF dog He played an amazing part in the second escape from the Czech communist regime when Bozd ch was lucky to make it over the border to the US zone in Germany The main hero of the book is not Bozd ch himself but his Alsatian Antis This book makes clear the extent of wartime and post war suffering endured by Czechs and others fulfilling their roles in the overall search for freedom Aircraft Owner Pilot This absorbing account of flying in WWII is based on the inseparable bond between man and dog It is a moving story with humor and sadness A Great Read that is Highly Recommended Firetrench Milton and the Burden of Freedom Warren Chernaik,2017-01-20 Throughout his writings Milton deeply engaged in political and theological controversy sought to clear a space for human freedom in a world ruled by an omniscient and omnipotent deity Paradise Lost and Samson Agonistes as well as other works by Milton in verse and prose explore the problematical aspects of a universe ruled by an Old Testament God of wrath demanding obedience who allows his creatures the freedom to be authors of their own fate Milton and the Burden of Freedom examines the contradictions inherent in Milton s religious political and ethical beliefs as expressed in his poems prose writings and the treatise De Doctrina Christiana Milton whose writings are rooted in the Reformed tradition while challenging Calvinist orthodoxy is both radical and conservative In this book Warren Chernaik traces the evolution of Milton s attitude towards freedom servitude and virtue during a century of political upheaval and disappointed hopes The Pandemic in Britain Sean Creaven,2023-06-09 This book offers a political analysis and sociological critique of the UK government s response to the novel coronavirus outbreak interpreting the inadequacies of government policy with regard to COVID 19 as the results of neoliberal ideology the protection of corporate interests Brexit nationalism and the peculiarities of a British model of capitalism based on international trade and labour market precarity Arguing that institutionalized corporate capitalist control of state and science generates new and growing public health risks

Social Appearances Barbara Carnevali, 2020-08-04 Philosophers have long distinguished between appearance and reality and the opposition between a supposedly deceptive surface and a more profound truth is deeply rooted in Western culture At a time of obsession with self representation when politics is enmeshed with spectacle and social and economic forces are intensely aestheticized philosophy remains moored in traditional dichotomies being versus appearing interiority versus exteriority authenticity versus alienation Might there be more to appearance than meets the eye In this strikingly original book Barbara Carnevali offers a philosophical examination of the roles that appearances play in social life While Western metaphysics and morals have predominantly disdained appearances and expelled them from their domain Carnevali invites us to look at society ancient to contemporary as an aesthetic phenomenon The ways in which we appear in public and the impressions we make in

terms of images sounds smells and sensations are discerned by other people's senses and assessed according to their taste this helps shape our ways of being and the world around us Carnevali shows that an understanding of appearances is necessary to grasp the dynamics of interaction recognition and power in which we live and to avoid being dominated by them Anchored in philosophy and traversing sociology art history literature and popular culture Social Appearances develops new theoretical and conceptual tools for today's most urgent critical tasks

a technique of superimposition or double exposure through which her books have explored topics now at the heart of feminist debate Centered around the subject of voice and silence these issues include the interrelation between women s power and powerlessness the interpenetration of the political and economic world with the world of the psyche and the mechanisms through which oppressions on the basis of race class and gender operate as mutually shaping forces
