Mask Of Proteus:

The Court Masque Enid Welsford, The Masque of Stuart Culture Jerzy Limon, 1990 Limon presents an unconventional approach to the Stuart masque discussing the masque as a form of courtly ritual rather than a truly theatrical performance. As seen from this perspective the masque is the deepest most complex and many faceted reflection of early Stuart culture.

Masqued Mysteries Unmasked Kristin Rygg, 2000 Exploring the English court masque as music theater Rygg musicology Hedmark College Norway finds that particularly the Jonsonian masque of the first third of the 17th century carried within it a potential function as an early modern mystery with roots in the ancient Pythagorean school. It was a mystery she says in which poetry music and dance were prime vehicles of transcendence. No information is provided about the series the volumes seems to begin. The Transcendental Masque; an Essay on Milton's Comus Angus Fletcher, William Blake, 1972 A Monster with a Thousand Hands Amy J. Rodgers, 2018-09-06 A Monster with a Thousand Hands makes visible a figure that has been largely overlooked in early modern scholarship on theater and audiences the discursive spectator an entity distinct from the actual bodies attending early modern English playhouses. Amy J. Rodgers demonstrates how the English commercial theater's rapid development and prosperity altered the lexicon for describing theatergoers and the processes of engagement that the theater was believed to cultivate. In turn these changes influenced and produced a cultural projection the spectator a figure generated by social practices rather than a faithful recording of those who attended the theater. The early modern discursive spectator did not merely develop alongside the phenomenological one but played as significant a role in shaping early modern viewers and viewing practices as did changes to staging technologies exhibition practices and generic experimentation. While audience and film studies have theorized the spectator these fields tend to focus on the role of twentieth century media film television and the computer in producing mass culture viewers. Such emphases lead to a misapprehension that the discursive spectator is modernity's creature. Fearing anachronism early modern scholars have preferred demographic studies of audiences to theoretical engagements with the effects of spectatorship. While demographic work provides an invaluable snapshot it cannot account for the ways that the spectator is as much an idea as a material presence. And while a few studies pursue the dynamics that existed among author text and audience using critical tools sharpened by film studies they tend to obscure how early modern culture understood the spectator. Rather than relying exclusively on historical or theoretical methodologies *A Monster with a Thousand Hands* reframes spectatorship as a subject of inquiry shaped both by changes in entertainment technologies and the interaction of groups and individuals with different forms of cultural production.

The Origin of the Masque Cornelia Emilia Baehrens, 1929 Shakespeare's Sweet Thunder Michael J. Collins, 1997 This collection of essays on Shakespeare's early comedies has been designed to suggest how five four hundred year old plays have been and might continue to be in the words of Jonathan Miller assimilated to the interests of the present to the men and women who encounter them as texts or
