history was deeply influenced by his own controversial experiences within the fraternity Disillusioned by the perceived injustices and exclusivity of Masonic practices Morgan s decision to expose the inner workings of the organization stemmed from a personal quest for truth and transparency His subsequent disappearance under suspicious circumstances further solidified his status as a martyr for those advocating for openness in secret societies This compelling book is a must read for anyone interested in Freemasonry American history or the dynamics of secret societies Morgan s incisive observations invite readers to question the balance between confidentiality and the ethical implications of exclusion making it an essential addition to the library of both scholars and general readers alike **American State Papers** United States. **Constructing Professional Discourse** Concepción Orna-Montesinos,2012-01-17 This book explores the fascinating role that language plays in the construction of non verbal objects by mapping out the ontological meaning of the specialised concepts and the domain specific knowledge embedded in them In doing so it provides a comprehensive linguistic insight into the discourse of professional domain specific communities and hence into the communication practices and procedures of those communities In this respect the book offers a response to the claims made by many of the most influential applied linguists today such as Vijay Bhatia 1993 2004 John Swales 1990 2004 or Ken Hyland 2002 among others who have consistently defended the need for applied linguistic research into the textual generic and social perspectives on the under researched interrelatedness of the discoursal and professional practices of a discipline Specifically this book provides readers with an integrative multi perspective approach to the study of professional domain specific discourses While it mainly draws on the tenets of genre theory and discourse semantics it also nurtures from the theoretical and empirical foundations of applied linguistics cognitive linguistics corpus linguistics and ontological engineering The book starts from the analysis of domain specific texts as final written products with specific lexico grammatical semantic and rhetorical features to later enquire into the written products as textual artefacts closely linked to the social context of production and interpretation of the text This integrative approach provides fresh new insights into the way the processes of writing are affected by the community specific institutional and socio historical circumstances in which domain specific texts are produced **The National Builder** ,1905 HOWARD MASON V VOGUE KNITTING CORPORATION, 365 MICH 552 (1962) ,1962 50
