describes the mass media's significant and sometimes controversial role in determining which topics are at the centre of public attention and action. In this new edition of his comprehensive book Max McCombs, one of the founding fathers of the agenda setting tradition of research, extends his previous synthesis of hundreds of studies carried out on this central role of the mass media in the shaping of public opinion. Across the world, the mass media strongly influences how we picture public affairs. In describing this media influence on what we think about and how we think about it, *Setting the Agenda* also discusses the sources of these media agendas, the psychological explanation for their impact on the public agenda and the subsequent consequences for attitudes, opinions and behaviour. New to this edition, McCombs debates the role of the expanded media landscape on agenda setting, the impact of the internet on the power of legacy media and the role of agenda setting beyond the realm of public affairs. This fully updated new edition will prove invaluable to students of media communications and politics, as well as those interested in the role of mass media in shaping and directing public opinion.

Media and Politics in a Globalizing World Alexa Robertson, 2015-03-17. Globalization and technological advances have had a dramatic impact on the relationship between media and politics. How can we understand the connection between the two in the present day? Alexa Robertson argues that we cannot understand the power of the one without taking the other into account. This exciting and accessible book provides fresh insight into our contemporary media landscape, adopting a truly comparative global approach. In *Media and Politics in a Globalizing World*, Robertson encourages the reader to explore the relationship from different perspectives: those of the politician, the journalist, the activist and the ordinary citizen, and how the relationship between media and politics varies across cultures. Illustrated with contemporary examples throughout the book, it weighs up arguments for seeing new developments in terms of change or continuity, as empowering or debilitating, and as promoting or undermining democracy. Suitable for undergraduates and postgraduates studying politics, media and sociology, it also will be of interest to the general reader wishing to understand the complex role of the media in political life the world over. New Media and Politics Barrie Axford, Richard Huggins, 2000-12-05. The book makes a successful attempt to map the potentially transformative effects of new media on various aspects of political institutions and culture, both at a theoretical and empirical level. Barrie Axford's discussion of the changing nature of political practice and technologies of political communication in relation to wider discourse of crisis is insightful and well

argued This is a genuinely thought provoking and generally very well written book The book also works well by providing a potential basis for theoretically informed future research in the field of political communication Political Theory Exploring the theme of the putative transformation of political modernity under the impact of new media this book adopts a questioning approach to the ways in which cultural and technological factors are affecting the temper of political life and reflects the variety of normative thinking about and empirical research on the changing character of politics in mediatized cultures New Media and Politics examines the extent to which commercial populism now dominates electoral and other political discourses the ways in which the functions of leadership government and political parties are modified by different forms of both old and new media the democratic or undemocratic import of such changes and the ways in which the dominant territorial paradigm of politics is challenged by the space and time devouring capacities of electronic media **Politics and the Mass Media**
